Background & Description of the Octagon Investment Funds

The Octagon Investment Funds is a managed investment scheme (Scheme) registered under the Financial Markets Conduct Act 2013. The Octagon Investment Funds provides investors with access to a range of single asset class funds and multi-asset class funds (together, the funds).

Forsyth Barr Investment Management Limited (Manager) is the manager of the Octagon Investment Funds and must ensure that there is a Statement of Investment Policy and Objectives (SIPO) that adequately describes the investment policies and objectives of the Octagon Investment Funds. The SIPO must include, amongst other matters:

- the nature or types of investments that can be made and any limits on those;
- any limits on the proportion of each type of asset invested in; and
- the methodology used for developing and amending the investment strategy, and for measuring performance against the objectives of the funds.

The investment policies described in this SIPO are set out in more detail in investment policy and procedures documents maintained by the Manager.

Objective

The purpose of this SIPO is to set out the investment policy and objectives of the Octagon Investment Funds.

Responsibilities

Decision Making Framework

The Manager's decision making framework is illustrated in the table set out below:

	<i>Plan</i>		<i>Implement</i>		
	<i>SIPO</i>	<i>Investment policies</i>	<i>Management</i>	<i>Trade</i>	<i>Control</i>
Board	Decides	Decides	Oversees		Monitors management performance and compliance.
Compliance Committee			Oversees		Reviews compliance incidents and reports, and reports to the Board.
Funds Management Oversight Committee			Oversees		Monitors investment performance and reports to the Board.
Investment Manager	Recommends	Recommends	Decides	Decides	Undertakes investment management and other associated activities and monitors

<i>Plan</i>		<i>Implement</i>		
<i>SIPO</i>	<i>Investment policies</i>	<i>Management</i>	<i>Trade</i>	<i>Control</i>
				investment performance and SIPO compliance.
Administration manager				Arranges independent calculation of investment performance.
Supervisor		Supervises		Oversees management and administration.
Custodian			Settles transactions	Holds the assets on behalf of investors.

Manager’s Board

The board of directors of the manager (Board) is responsible for:

- reviewing and approving this SIPO and any changes to it;
- reviewing and approving the investment policies and objectives of each fund and any changes to them;
- monitoring management’s overall performance in relation to the funds;
- monitoring compliance with this SIPO and the investment policies of each fund; and
- approving the appointment or termination of any external administration manager, any external investment manager, and any other outsource providers to the Manager.

Compliance Committee

The Compliance Committee is responsible for reviewing incidents and reports in relation to compliance with this SIPO, and reporting to the Board.

Funds Management Oversight Committee

The Funds Management Oversight Committee is responsible for:

- monitoring investment performance of each fund;
- monitoring Forsyth Barr Limited’s performance as delegated provider of the administrative functions in respect of the Octagon Investment Funds;
- monitoring the performance of the Investment Manager, any external investment manager, the supervisor, the custodian and any other outsource providers to the Manager; and
- reporting on the above items to the Board.

Managing Director

The Managing Director of the Manager is responsible for ensuring that the decisions of the Board are implemented.

Investment Manager

The Manager has appointed Octagon Asset Management Limited as the Investment Manager to perform the day-to-day investment management of the Scheme.

The Investment Manager’s responsibilities in particular include:

- making recommendations to the Board in respect of changes to this SIPO;

- making recommendations to the Board in respect of changes to the investment policies of a fund;
- monitoring the Scheme's investment performance;
- monitoring the Scheme's compliance with this SIPO and the investment policies; and
- reporting to the Funds Management Oversight Committee as required.

Investment Product Manager

The Investment Product Manager is responsible for co-ordinating review of this SIPO as described in this SIPO.

Administration Manager

Forsyth Barr Limited has been appointed as an administration manager and provides (or may delegate to an external service provider) asset valuation, unit pricing and financial accounting.

Supervisor

The supervisor is responsible for, amongst other things:

- supervising the Manager's performance of its functions; and
- monitoring the Manager's and the Octagon Investment Funds' financial position to assess whether they are adequate.

The name and contact details for the supervisor are set out in the Octagon Investment Funds' Product Disclosure Statement (PDS).

Custodian

Any custodian is appointed by the supervisor and is independent of the Manager and, as a delegate of the supervisor, holds the Octagon Investment Funds' assets on behalf of investors.

