2. HOW DOES THIS INVESTMENT WORK?

Significant features of the Fund

The following diagram shows how the Fund works and the relationship between the parties involved:

Investors will acquire and hold units in the Fund. Units are issued at the unit value on the business day before the business day on which the application for units is received. The unit price is the Fund value divided by the number of units on issue (rounded down to two decimal places). The Fund value is, in summary, the aggregate of cash and cash equivalents and the market value of loan investments, less the aggregate of undistributed Fund income, reserves and liabilities. Fund income may be used to replenish or increase reserves which may reduce distributions to investors, and reserves may be used to offset losses which would have the effect of increasing distributions to investors.

The above valuation method may cause the unit price to alter. At the date of this document the unit price is \$1.00.

Because the Fund is a pooled investment vehicle, investors' risk is spread across cash and the whole loan portfolio. This gives investors a more diversified exposure to the mortgage lending market than investing directly in a single property loan. Accordingly, if there is a poor return or loss of loan principal on any one mortgage loan, the impact is spread across the whole portfolio and may be less likely to have a significant effect on the returns earned on investors' investments or the value of units in the Fund, when compared with an investment in a single loan.

Significant benefits of the Fund

- **Active management** – The Fund is actively managed by an experienced team.
- **Security** – Loans are secured by first mortgages with relatively conservative loan to valuation ratios*¹.
- **Diversification** – Because the Fund is a pooled investment investors' risk is spread across cash and the whole loan portfolio which gives a more diversified exposure to the mortgage lending market than investing directly in a single mortgage loan.
- **Regular income** – Quarterly distributions of interest earned by the Fund (net of tax, fees, expenses & any reserve fund contributions) with investors having the option of reinvesting the distributions in units in the Fund (except where an investor's entitlement is less than \$25 in which case the Manager will either reinvest or make the distribution at its discretion).
- **Flexibility and no minimum withdrawal period** – The flexibility to withdraw some or all of your investment at any time (although we may suspend or defer withdrawals in some circumstances).
- **No upfront fees** – There are no entry fees.
- **No withdrawal fees** – There are no withdrawal fees.
- **PIE tax benefits** – The Fund is a PIE, meaning that it pays tax on behalf of each individual New Zealand resident investor, at the investor's chosen tax rate, capped at a maximum of 28%.

Distributions

Net income distributions on units (being the net income earned on the Fund's investments after the payment of tax, fees, expenses and any reserve fund contributions) are paid out to investors quarterly. At the date of this document distributions are paid on 31 March, 30 June, 30 September and 31 December or, if that is not a business day, on the previous business day. The date distributions are paid could be changed. Any change will be notified to investors by the Manager.

¹ The LVRs can be found in the "Lending Limits (Valuation)" section of the Fund's SIPO, available at <https://investmidlands.co.nz/documents>

Distributions of income are in cash unless an investor has requested that their income entitlement is distributed to them by the issue of additional units and the Manager has accepted that request. Such requests must be submitted to the Manager in writing not less than 30 days prior to the expiry of the relevant distribution period. If an investor's income entitlement is less than \$25 then the Manager may allocate that income entitlement by the issue of additional units irrespective of whether the investor has elected to receive distributions in that manner.

The Manager has a discretion to make special distributions of income or capital at any time, provided it is satisfied that doing so would not have a material adverse effect on investors. Special distributions could be made in cash, by distributing Fund assets, or by issuing bonus units. The Manager expects special distributions to be rare and special distributions should therefore not be anticipated and should not factor into a decision to invest in the Fund.

At times, the Fund may operate a reserve fund which is designed to mitigate against a fall in distributions or unit value because of defaults by borrowers or other events affecting investment returns. Note, the reserve fund may not be sufficient or available to off-set losses in all situations and therefore is not a guarantee against falls in distributions or unit value. Allocations into and out of the reserve fund are made at the Manager's discretion based on the current loan portfolio and macro-economic environment – there is no set amount. Contributions to the reserve fund may reduce overall returns.

