E. Investment Policies

Taxation

The Funds have each elected to be a Portfolio Investment Entity ('PIE') and therefore is taxed under the PIE regime.

The taxation implications of an investment method, such as holding assets directly or investing in a managed investment scheme, are taken into account when determining the most appropriate approach for the Funds. Note that taxation is not the sole consideration when choosing an investment method; other factors taken into account include cost and implementation feasibility.

Liquidity

The liquidity risk of the Funds are assessed with reference to liquidity of the assets and securities. The Manager then establishes an appropriate application and redemption frequency for each Fund. The Funds invest predominantly in liquid investments and hence has daily applications and redemptions. Market conditions can change, however, resulting in some assets becoming difficult to sell. Hence, if a Fund were to experience liquidity problems the Manager may defer or suspend redemptions for a period of time.

Related-party transactions

Related-party transactions, other than the types permitted under the FMC Act are prohibited.

The Funds may enter into transactions with related parties if permitted under section 174 of the FMC Act (and the manager certifies to this effect) or consented to by the Supervisor under section 173(2)(a). Examples of such transactions include:

- a Fund investing in an underlying fund managed by Franklin Templeton; or
- parties related to the Funds, including the staff and directors of Franklin Templeton and their families, and the staff of FundRock and their families from time to time investing in the Funds.

The Manager will report such transactions by related parties to its Supervisor in accordance with section 173(2) of the FMC Act.

Brandywine Global has a trade allocation policy covering accounts they manage.