The name and contact details for any custodian are set out in the Octagon Investment Funds' PDS

Fund Management

The Octagon Investment Funds offers investors the option to invest in the following actively managed funds from our range of single asset class funds and multi-asset class funds. The multi-asset class funds

generally have an exposure to a greater number of asset classes when compared to the single asset class funds.

Single Asset Class Funds

The following funds are single asset class funds

- Australian Equities Fund
- Global Equities Fund
- Listed Property Fund
- New Zealand Equities Fund
- New Zealand Fixed Interest Fund

Multi-Asset class funds

The following funds are multi-asset class funds

- Income Fund
- Balanced Fund
- Growth Fund

Investment Philosophy

The Manager believes that there are opportunities in financial markets for active managers to exploit and that an actively managed portfolio of investments will over time provide better returns than a simple buy-and-hold strategy; accordingly, the Manager has appointed an active Investment Manager.

Permitted Investments

In addition to each of the funds' specific permitted investments, each of the funds may gain investment exposure by investing directly, or indirectly into an underlying managed investment scheme (which may also be managed by the Manager).

The Investment Manager, may also, after consultation with the supervisor of the funds, invest in other assets that the Investment Manager considers appropriately reflect the risk profile of the funds and will contribute to the performance objectives of the funds.

Foreign Currency Hedging

Hedging involves making an investment or entering into an agreement with the intention of reducing the impact of adverse price movements in a financial obligation.

The Investment Manager actively manages the fund's foreign currency exposure associated with international and Australian equities, and listed property; and generally hedges the foreign currency exposure associated with international fixed interest. This is achieved through foreign currency hedging. The funds' foreign currency hedging strategy is established by the Board and implemented by the Investment Manager. The Board and the Funds Management Oversight Committee monitor the Investment Manager's compliance with the strategy.

Where the Investment Manager invests into an underlying managed investment scheme to achieve the intended investment exposures, foreign currency hedging may be undertaken by the manager of that underlying scheme.

Risk Indicator

The funds' risk indicators are a historic measure of the volatility of the funds' returns, calculated as the annualised standard deviation of returns over the last five years. The most recently published risk indicator for the funds are available in the most recent Fund Update published for the funds (prior to December 2021 see the Fund Updates for the Forsyth Barr Investment Funds)

Tactical Asset Allocation

Tactical asset allocation involves varying the actual asset allocation away from the target asset allocation, to take advantage of short-term market conditions.

The funds do not undertake tactical asset allocation outside of target asset allocation permitted ranges.

Rebalancing

Rebalancing involves buying and selling assets so that the fund's actual asset allocation matches its target asset allocation.

The single asset class funds are generally close to fully invested in the relevant asset class, which means that they do not have to undertake rebalancing.

The multi-asset class funds may undertake rebalancing so that actual asset allocation matches desired asset allocation. Any rebalancing is at the discretion of the Investment Manager.

Investments in underlying managed investment schemes

Where the funds invest in underlying managed investment schemes, the Investment Manager will aggregate its interests in the investment scheme's underlying investments (where practicable and as made available by any external investment manager) with its own investments for the purposes of assessing compliance with the funds' target asset allocation ranges, and other limits and restrictions. Derivatives may be used by the manager of an underlying managed investment scheme.

Derivatives

The funds may use derivatives where the Investment Manager considers doing so is consistent with the funds' risk profile and will contribute to the performance objectives of the funds. Derivatives may be used by the manager of an underlying investment scheme.

Borrowing

The funds may only borrow to facilitate investor-initiated activity and for the payment of fund expenses.

Compliance with limits and restrictions

If the funds move outside a target asset allocation range or cease to comply with any other limit or restriction, there is no breach of that limit or restriction if the fund returns to compliance within 7 business days.

Australian Equities Fund

Description of the Fund

The Fund is a single asset class fund.

Investment Objective

The Fund's investment objective is to achieve positive long-term returns after fees, taxes and other expenses by investing mostly in selected Australian equities, and in New Zealand listed shares where the company has meaningful operations in Australia, subject to the higher risks associated with investments in international equity markets.

Benchmark

The Fund has no benchmark, however for comparative purposes only, fund performance may be considered in relation to the S&P/ASX 200 Accumulation Index, 50% hedged to the New Zealand dollar.

Investment Strategy

Target Asset Allocation

The Fund's target asset allocation and target asset allocation ranges are set out in the table below:

<i>Asset Class</i>	<i>Target</i>	<i>Range</i>
Cash and cash equivalents	5%	0% – 20%
New Zealand fixed interest	-	-
International fixed interest	-	-
Australasian equities	85%	80% – 100%
International equities	-	0% - 20%
Listed property	10%	0% - 20%
Unlisted property	-	-
Commodities	-	-
Other	-	-

¹ Where a financial product is listed on both the ASX and a non-Australian stock exchange the Fund may transact on either exchange.