Legal structure

The Fund is a trust established under the Trustee Companies Act 1967 by a trust deed dated 1 October 2004 between the Supervisor and the Manager, and is currently governed by an amended and restated trust deed dated 1 March 2024 ("Trust Deed").

No assets of the Fund are available to be applied to meet the liabilities of any other fund or scheme.

Making investments

Investments in the Fund's units can be made by completing the application form that accompanies this document and submitting that form to the Manager.

Initial investments in the Fund must be for a minimum amount of \$10,000. Subsequent investments in the Fund, whether by standing monthly application or by a one-off lump sum application, must be made to the Manager for a minimum amount of \$1,000. The Manager may, at its discretion, accept lesser amounts.

The Manager reserves the right to reject any application (in whole or in part) without giving reasons.

Withdrawing your investments

Your investment is redeemable by completing a Withdrawal Notice (available from the Manager) and sending it to the Manager. Withdrawals will be actioned within 5 business days of the Manager receiving your Withdrawal Notice.

A Withdrawal Notice:

- may not be given for fewer than 100 units (or the whole amount of an investor's investment, if fewer than 500 units); and
- may not be given if it would cause an investor to hold fewer than 500 units.

If, by reason of financial, political or economic conditions applying in respect of any financial market, the nature of an investment or the occurrence of any other circumstance relating to the Fund, units specified in a Withdrawal Notice cannot be redeemed, then the Manager may suspend withdrawals.

If a Withdrawal Notice or a series of withdrawal notices is received in respect of the same holding of units within a period of 3 months and relate to more in total than 5% of the number of units on issue and the Manager and the Supervisor both agree that it is in the best interests of all investors to defer immediate redemption of the total units requested then the units may be redeemed by instalments over a period approved by the Supervisor or redeemed in total at the expiry of a period approved by the Supervisor.

Other than a transmission of units in the Fund to the executors or administrator of a deceased investor or a transfer by operation of law to any person having authority to administer the estate of a mentally disordered person and to any person becoming entitled to units in consequence of the death, bankruptcy or liquidation of any investor, units in the Fund are not transferable without the written consent of the Manager and then subject to such terms and conditions as the Manager may in its discretion impose.

No withdrawal fees are charged by the Fund.

4. WHAT ARE THE RISKS OF INVESTING?

Understanding the risk indicator

Managed funds in New Zealand must have a standard risk indicator. The risk indicator is designed to help investors understand the uncertainties both for loss and growth that may affect their investment. You can compare funds using the risk indicator.

The following is an example risk indicator. See Section 1 (Key information summary) on page 1 of this document for the filled in risk indicator for the Fund.

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down (volatility). A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz/tools/investor-kickstarter.

Note that even the lowest category does not mean a risk-free investment, and there are other risks (described under the heading 'Other specific risks') that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the 5 year period ending 30 September 2025. While risk indicators are usually relatively stable, they do shift from time to time. You can see the most recent risk indicator in the latest fund update for this Fund.

General investment risks

Some of the things that may cause the Fund's value to move up and down, which affect the risk indicator, are:

Credit risk

A borrower or several borrowers may default by not paying interest instalments when due or by failing to pay the loan balance at the end of the loan term.

Borrower default has the following potential consequences:

- Negative cash flow impact (meaning distributions to investors may be less or there may be no returns to distribute); and
- Need to enforce the security held, including a sale of the property at a mortgagee sale. The sale price achieved on a mortgagee sale is often less than on an "open market" sale and may be less than the loan amount. Additional costs are also likely to be incurred in a mortgagee sale process.

However, as the Fund lends only on first mortgage securities, it will rank first in returns from any mortgagee sale.

Property sector risks

The Fund secures loans against residential, commercial and rural properties. Each of those property sectors has its own risks. A downturn in one or more of these sectors may have an adverse effect on the financial performance of the Fund by increasing the risk of borrower default or reducing the value of security properties (and therefore increasing the risk of losses on a mortgagee sale).

Concentration risk

The mortgage loan portfolio is geographically spread throughout New Zealand. However, loan concentrations in certain regions can occur from time to time. Any significant downturn in those property markets (causing an erosion of loan security margins) could have an adverse effect on the Fund. In addition, due to the size of the Fund the mortgage loan portfolio could, at times, contain elevated levels of exposure to individual loans which could, if a default occurred, have an adverse effect on the Fund. Please refer to the latest fund update for more details of the composition of the Fund's portfolio.