Permitted Investments

The Fund may invest in:

- financial products listed on the ASX¹ and unlisted financial products the Investment Manager expects to be listed on the ASX within 12 months of purchase; and
- financial products listed on the NZX and unlisted financial products the Investment Manager expects to be listed on the NZX within 12 months of purchase; and
- cash in deposits with registered banks.

Investment Restrictions

The following investment restrictions apply to the Fund:

- investment in any one entity or financial product may not be more than 25% of the value of the Fund's assets;
- investments in unlisted financial products the Investment Manager expects to be listed on the ASX and NZX within 12 months of purchase may not in aggregate be more than 10% of the value of the Fund's assets.

Global Equities Fund

Description of the Fund

The Global Equities Fund is a single asset class fund.

Investment Objective

The Fund's investment objective is to achieve positive long-term returns after fees, taxes and other expenses by investing in selected international equities, subject to the higher risks associated with investments in international equity markets.

Benchmark

The Fund has no benchmark, however for comparative purposes only, fund performance may be considered in relation to the MSCI ACWI Net Total Return Index, 50% hedged to the New Zealand dollar.

Investment Strategy

Target Asset Allocation

The Fund's target asset allocation and target asset allocation ranges are set out in the table below:

<i>Asset Class</i>	<i>Target</i>	<i>Range</i>
Cash and cash equivalents	10%	0% - 20%
New Zealand fixed interest	-	-
International fixed interest	-	-
Australasian equities	-	0% - 20%
International equities	90%	80% - 100%
Listed property	-	0% - 10%
Unlisted property	-	-
Commodities	-	-
Other	-	-

Permitted Investments

The Fund may invest in:

- financial products listed on recognised international securities exchanges and unlisted financial products the Investment Manager expects to be listed on one or more recognised international securities exchanges within 12 months of purchase; and
- cash in deposits with registered banks.

Investment Restrictions

The following investment restrictions apply to the Fund:

- investment in any one entity or financial product may not be more than 25% of the value of the Fund's assets; and
- investments in unlisted financial products the Investment Manager expects to be listed on one or more recognised international securities exchanges within 12 months of purchase may not in aggregate be more than 10% of the value of the Fund's assets.

Listed Property Fund

Description of the Fund

The Listed Property Fund is a single asset class fund.

Investment Objective

The Fund's investment objective is to achieve positive long-term returns after fees, taxes and other expenses by investing in selected listed property vehicles, subject to the higher risks associated with investments in listed property investments.

Benchmark

The Fund has no benchmark, however for comparative purposes only, fund performance may be considered in relation to the S&P/NZX All Real Estate Gross with Imputation Index.

Investment Strategy

Target Asset Allocation

The Fund's target asset allocation and target asset allocation ranges are set out in the table below:

<i>Asset Class</i>	<i>Target</i>	<i>Range</i>
Cash and cash equivalents	5%	0% - 20%
New Zealand fixed interest	-	-
International fixed interest	-	-
Australasian equities	20%	0% - 30%
International equities	5%	0% - 10%
Listed property	70%	55% - 100%
Unlisted property	-	-
Commodities	-	-
Other	-	-

Permitted Investments

The Fund may invest in:

- financial products listed on the NZX, ASX or other recognised international securities exchange issued by entities whose principal business is, in the opinion of the Investment Manager, owning or managing property or property-like assets;
- unlisted financial products, issued by entities whose principal business is, in the opinion of the Investment Manager, owning or managing property or property-like assets, that the Investment Manager expects to be listed on the NZX, ASX, or other recognised international securities exchange within 12 months of purchase; and
- cash in deposits with registered banks.

Investment Restrictions

The following investment restrictions apply to the Fund:

- investment in any one entity or financial product may not be more than 25% of the value of the Fund's assets.
- investments in unlisted financial products the Investment Manager expects to be listed on the NZX, ASX or other recognised international securities exchange within 12 months of purchase may not in aggregate be more than 10% of the value of the Fund's assets.

New Zealand Equities Fund**Description of the Fund**

The Fund is a single asset class fund.

Investment Objective

The Fund's investment objective is to achieve positive long-term returns after fees, taxes and other expenses by investing mostly in selected New Zealand equities, and in Australian listed shares where the company has meaningful operations in New Zealand, subject to the higher risks associated with investments in equity markets.

Benchmark

The Fund has no benchmark, however for comparative purposes only, fund performance may be considered in relation to the S&P/NZX50 Gross with Imputation Index.

Investment Strategy**Target Asset Allocation**

The Fund's target asset allocation and target asset allocation ranges are set out in the table below:

Asset Class	Target	Range
Cash and cash equivalents	5%	0% - 20%
New Zealand fixed interest	-	-
International fixed interest	-	-
Australasian equities	85%	80% - 100%
International equities	-	-
Listed property	10%	0% - 20%
Unlisted property	-	-
Commodities	-	-
Other	-	-

Permitted Investments

The Fund may invest in:

- financial products listed on the NZX² and unlisted financial products the Investment Manager expects to be listed on the NZX within 12 months of purchase; and
- financial products listed on the ASX and unlisted financial products the Investment Manager expects to be listed on the ASX within 12 months of purchase; and
- cash in deposits with registered banks.

Investment Restrictions

The following investment restrictions apply to the Fund:

- investment in any one entity or financial product may not be more than 25% of the value of the Fund's assets; and
- investments in unlisted financial products the Investment Manager expects to be listed on the NZX and ASX within 12 months of purchase may not in aggregate be more than 10% of the value of the Fund's assets.

New Zealand Fixed Interest Fund

Description of the Fund

The Fund is a single asset class fund.

Investment Objective

The Fund's investment objective is to achieve positive long-term returns after fees, taxes and other expenses by investing in selected New Zealand debt and debt-like securities, subject to the risks associated with investments in debt markets.

Benchmark

The Fund has no benchmark, however for comparative purposes only, fund performance may be considered in relation to the S&P/NZX Investment Grade Corporate Bond Index.

Investment Strategy

Target Asset Allocation

The Fund's target asset allocation and target asset allocation ranges are set out in the table below:

Asset Class	Target	Range
Cash and cash equivalents	5%	0% – 15%
New Zealand fixed interest	95%	0% – 100%
International fixed interest	0%	0% – 100%
Australasian equities	-	-
International equities	-	-
Listed property	-	-
Unlisted property	-	-
Commodities	-	-
Other	-	-

² Where a financial product is listed on both the NZX and a non-New Zealand stock exchange the Fund may transact on either exchange.

Permitted Investments

The Fund may, subject to the ranges below, invest in:

Investment	Range
Cash and cash equivalents	0% – 15%
New Zealand Government debt securities	0% – 100%
Overseas Government or supranational debt securities	0% – 50%
New Zealand Local Government Funding Agency debt securities	0% – 50%
State-owned enterprise and local authority debt securities	0% – 50%
Senior or unsubordinated debt securities issued by entities (other than the above)	0% – 100%
Subordinated debt securities, preference shares, convertible notes, reset securities and other forms of hybrid debt/equity securities issued by entities (other than the above)	0% – 30%
All investments must be New Zealand dollar denominated.	

Investment Restrictions

The Fund's investment in any one entity (other than the New Zealand Government) or financial product (other than a financial product issued by the New Zealand Government) may not be more than 25% of the value of the Fund's assets.

Income Fund

Description of the fund

The Fund is a multi- asset class fund.

Investment Objective

The Fund's investment objective is to pay distributions, while maintaining its capital value over the long-term, after fees, taxes and other expenses by investing in selected New Zealand and international equities, listed property and New Zealand and international debt and debt -like securities, subject to the risks associated with investments in equity and debt markets.

Benchmark

The Fund has no benchmark, however for comparative purposes only, the Fund's performance may be considered in relation to the following market indices.

(1) The S&P/NZX Bank Bills 90-Day Index, which generally reflects 3-month bank term deposit rates of domestic major banks; and,

(2) A composite market index where a weighted-average return is calculated; we multiply the relevant market index return by the target asset allocation of the Fund

As the Fund's investments typically have greater risk than term deposits in general, the Fund's market index is calculated using a composite index as described above, under the description of the Benchmark using option (2).

Investment Strategy

Target Asset Allocation

The Fund's target asset allocation and target asset allocation ranges are set out in the table below:

	Target	Range
Cash and cash equivalents	5%	0% - 50%
New Zealand fixed interest	20%	0% - 50%
International fixed interest	20%	0% - 50%
Australasian equities	40%	0% - 70%
International equities	0%	0% - 20%
Listed property	15%	0% - 50%
Unlisted property	-	-
Commodities	-	-
Other	-	0% - 10%

Permitted Investments

The Fund may invest into any financial product that would be a permitted investment for any of the single asset class funds. Where there is no equivalent single asset class fund, permitted investments are detailed in the Schedule.