Development lending risk

The Fund may, on occasion, lend for property development. Failure to complete a development can mean that the incomplete development fails to achieve the amount of loan funding on sale, increasing the risk of loss should a

default occur. To mitigate this risk the Fund's lending criteria generally requires that construction costs are locked in with a fixed price building contract, that the building contractor is reputable and satisfactory to the Manager, and that the borrower has sufficient experience and sources of funding to complete the development.

Land value risk

There are risks associated with lending on the security of a property with a high unimproved land value. The Fund may also, on occasion, lend on the security of entirely bare or undeveloped land. The unimproved land value component is exposed to risks associated with changes of zoning that could adversely affect value. In addition, in the case of natural disasters involving damage to land, there may be no adequate compensation or available insurance for the loss of the unimproved land value. This risk is mitigated by placing limits on the bare land lending conducted in the Fund.

Interest rate risk

The market demand for loans secured by first mortgages may be affected by general movements in interest rates throughout the finance industry in New Zealand, which can be influenced by economic conditions and inflation. If interest rates decrease, returns from the Fund may likewise decrease. Conversely, if interest rates increase, returns from the Fund may increase.

Other specific risks

Liquidity

There is a risk that the Fund will not have sufficient liquid assets to meet withdrawal requests.

The ability of the Fund to redeem units is dependent on the amount of cash and cash equivalents held by the Fund. The Fund invests in loans secured by mortgages which, by their nature, are illiquid. If there are requests to redeem units having an aggregate redemption amount in excess of available cash and cash equivalents (and the Manager is not able to sell part of the Fund's mortgage loan portfolio in a timely fashion), the Manager may need to suspend redemptions or require that redemptions are by instalments until cash reserves are increased.

The Manager has agreed with the Supervisor to maintain at least 5% of the Fund value in cash and cash equivalents (term deposits of up to 90 days). This provides a buffer to help mitigate liquidity risk but a suspension of withdrawals could still occur in some circumstances.

Higher levels of liquid assets result in lower returns from the Fund since interest rates on liquid assets are less than interest rates on mortgage loans.

Inflation risk

Inflation reduces the real value of all investments. However, investing long-term in a fund with a greater proportion of cash, cash equivalents, and other relatively conservative investments (such as the Fund) does expose investors to a greater risk that the value of their investments will not keep up with inflation.

Operational risk

The Manager may be impacted by operational or system failures. Such failures, whether by the Manager or third parties providing services on our behalf, could result in ineffective fund management, potentially impacting the Fund's performance or reputation, as is a particular risk for the Manager given its comparatively small size. This risk is mitigated through internal controls and governance oversight including internal and external compliance assurance processes, audit engagements, and our supervision framework.

Key Person Risk

Investments made by the Fund are reliant on the skill and experience of the Manager's employees. The departure of key personnel could adversely affect the Manager's business processes or investment assessments, potentially impacting the Fund's performance, as is a particular risk for the Manager given its comparatively small size. To mitigate this risk, we maintain key standard operating procedures, minimise reliance on individual employees, and (where practical) engage services of third parties in either a primary or backup support capacity.

Other than the risks referred to under the heading "General investment risks" (and which are reflected in the risk indicator) and the other specific risks referred to above the Manager is not aware of any specific factors that exist or are likely to arise that significantly increase the risk of returns to investors.

5. WHAT ARE THE FEES?

You will be charged fees for investing in the Fund. Fees are deducted from your investment and will reduce your returns. The fees you pay will be charged as regular charges (for example annual fund charges). Small differences in these fees can have a big impact on your investment over the long term.