Investment Restrictions

The investment restrictions applicable to each of the single asset class funds apply to the relevant asset classes that the Fund is permitted to invest in to. Where there is no equivalent single asset class fund, investment restrictions are detailed in the Schedule. On-call investments held in the Fund's transactional bank account of up to an aggregate value of \$2 million are not subject to any investment restrictions.

Balanced Fund

Description of the fund

The Fund is a multi- asset class fund.

Investment Objective

The Fund's investment objective is to achieve positive long-term returns after fees, taxes and other expenses by investing in selected New Zealand and international equities, listed property and New Zealand and international debt and debt-like securities, subject to the risks associated with investments in equity and debt markets.

Benchmark

The Balanced Fund has no benchmark, however for comparative purposes only, the Fund's performance may be considered in relation to a composite index where a weighted- average return is calculated; we multiply the relevant market index return by the target asset allocation of the Fund.

Investment Strategy

Target Asset Allocation

The Fund's target asset allocation and target asset allocation ranges are set out in the table below:

	Target	Range
Cash and cash equivalents	10%	0% - 50%
New Zealand fixed interest	22%	0% - 50%
International fixed interest	11%	0% - 50%
Australasian equities	30%	0% - 70%
International equities	20%	0% - 50%
Listed property	7%	0% - 50%
Unlisted property	-	-
Commodities	-	-
Other	-	0% - 10%

Permitted Investments

The Fund may invest into any financial product that would be a permitted investment for any of the single asset class funds. Where there is no equivalent single asset class fund, permitted investments are detailed in the Schedule.

Investment Restrictions

The investment restrictions applicable to each of the single asset class funds apply to the relevant asset classes that the Fund is permitted to invest in to. Where there is no equivalent single asset class fund, investment restrictions are detailed in the Schedule.

On-call investments held in the Fund's transactional bank account of up to an aggregate value of \$2 million are not subject to any investment restrictions.

Growth Fund**Description of the fund**

The Fund is a multi- asset class fund.

Investment Objective

The Fund's investment objective is to achieve positive long-term returns after fees, taxes and other expenses by investing in selected New Zealand and international equities, listed property and New Zealand and international debt and debt-like securities, subject to the risks associated with investments in equity and debt markets.

Benchmark

The Fund has no benchmark, however for comparative purposes only, the Fund's performance may be considered in relation to a composite index where a weighted average- return is calculated; we multiply the relevant market index return by the target asset allocation of the Fund.

Investment Strategy**Target Asset Allocation**

The Fund's target asset allocation and target asset allocation ranges are set out in the table below:

	Target	Range
Cash and cash equivalents	5%	0% - 50%
New Zealand fixed interest	12%	0% - 50%
International fixed interest	6%	0% - 50%
Australasian equities	37%	0% - 70%
International equities	30%	0% -50%

Listed property	10%	0% - 50%
Unlisted property	-	-
Commodities	-	-
Other	-	0% -10%

Permitted Investments

The Fund may invest into any financial product that would be a permitted investment for any of the single asset class funds. Where there is no equivalent single asset class fund, permitted investments are detailed in the Schedule.

Investment Restrictions

The investment restrictions applicable to each of the single asset class funds apply to the relevant asset classes that the Fund is permitted to invest in to. Where there is no equivalent single asset class fund, investment restrictions are detailed in the Schedule.

On-call investments held in the Fund's transactional bank account of up to an aggregate value of \$2 million are not subject to any investment restrictions.

Appointment of External Investment Managers

The Manager may decide to appoint selected external investment managers. The due diligence process to consider the appointment or removal of any external investment manager is undertaken by the Investment Manager. When reporting to the Board, Investment Manager will consider a number of quantitative and qualitative factors.

Appointed external investment manager performance is included in the monitoring of Investment Performance and Compliance, as detailed in elsewhere in this SIPO.

Only the Board has the authority to appoint or remove an external investment manager.

Limit Breaks

A limit break is a material breach of a limit set out in this SIPO. It can relate to either the nature or type of investments that may be made by a fund, or the proportion of each type of asset that may be invested in by a fund.

Materiality and Limit Breaks

In deciding whether a breach is material, the Manager will assess the circumstances of the breach in the context of the Octagon Investment Funds and the relevant fund, and take into account the following factors:

- the size of the breach in relation to the Octagon Investment Funds and the relevant fund;
 - any losses caused to investors;
 - whether the breach involves related-party transactions;
 - whether the breach is an isolated incident, or part of a recurring pattern of breaches;
 - whether the breach causes the PDS or any register entry on Disclose in respect of the Octagon Investment Funds or a fund, or an advertisement relating to the Octagon Investment Funds or a fund, to be false or misleading;
 - how quickly the breach is rectified after the Manager became aware of the breach; and
 - how long the breach went on for.
- the nature and cause of the limit break (the type of limit break);
 - the net asset value of the scheme property in the Octagon Investment Funds as a whole and in respect of the fund within the Octagon Investment Funds to which the limit break relates (as at the date the limit break first occurred);
 - the reasons why the limit break is material;
 - the date on which the limit break first occurred and the period for which the limit break continued before it was corrected (or whether the limit break remains uncorrected at the time of the report);
 - the steps taken, or to be taken, by the Manager to correct the limit break;
 - what steps (if any) have been taken, or will be taken, to minimise risk of a recurrence of this type of limit break or to ensure early notification and correction of limit breaks of this type; and
 - the timeframe within which the Manager intends to take any steps not already taken under the preceding bullet points.

Immediate Reporting

Where the Manager becomes aware of a limit break, the Manager must report the limit break to the supervisor, if the limit break is not corrected within five working days of the Manager becoming aware of the limit break.

Quarterly Reporting

In accordance with the requirements of the Financial Markets Conduct Act 2013, the Manager must provide a report detailing all limit breaks to the supervisor each quarter.

The quarterly report must be provided within 10 working days after the expiry of each quarter.

Content of limit break reports

The content of any limit break reports, where possible, will detail the following:

- the date the Manager became aware of the limit break;
- the name of the fund within the Octagon Investment Funds to which the limit break relates;

Responsible Investment

Responsible investment, including environmental, social and governance considerations, is taken into account in the investment policies and procedures of the funds as follows:

- Before the Investment Manager makes a direct investment for a fund, it will assess whether, in its opinion, the relevant entity is directly engaged in any of the following activities:

the manufacture of cluster munitions
the manufacture or testing of nuclear explosive devices
the manufacture of anti-personnel mines
the manufacture of tobacco products
the processing of whale meat

If the assessment is that the entity is directly engaged in any of those activities, then no investment is made.

The Investment Manager will make its assessment based on the framework made available by the NZ Super Fund (see www.nzsuperfund.co.nz/how-we-invest/responsible-investment). The Investment

Manager will ensure that none of the funds direct investments are on the NZ Super Fund's exclusion list because of engagement in any of those activities at the time of purchase.

- If the Investment Manager makes a direct investment and subsequently forms the view that the relevant entity is directly engaged in any of the activities listed above, the investment will be sold in a reasonable timeframe. The Investment Manager will check the funds' direct investments against the most recently published NZ Super Fund exclusion list at least monthly.
- Before a fund invests into an underlying managed investment scheme that we don't manage, the Investment Manager will consider the responsible investment framework for that scheme. The Investment Manager will seek to invest in underlying schemes with responsible investment frameworks comparable to the Octagon Investment Funds, where it can do that without compromising the funds' other investment objectives. At the end of each quarter, the Investment Manager will make available on the funds' website a list of any of the underlying scheme's direct investments (as are available to the Investment Manager) where it considers that the relevant entity is directly engaged in any of the activities above (based on the NZ Super Fund's exclusion list at that time).
- If a fund invests into an underlying managed investment scheme that we manage, the Investment Manager will follow the process above for the fund's direct investments and investments into underlying managed investment schemes.

Monitoring

Investment Performance

The Investment Manager monitors investment performance daily by reviewing each fund's unit price, which will reflect any significant changes in the value of individual assets held by the fund.

Investment performance is formally calculated (using information provided by an external administration manager) and reported on at the end of each month. The reports set out investment performance on a monthly, quarterly, one year, two year, three year and since inception basis, and include gross and net absolute returns. The reports compare performance against appropriate performance benchmarks for

comparative purposes only. Also included in monthly reports is each fund's Risk Indicator.

The investment performance reports are provided to the Board, the Funds Management Oversight Committee and the supervisor.