Total Annual Fund Charge (TAFC)*	Estimated to be 2.10% per annum of the Fund value. This is calculated by aggregating the Manager's fees, the Supervisor's fees and estimated other management and administration charges.
The Total Annual Fund Charge is comprised of the following fees:	
Manager's basic fee	1.78% per annum of the Fund value.
Supervisor's fee	0.17% per annum of the Fund value up to \$50 million, 0.12% per annum of the Fund value up to \$100 million and thereafter 0.09% of the Fund value (but with a minimum fee of \$50,000) is payable to the Supervisor, as a Supervisor's fee.
Other management and administration charges	<p>Estimated to be 0.18% per annum, based on historic rates.</p> <p>The Manager and the Supervisor have agreed that the Manager is entitled to a fee of 50% of the default interest collected from borrowers in default. For the avoidance of doubt, if default interest is not collected from the borrower, no fee is paid to the Manager. The exact amount of this fee is unknown, so the Manager's best estimate has been used.</p> <p>Administration charges are also payable by the Fund. The exact amount of administration charges is unknown in advance.</p>

*All fees are inclusive of GST, where applicable.

- The Manager's basic fee calculation is based on the average daily Fund value and paid monthly in arrears out of the Fund's assets. The Manager's basic fee is included in the TAFC and is the remuneration to which the Manager is entitled for the provision of management services to the Fund.
- The Supervisor's fee calculation is based on the average daily Fund value and paid monthly in arrears out of the Fund's assets. The Supervisor's fee is included in the TAFC and is the remuneration to which the Supervisor is entitled for the provision of trustee and supervisory services to the Fund.
- Default interest fees are charged monthly. They contribute to the Manager's costs of managing loans that are in arrears.
- Administration charges include audit, bank charges, cost of communication to investors, legal and professional fees, and IT expenses. These are charged to the Fund as they are incurred.
- There is no performance fee in relation to the Fund.
- No withdrawal fees are charged by the Fund.
- The Manager pays initial and ongoing trail commission to third parties calculated at 0.25% per annum on a portion of some investor funds. These commissions are typically paid on less than 5% of all investments in the Fund. These commissions are paid by the Manager out of its basic fee and are not deducted from investors' investments in the Fund.

Example of how fees apply to an investor

Tom invests \$10,000 in the Fund. The starting value of his investment is \$10,000. He is charged management and administration fees which work out to about \$210 (2.10% of \$10,000). These fees might be more or less if his account balance has increased or decreased over the year. Over the next year, Tom pays no other charges.

Estimated total fees for the first year

- Individual action fees: Nil
- Fund Charges: \$210 (estimated)
- Other Charges: Nil

See the latest fund update for an example of the actual returns and fees investors were charged over the past year.

This example only applies to the Fund. If you are considering investing in other funds this example may not be representative of the actual fees you may be charged.

The fees can be changed

The Manager's fee and the Supervisor's fee may change by agreement between the Supervisor and the Manager. The Manager must publish a fund update for the Fund showing the fees actually charged during the most recent year. Fund updates, including past fund updates, are available at www.disclose-register.companiesoffice.govt.nz.

6. WHAT TAXES WILL YOU PAY?

The Fund is a portfolio investment entity. The amount of tax you pay is based on your prescribed investor rate (PIR). To determine your PIR, go to www.ird.govt.nz/roles/portfolio-investment-entities/find-my-prescribed-investor-rate. If you are unsure of your PIR, we recommend you seek professional advice or contact the Inland Revenue Department. It is your responsibility to tell the Manager your PIR when you invest or if your PIR changes. If you do not tell the Manager, a default rate may be applied. If the rate applied to your PIE income is lower than your correct PIR, you will be required to pay any tax shortfall as part of the income tax year-end process. If the rate applied to your PIE income is higher than your PIR, any tax over-withheld will be used to reduce any income tax liability you may have for the tax year and any remaining amount will be refunded to you.

The definition in the Financial Markets Conduct Act 2013 (section 9) is broad and includes a wide range of collective investment schemes. Risk – means the chance that an investor won't get the return they expected, or that they might lose some or all of the money invested. All investments have different levels of risk. This PDS gives an overview of the types of risk associated with investing in the Fund (refer to page 6).

SIPO – means a Statement of Investment Policy and Objectives and documents how a fund manager will invest the assets of a managed fund, and provides important information about policies related to investments.