The Funds Management Oversight Committee and the Board each meet at least every two months to, amongst other things, consider the Forsyth Barr Investment Funds' investment performance.

Compliance

The Investment Manager monitors compliance with this SIPO by reviewing daily reports setting out compliance (or non-compliance) for the previous day with:

- target asset allocation ranges;
- permitted investments; and
- investment restrictions.

If the Investment Manager has breached this SIPO, the Funds management Oversight Committee, the Board and the members of the Compliance Committee are notified by email.

As part of its Compliance Assurance Programme Forsyth Barr's Compliance Team provides assurance that this monitoring is working as intended and is effective.

The Compliance Committee meets every month to, amongst other things, consider the Octagon Investment Funds' compliance with this SIPO, and compliance monitoring reports from the Compliance Team.

The Board meets at least every two months to, amongst other things, consider the Octagon Investment Funds' compliance with this SIPO.

Risk Management

Counterparty Risk Management

Meaning of Counterparty Risk

Counterparty risk is the risk that a party to a contract defaults or is otherwise unable to fulfil its obligations. If this occurs, the full amount invested may be lost or the affected fund may otherwise be negatively affected.

Management of Counterparty Risk

The Investment Manager will manage counterparty risk by restricting exchange-traded derivative transactions to counterparties that use payment and security delivery platforms approved by the Manager. The Investment Manager also restricts over-the-counter derivative transactions to counterparties that have executed satisfactory legal documentation and a Standard & Poor's credit rating of A or better.

The Investment Manager will also manage counterparty risk by assessing a counterparty's effectiveness, cost efficiency, execution quality and other business practices and conduct prior to the Manager appointing the counterparty to the list of authorised counterparties that the Investment Manager may trade with, and by setting limits on direct exposure to counterparties.

The Investment Manager will monitor a counterparty's effectiveness on an ongoing basis, and formally review its appointment annually as part of its reporting to the Manager.

Where the Manager appoints an external investment manager, the Investment Manager will assess the external investment manager's counterparty risk management policy and procedures as part of its due diligence process.

Currency Risk Management**Meaning of Currency Risk**

Currency risk is the risk that movements in foreign exchange rates impact the New Zealand dollar value of offshore investments, meaning that returns from offshore investments could be reduced if the New Zealand dollar strengthens against the currency in which an investment is denominated. This will affect all funds with foreign currency assets.

Use of Foreign Exchange Hedging

The Investment Manager will manage currency risk by using foreign exchange hedging, which may include foreign currency transactions executed in the spot, forward or over-the-counter options market and investments in vehicles offered by external investment managers that incorporate foreign exchange hedging.

Foreign exchange hedging may only be used where such use is consistent with the investment strategy for the fund set out in this SIPO. In particular, foreign exchange hedging may only be used for a

purpose, and in compliance with the restrictions, set out in this SIPO.

The following foreign currency hedging strategy has been established by the Board and is currently implemented by the Investment Manager. This may change, as determined by the Board.

Asset Class	Market Index	Foreign currency hedging range
Australian equities	S&P/ASX 200 Accumulation Index, 50% hedged to the New Zealand dollar.	20% to 80% of the fund's foreign currency exposure to Australian equities (which may include listed property and international equities).
International equities	MSCI ACWI Net Total Return Index, 50% hedged to the New Zealand dollar	20% to 80% of the fund's foreign currency exposure to international equities. (which may include Australian equities and listed property)
Listed property	S&P/NZX All Real Estate Gross with Imputation Index.	20% to 80% of the fund's foreign currency exposure to listed property (which may include Australian equities).
International fixed interest	Bloomberg Global Aggregate Total Return Index, 100% hedged to the New Zealand dollar.	Generally hedged.

Where the Manager appoints an external investment manager, the Investment Manager will assess the external investment manager's currency risk management policy and procedures as part of its due diligence process.

Liquidity Risk Management

Meaning of Liquidity Risk

Liquidity risk is the risk that an investment cannot be sold at the required time, due to a lack of a liquid market for that security. This may result in the investment being worth less than its fair value, the return from the investment being less than expected, or affected funds being unable to process withdrawals.

Management of Liquidity Risk

The Investment Manager will manage liquidity risk by continuously monitoring forecast and actual cash flows, and maintaining sufficient cash holdings to meet potential payment obligations that may arise at short notice. In addition, the Investment Manager will take reasonable steps to ensure that investments made directly by the Investment Manager are able to be partly or fully liquidated within five business days.

Where the Manager appoints an external investment manager, the Investment Manager will assess the external investment manager's liquidity risk policy and procedures as part of its due diligence process.

Market Risk Management

Meaning of Market Risk

Market risk is the risk of the value of a fund's investments being affected by developments in economies and financial markets (such as changes in market sentiment, inflation, interest rates and employment), and regulatory and political conditions. This could result in reduced returns or capital being lost.

Management of Market Risk

The Investment Manager will manage market risk by only making investments that are consistent with the investment strategy for the fund set out in this SIPO. In particular, the Investment Manager will only make an investment for a purpose, and in compliance with the restrictions, set out in this SIPO.

This SIPO will:

- adopt a target asset allocation for each fund consistent with the fund's investment objective; and

- avoid concentration of risk by ensuring adequate diversification between and within investment sectors.

The Investment Manager will ensure that key staff employed by the Investment Manager will have sufficient relevant skills, experience and training to meet the Manager's professional standard of care.

The Investment Manager will regularly stress test its investment strategies and report the results to the Manager, who will discuss with the supervisor.

Where the Manager appoints an external investment manager, the Investment Manager will assess the external investment manager's market risk management policy and procedures as part of its due diligence process.

Operational Risk Management

Meaning of Operational Risk

Operational risk is the risk of loss resulting from inadequate or failed internal processes, people and systems, or from external events.

Management of Operational Risk

The Manager will:

- maintain an operational risk framework which covers risk and control assessment, policy and compliance management, incident management (including breach reporting), governance and risk reporting;
- appoint a custodian to separate the investment function and activities (undertaken by the Manager and the Investment Manager) from the transaction settlement, safekeeping, recording and reporting functions (undertaken by the custodian);
- maintain a business continuity plan; and
- maintain a fraud minimisation plan.

The Manager's and outsource providers' compliance with internal controls and processes will be monitored through a self-assessment process, and the results of the assessment will be reported to the Compliance Committee.

Where the Manager appoints an external investment manager, the Investment Manager will assess the external investment manager's operational risk management policy and procedures as part of its due diligence process.

Trade Execution and Trade Allocation

Execution of Trades

When determining the priority of execution of trades, the Investment Manager will act in the best interests of investors in the Octagon Investment Funds, taking into account the following factors:

- price, including transaction costs;
- speed of execution;
- the counterparty's status and reputation;
- size and nature of the order; and
- any other relevant considerations.

Where the Manager appoints an external investment manager, the Investment Manager will assess the external investment manager's trade execution policy and procedures as part of its due diligence process.

Allocation of Trades

When allocating trades, the Investment Manager will act in the best interests of investors in the Octagon Investment Funds, applying the following principles:

- all proposed trades must be pre-allocated;
- actual allocation must follow the pre-trade allocation;
- in the unlikely event that a trade is not fully allocated, actual allocation must follow a pro-rata based on the pre-trade allocation; and
- no fund will receive preferential allocation treatment over another.

Where the Manager appoints an external investment manager, the Investment Manager will assess the external investment manager's trade allocation policy and procedures as part of its due diligence process.

Voting

The Investment Manager will exercise its voting power in relation to any of the Octagon Investment Fund's assets when the Investment Manager considers that it is in the best interests of investors in the Octagon Investment Funds to do so.

Decisions as to whether and how to vote will be made on a case by case basis.

Where the Manager appoints an external investment manager, the Investment Manager will assess the external investment manager's voting policy and procedures as part of its due diligence process.

Review

The Investment Product Manager will co-ordinate review of this SIPO annually in consultation with the Investment Manager.

The Investment Manager will instruct the Investment Product Manager to undertake an ad hoc review of this SIPO if changes in market conditions necessitate changes to either:

- the nature or type of investments that can be made and any limits on those; or
- any limits on the proportion of each type of asset invested in.

The Investment Product Manager will report to the Board as to the outcome of his/her review, together with any proposed changes to this SIPO.

The Board will consider report and may approve the changes to this SIPO.

If any changes are made to this SIPO then notice will be given to the supervisor and the Octagon Investment Fund's register entry will be updated accordingly.

The most current version of this SIPO is available on the Disclose Register for managed investment schemes under the Financial Markets Conduct Act 2013 at www.business.govt.nz/disclose.

Schedule

Permitted Investments and Investment Restrictions

That portion of the multi-asset class funds that is allocated to the asset class of cash and cash equivalents has the target asset allocation and target asset allocation ranges as set out in the table below:
