General

This Other Material Information Document (**Document**) has been prepared in accordance with the Financial Markets Conduct Act 2013 (**FMC Act**) and the Financial Markets Conduct Regulations 2014 (**FMC Regulations**).

Kernel Funds is a registered managed investment scheme (**Scheme**), Scheme number 12697. Kernel Wealth Limited (**Kernel**) is a licensed fund manager formed in 2018 and is the Manager of the Scheme.

In this Document the words "you" or "your" means a person who invests in the Scheme. "We", "us" or "our" refers to Kernel as the Manager of the Scheme.

1. Funds

Kernel offers 17 funds (each a Fund and together the Funds).

The Kernel High Growth Fund provides diversified exposure to growth assets, investing into a combination of other Kernel Funds. The Kernel Balanced Fund provides diversified exposure to both income and growth assets investing mainly in other Kernel Funds. Collectively the High Growth and Balanced funds are **Kernel Diversified Funds**.

The Kernel Cash Plus Fund invests in short-term Fixed Income instruments and other cash and cash equivalents designed to generate an investment return that reflects the return of the Bloomberg NZ Bond Bank Bill Index .

All other funds are equity index funds that primarily provide exposure to a single asset class designed to generate an investment return that reflects the return of the index being tracked by the relevant fund (**Kernel Equity Funds**).

| Fund | Establishment Date |
|---|--------------------|
| Product Disclosure Statement – Equity Funds | |
| NZ 20 | 19 August 2019 |
| NZ Commercial Property | 19 August 2019 |
| NZ Small & Mid Cap Opportunities | 19 August 2019 |
| Kernel Global Infrastructure | 3 July 2020 |
| Kernel S&P Global Dividend Aristocrats | 3 July 2020 |
| Kernel S&P Global 100 | 3 July 2020 |
| Kernel S&P Kensho Moonshots Innovation | 22 January 2021 |
| Kernel S&P Kensho Electric Vehicle Innovation | 22 January 2021 |
| NZ 50 ESG Tilted | 24 May 2021 |
| Kernel Global Green Property | 24 May 2021 |
| Kernel S&P Global Clean Energy | 24 May 2021 |
| Kernel S&P 500 Fund | 28 February 2022 |
| Kernel Global Infrastructure (NZD Hedged) | 4 July 2022 |
| Kernel S&P Global 100 (NZD Hedged) | 26 October 2022 |
| Product Disclosure Statement – Diversified and Other Funds | |
| Kernel High Growth Fund | 28 February 2022 |
| Kernel Balanced Fund | 26 October 2022 |
| Kernel Cash Plus Fund | 26 October 2022 |

Each Fund is governed by the Master Trust Deed dated 19 August 2019 and an Establishment Deed, and managed in accordance with the Statement of Investment Policy and Objectives (SIPO).

Each Fund is a separate and distinct investment fund, with separate assets and liabilities, under the Master Trust Deed. All investments of a Fund are to be held by or on behalf of the Supervisor as the exclusive property of that Fund, for the exclusive benefit of the investors of that Fund. No investor in one Fund will have any claim on any other Fund (and vice versa). This means that the assets of one Fund cannot be used to cover the liabilities of another Fund.

Two Product Disclosure Statements (PDS) have been prepared for investors and contain information on the Funds which must be read before we can accept an investor's application. One PDS contains information about the Kernel Equity Funds and the other PDS contains information about the Kernel Diversified Funds and the Kernel Cash Plus Fund. You can get a copy of the PDS, SIPO, Master Trust Deed, Establishment Deeds and other information about the Scheme and each Fund on the Disclose website (<https://disclose-register.companiesoffice.govt.nz>) or by contacting us.

2. Who is involved

The Manager

Kernel is a registered financial services provider, FSP 644609, incorporated under the Companies Act 1993 on 25 September 2018 (Company number 7050334).

We were granted a licence to act as manager of a registered scheme under the FMC Act on 19 August 2019. The licence is subject to standard licence conditions under the FMC Act and the FMC Regulations that apply to all managers of managed investment schemes. More information can be obtained at <https://fsp-register.companiesoffice.govt.nz>.

As Manager we are responsible for:

- offering and issuing Units in each Fund in the Scheme
- managing the Funds and their investments in accordance with the SIPO
- administering each Fund.

The Supervisor

The independent supervisor for the Scheme is Trustees Executors Limited (**Supervisor**), who supervises the Scheme.

The Supervisor is responsible for the following functions:

- supervising the performance of our functions as Manager and our issuer obligations, including compliance with the Master Trust Deed and each Establishment Deed
- supervising the financial position of us as Manager and the Funds to ascertain their adequacy
- acting on behalf of investors in relation to us as Manager, any matter connected to the Master Trust Deed, Establishment Deed or the terms of offer of the Units, any contravention or alleged contravention of our obligations as the issuers of the Units and Manager of the Funds, and any contravention or alleged contravention of the FMC Act by any other person in connection with the Funds
- reporting to FMA any contravention, or likely contravention, of a manager or issuer obligation
- holding the property of the Funds, or ensuring that it is held, in accordance with the FMC Act
- performing or exercising any other functions, powers, and duties conferred or

imposed on the Supervisor by or under the FMC Act, the Financial Markets Supervisors Act 2011 or the Master Trust Deed or an Establishment Deed.

The Supervisor has been granted a licence under the Financial Market Supervisors Act 2011 to act as a supervisor of a managed investment scheme. More information, including the conditions of the licence, can be obtained at <https://fsp-register.companiesoffice.govt.nz>.

The current names of the Supervisor's directors and their addresses may be obtained from the Companies Office website <https://companies-register.companiesoffice.govt.nz> or by phoning the Supervisor on 0800 878 783. The directors and their addresses may change from time to time without notice to you.

The Custodian

The Supervisor holds the assets of the Scheme or can appoint an independent third-party custodian. The Supervisor has appointed Adminis NZ Limited (**Custodian**) as the custodian for the Scheme.

As required by the FMC Act, the Supervisor and the Custodian are independent of us.

The Administration Manager

We have entered into a service agreement with Adminis NZ Limited (**Administration Manager**). The Administration Manager provides a range of administrative services in respect of the Funds including:

- Unit pricing
- Investor record keeping and registry
- Fund accounting
- Valuation services

Indemnities

Subject to the limits on indemnities under the FMC Act, both we and the Supervisor are indemnified out of the Funds for all losses, costs and expenses incurred by us or the Supervisor in relation to the proper performance of our general duties in respect of the Funds and this offer.

This indemnity will take priority over the claims of any investors and extends to the costs of any litigation or other proceedings in which liability is determined. Any recoveries for matters relating to more than one Fund will be apportioned across the Funds in accordance with the Master Trust Deed.

However, neither we nor the Supervisor are entitled to be indemnified out of the assets of a Fund in respect of any liability arising out of wilful default or wilful breach of trust, or where either of us fails to properly perform certain duties set out in the FMC Act and Master Trust Deed (including the duty to exercise the degree of care and diligence required by the FMC Act and Master Trust Deed).

3. Fees and expenses

The current fee structure for the Funds are disclosed in the PDSs, calculated as at each valuation day and charged monthly in arrears.

We do not, and at the date of this Document have no intention to, charge performance fees, entry or exit fees, fees for switching or redeeming investments, or paying trail commissions to advisers.

Swing pricing for large withdrawals: we may charge "swing pricing" directly to an investor if the investor's withdrawal request causes what we consider to be material cost to the relevant Fund (and therefore disadvantages other investors). The actual transaction costs attributable to the investor's withdrawal will be deducted from the amount withdrawn, ordinarily expected to be 0.10% or less of the amount withdrawn. The amount deducted will be credited to the Fund and not to us. The impacted investor will be consulted and informed of the estimated amount to be deducted prior to the acceptance of the withdrawal request, where practicable.

The fees may be varied, or new fees imposed, from time to time in accordance with the Master Trust Deed.

We may, at our discretion, from time to time waive or reduce the fee currently disclosed in the PDS in relation to a particular investor, category of investors, or particular transaction. Any such fee reduction may be effected by way of cash rebate or by the issuance of units to the relevant investor or investors, or (with the Supervisor's consent) on such other basis that we determine.

The fee is deducted from, and reflected in the value of, the units of the Funds. The fee includes costs charged by us, the Supervisor, Custodian and Administration Manager.

Additional costs and expenses

Both we and the Supervisor are entitled to be reimbursed from the Funds, in addition to the fees stated above, for all other expenses, losses, costs, or liabilities where the following apply:

- in the case of the Supervisor, it has consulted with us prior to incurring the relevant expenses, losses, costs, or liabilities; and
- a prudent professional supervisor or manager (as appropriate) would consider it reasonable to incur such expenses, losses, costs, or liabilities in order to assist us or the Supervisor (as the case may be) comply with its obligations and duties under the Master Trust Deed and at law.

At the date of this Document, and for the foreseeable future, we intend to absorb these expenses within the fee. The costs of trading (e.g. brokerage) are an expense of the fund.

We can change the fee (including when they are deducted from the Funds). We may change the fees and charges payable by an investor at any time. Where we increase a fee or charge, we will give you at least three months' notice of the change.

4. Taxation

This section sets out further information about the taxes you will pay when investing in the Scheme. It is intended to be a general summary of relevant New Zealand taxation (which may change) which may affect the returns of the Fund you invest in and each of the Funds may have varying tax implications. This section does not consider the taxation treatment in other jurisdictions and should be read together with the PDS.

Investors may have different taxation positions and you should seek professional tax advice before investing in the Scheme.

Neither Trustees Executors Limited nor Kernel Wealth Limited accepts any responsibility for the taxation consequences of an investment in the Scheme.

PIE

Each Fund is a Portfolio Investment Entity (PIE) as defined in the Income Tax Act 2007.

Under the PIE regime, each Fund's taxable income is attributed to you in proportion to the number of Units you hold in the Fund. An investor may elect, under the Income Tax Act 2007, their Prescribed Investor Rate (PIR) to calculate their tax obligations on the income allocated to them by a PIE. The Fund pays tax on the income attributed to you at your selected PIR and may undertake any necessary adjustments to your interest in a Fund in order to comply with the PIE tax requirements.

We may ask you to provide information to enable us to determine whether a Fund continues to meet the PIE eligibility requirements. We will ask you to get that information to us promptly.

The Funds are not subject to tax on gains that they derive from the sale of shares in most New Zealand resident companies. Dividends from such shares are usually taxable to the Funds, with a credit allowed for any imputation credits attached.

PIR and taxation of distributions to NZ resident investors

At the date of this Document, if you are a natural person investor and a New Zealand tax resident, you will have a PIR of 10.5%, 17.5% or 28%. To qualify for a 10.5% or 17.5% PIR, you must supply a valid IRD number and meet the following criteria in relation to either of the previous two tax years before the relevant tax year*:

| Your taxable income is | Your taxable income plus PIE income is | Your PIR rate is |
|------------------------|--|------------------|
| \$0-\$14,000 | \$0-\$48,000 | 10.5% |
| \$0-\$48,000 | \$0-\$70,000 | 17.5% |

* tax years generally commence on 1 April in any year and end on 31 March in the following year.

If you are a natural person investor and do not qualify for the above 10.5% or 17.5% PIR, or if you do not notify us of your PIR, you will have a PIR of 28%.

The PIR of a New Zealand resident investor that is a company, a PIE or superannuation fund, or a charity will be 0% unless the investor nominates one of the other PIRs, or does not provide us with a valid IRD number or its PIR, in which case a PIR of 28% will apply.

A New Zealand resident trustee (other than a trustee of a charitable trust) can elect a PIR of 0%, 17.5% or 28%. A trustee of a testamentary trust (i.e. a trust created through a will), may also elect a 10.5% PIR. If a trust fails to provide a valid IRD number or notify its PIR to us it will default to a 28% PIR. If a 0%, 10.5%, or 17.5% PIR applies, the trust must account for PIE income within its own tax return (at the appropriate rate of tax depending upon whether taxable income is treated by the trust as trustee or beneficiary income) and claim a credit for any tax already paid by a Fund.

If the trust elects a 28% PIR this will be a final tax and the trust will not include the income in its tax return. We recommend trustees seek independent tax advice before electing a PIR rate.

If you are a joint investor you will be taxed at the highest of the joint PIRs.

If you do not notify us of your PIR, then the default rate of 28% will apply. The Commissioner of IRD can require us to disregard the PIR notified to us by you and apply a PIR notified by the Commissioner.

If you advise the correct PIR, income, dividends or distributions from the Fund will not need to be included in your tax return. If you advise a PIR that is higher than your applicable rate, you may be able to apply to IRD for or may automatically receive a refund of any overpaid PIE tax. Additionally, if you have advised us that you are eligible for a lower PIR, and this is incorrect (i.e. you are only eligible for a higher rate), you may be liable to the IRD for further tax and penalties and have to file a tax return.

You should advise us of your PIR when you make an application to become a unit holder in a Fund. You should also advise us of any changes to your PIR. If you do not advise a PIR or do not provide a valid IRD number, we will apply the 28% PIR.

You should review your rate each year to ensure it is correct and notify us of any changes. For more information about PIRs and to determine your correct PIR rate please refer to the IRD website www.ird.govt.nz/roles/portfolio-investment-entities/find-my-prescribed-investor-rate or contact your professional tax adviser.

Taxation of distributions to non-resident investors

If you are a New Zealand non-resident for tax purposes, you will have a PIR of 28%. You will not be able to elect for a lower PIR to be applied. Dividends or distributions from the Fund will not need to be included in a New Zealand income tax return. If you are a non-resident investor you are advised to seek your own professional tax advice.

Taxation of offshore investments

Equity Investments

Depending on the equities which constitute the index that the relevant Fund tracks, the Fund may be subject to tax in respect of offshore portfolio equity investments.

Gains or losses on Australian equities are not taxable provided they are listed on the Australian Securities Exchange and meet certain other criteria. Dividends on such shares are usually fully taxable to the Fund. The Fund is entitled to a tax credit for any withholding tax deducted from such dividends, however no credit is available for Australian franking credits that might be attached.

For other offshore equities, the Foreign Investment Fund regime will apply and the Funds will usually be taxed pursuant to the "fair dividend rate" (FDR) calculation method. Under the FDR method, the Funds will be deemed to have derived taxable income in an income year (1 April to 31 March) equal to 5% (or a pro-rata portion) of the average daily opening market value of those offshore equities for the income year (or part year). Dividends or profits from the sale of those applicable offshore equities will not be separately taxed. No tax deduction can be claimed for losses on sale.

Dividends may be subject to foreign withholding tax and the Fund should be entitled to a credit, up to certain limits.

Other non-equity investments

Income and gains or losses from non-equity investments held by the Fund will generally be taxable.

5. Risks

All investments involve some level of risk and you should only invest in the Scheme if you understand and are willing to undertake the risks involved. This is a summary of risks that we believe to be the most important.

The PDSs set out the general risks to your investment in the Scheme. There may be other risks that are not detailed here or in the PDSs.

You should seek advice from an appropriately qualified financial adviser before investing in the Scheme.

General Risks

The general risks as set out in each both PDS are as follows. For those Funds listed in both the Product Disclosure Statement – Equity Funds and Product Disclosure Statement – Diversified and Other Funds there are five general risks, being market risk, currency risk, liquidity risk, economic risk and company risk:

Market risk

The risk that there is a decline in the value of a market, or a sector of a market. Markets can fall for many reasons as a result of developments in economic conditions, government regulations, local and international political events, and investor confidence. The performance of individual assets can impact returns.

Currency risk

The risk that a change in exchange rates causes a reduction in value of investments held by the Fund. Currency risk is only relevant for the Funds that invest in international assets. The value of these international investments will fall if the New Zealand dollar increases against the currency in which the international investments are denominated. In addition, some Funds receive foreign currency denominated distributions, these will be exposed to currency risk based on movements in the exchange rate between the foreign currency and New Zealand dollar at the time of conversion.

Currency risk is only relevant for the Funds that invest in international financial products. The foreign currency exposure of the Kernel Global Infrastructure (NZD Hedged) Fund, Kernel Global Green Property Fund, Kernel S&P Global 100 (NZD Hedged) Fund, and Kernel S&P 500 Fund are hedged to the New Zealand dollar.

Liquidity risk

The risk that we are potentially unable to buy or sell some assets of a Fund in a timely manner or at fair value, which could result in a loss to that Fund, because there are insufficient assets available for sale or purchase in a market or the market is disrupted.

Economic risk

The risk that changes in the financial condition, or other material event, in the broader New Zealand and/or global economy causes the value of the investment held by a Fund to decline.

Company risk

The risk that changes in the financial condition, other material event of a company or the credit rating of an issuer of a financial product, causes the value of the investment held by a Fund to decline

In addition, the following general risks apply only to those Funds listed in the Product Disclosure Statement – Diversified and Other Funds:

Asset allocation risk

Returns are affected by how a fund's assets are allocated across different types of assets. For example, the returns of a fund that has a greater proportion in growth assets such as

equities are expected to go up and down more than a fund that has more in cash or fixed income.

Credit risk

The main risk with cash and fixed income investments is that the borrower does not honour their obligations, such as failing to pay as and when contractually required or may become insolvent therefore causing the value of the investment held by a fund to decline.

Specific Risks

In addition to the general risks there are other specific risks which may apply, as set out below. The passive management and tracking risk will apply to those Funds listed in the Product Disclosure Statement – Equity Funds, and the investment manager risk will apply to those Funds listed in the Product Disclosure Statement – Diversified and Other Funds.

Passive management and tracking difference risk

The risk of a Fund incurring a loss because of a change in the value or performance of an asset. Passive management means investments are made to match the composition of a specific index and therefore we do not sell an asset because the issuer is in financial trouble, unless that asset is removed from the index tracked by a Fund, and neither do we form an opinion on the future performance of an asset.

Tracking difference risk is the risk that a Fund achieves a return that is less than the relevant index it aims to track. This may occur if the prices we pay or receive for assets do not exactly match the prices used to calculate the index.

Taxes, fees and costs, operational errors and the amount held in cash by a Fund may also result in tracking difference.

Investment manager risk

Kernel as the investment manager chooses for the Kernel Cash Plus Fund, Kernel Balanced Fund and Kernel High Growth Fund how to allocate each fund's investments and those decisions (and the investment decisions made by the managers of any underlying funds in which we invest) will affect that fund's returns. In particular, our investment style may result in our returns differing from any market index and from competing investments.

Risks not outlined in the Product Disclosure Statement

Operational risk

The Funds may be exposed to operational risk from business interruptions through key personnel changes, human error, insufficient operational funding, technology (including business system failures) or infrastructure failure, fraud or misconduct, non-compliance with legal and regulatory obligations, counter-party performance under outsourcing arrangements, legal risk, data integrity risk, security risk and other external events (including pandemics). This risk may impact on the operation or performance of the Scheme or a Fund within the Scheme. Internal policies, procedures and controls, a compliance assurance program, and effective monitoring of outsourced operations are in place to mitigate these risks.

Concentration risk

Where a Fund's assets are concentrated in a particular country, market, sector (such as a particular industry or theme), asset class, or asset, the Fund may be particularly impacted by adverse events affecting that specific country, market, sector, asset class or asset.

Risk of suspension or deferral of redemptions/withdrawals

The risk that withdrawals (including switches, which are processed as a withdrawal from one Fund and investment into another), which are allowed under the Master Trust Deed subject to certain procedural requirements, out of a Fund are deferred or suspended at a time when you want to redeem your investment.

This could happen if a Fund was unable to buy or sell underlying investments, or as a result of markets not being open for trading.

We can defer or suspend withdrawals in certain limited circumstances and we may also separate out certain assets within a Fund's portfolio and make special arrangements for those assets (**side-pocketing**). This may affect you accessing part of your investment. We can restrict or defer withdrawals and switches in the following situations:

| | |
|-----------------------|--|
| Suspensions | <p>In some circumstances, including where we determine that giving effect to withdrawals or switches from a Fund is not practicable, we can:</p> <ul style="list-style-type: none">• suspend withdrawals and switches from the Fund for up to 90 days (or longer, if the Supervisor agrees); or• pay out withdrawals requested by one or more investors in instalments over a period of up to 90 days (or longer, if the Supervisor agrees) or in a lump sum at the end of that period. |
| Side-pocketing | <p>Subject to relevant law, we can create a 'side-pocket' of assets of a Fund. Side-pocketing is designed to separate a Fund's illiquid assets from more liquid assets, and usually involves restricting your ability to access the units that relate to those assets without affecting your ability to access the non-side-pocketed assets.</p> |

We will notify affected investors if we ever exercise any of the above powers.

Derivatives risk

Derivatives are contracts between two parties that usually derive their value from the value of an underlying asset, rate or index. Derivatives may be used by the Kernel High Growth Fund, Kernel Balanced Fund, Kernel Global Green Property Fund, Global Infrastructure (NZD Hedged) Fund, Kernel S&P Global 100 (NZD Hedged) Fund and Kernel S&P 500 Fund to reduce exposure to a foreign currency. The use of such products to manage currency exposure may cause the Kernel High Growth Fund, Kernel Balanced Fund, Kernel Global Green Property Fund, Global Infrastructure (NZD Hedged) Fund, Kernel S&P Global 100 (NZD Hedged) Fund, and Kernel S&P 500 Fund to incur gains or losses, thereby impacting the Fund's returns. We mitigate this risk by setting controls to constrain the use of derivatives for the purposes of currency management.

The Kernel Cash Plus Fund may enter into derivative contracts to manage interest rate and liquidity exposures. We mitigate this risk by setting controls to constrain the use and extent of derivatives for these purposes within the permitted investments of the fund.

Securities lending risk

Securities lending risk is the risk that borrowed financial products from a Fund or an underlying fund may not be returned by the borrower because they become insolvent or otherwise become unable to meet, or refuse to honour, the obligations to return the borrowed assets. We do not currently undertake securities lending but may do so in the future on a Fund by Fund basis. Prior to doing so, we would develop and publish a securities lending policy and communicate to investors. However, we may invest in funds that undertake securities lending. We review the securities lending policy, and risk management programme including regulatory requirements and collateral requirements of any underlying fund into which a fund invests.

The Kernel Cash Plus Fund may use repurchase agreements ("Repos") to the extent detailed in the SIPO. Repurchase agreements are where the owner of a security sells it to another party for cash consideration under an agreement obligating the owner to repurchase the security at some later point in time. At the termination of the agreement, the original owner repurchases the securities at a higher price than the securities were originally sold for. As a result, they are categorised in a similar way to securities lending.

Third party risk

The Scheme relies on a number of outsource providers to provide services. The failure of a service provider to deliver such services (because of business interruption, external factors or otherwise) may adversely affect the operation and performance of the Scheme. We mitigate this risk through an outsource provider policy.

Regulatory and legal risk

The risk of changes in legislation or regulation, or their interpretation or application of these, including taxation rates, taxation laws and corporate regulatory laws that may adversely affect the Scheme or your investment in a Fund.

Legal risk is the risk that we do not correctly document or comply with our legal obligations.

PIE status risk

The risk is that a Fund may lose its PIE status under the PIE regime, which may have an adverse effect on the tax position of the Fund and/or the after-tax returns that you receive. We mitigate this risk by implementing processes that are designed to ensure that our Funds comply with the PIE requirements.

We may ask you to provide information to enable us to determine whether a Fund continues to meet the PIE eligibility requirements. We will ask you to get that information to us promptly.

6. Material contracts

In addition to the PDS, SIPO, Master Trust Deed and Establishment Deeds (as disclosed on the Disclose website at <https://disclose-register.companiesoffice.govt.nz>), the following contract details are material.

Administration Services Agreement

We have entered into an Administration Services Agreement with Adminis NZ Ltd (**Adminis**). Adminis is the administration manager for the Funds.

The Administration Services Agreement sets out the administration and registry services that Adminis has agreed to provide to us in respect of the Funds, together with the service levels Adminis must comply with in providing those services.

Supervisory Agreement

There is a Supervisory Agreement between Kernel and Trustees Executors Limited, the Scheme's supervisor.

The Supervisory Agreement sets out the arrangements between Kernel and Trustees Executors Limited in relation to certain reporting and other operational matters relating to the Scheme.

Index Licence Agreements

Kernel has in place licensing agreements with S&P Dow Jones Indices and Bloomberg Indices for the various uses of indices and index data in the provision of its services.

7. Investing through administration and custodial services (e.g. wrap platforms)

The Funds may be made available through certain administration and custodial services approved by us. These include "wrap platforms". When you invest through an administration and custodial service then it is the custodial service, not you, that we recognize as the investor and you will not hold Units in the Funds directly. Instead, your Units are held in the name of a custodial entity for the wrap platform on your behalf. This means many of the

legal rights attaching to those Units are held by that custodial entity rather than by you, and so your ability to exercise those rights is subject to the terms and conditions agreed between you and the provider of the service. You are encouraged to familiarise yourself with those terms and conditions as set out in service provider's marketing and legal documentation.

The administration and custodial service may specify a different minimum investment amount or minimum holding.

To make a withdrawal from the Funds or request a switch between Funds, you will need to apply to your administration and custodial service provider.

Fees

Your administration and custodial service provider may also charge fees in respect of your investment in the Funds.

Pursuant to the Master Trust Deed, we have the power to look through administration and custodial service providers to underlying investors with their consent for the purpose of charging fees (including for the purpose of effecting any fee reduction or waiver). This means your eligibility for any fee reduction or waiver may be assessed based solely on your Units in the Funds, rather than based on the administration and custodial service provider's total Unit holdings. Your administration and custodial service provider will confirm whether this applies to you.

8. Auditors and Other Advisers

Auditor

As at the date of this Document, EY is the appointed Auditor of the Funds. EY is a registered audit provider under section 87 of the Auditor Regulation Act 2011.

Other Advisers

Our solicitors are Dentons Kensington Swan.

Our financial advisers are BDO Wellington.

9. No Guarantee

No person, including Kernel, Kernel's Directors, employees, the Custodian, the Administration Manager or the Supervisor, guarantees or promises the repayment of, or returns on, your investment in the Scheme.

10. Glossary

"Administration Manager" means Adminis NZ Limited.

"Custodian" means Adminis NZ Limited.

"Document" means this Other Material Information document which has been prepared to meet the requirements of the FMC Act and the FMC Regulations.

"Establishment Deed" means the establishment deed for each Fund.

"FMA" means the Financial Markets Authority, the government agency responsible for

regulating capital markets and financial services in New Zealand.

"FMC Act" means the Financial Markets Conduct Act 2013.

"FMC Regulations" means the Financial Markets Conduct Regulations 2014.

"Funds" means the investment funds set out in the section titled "Funds", and **"Fund"** has a corresponding meaning.

"Manager", **"Kernel"**, **"we"**, **"us"** and **"our"** means Kernel Wealth Limited, the manager of the Scheme.

"Master Trust Deed" means the Kernel Funds Master Trust Deed.

"PIE" means a portfolio investment entity for the purposes of the Tax Act.

"PIE income" means the income attributed to a person by the PIEs in which the person has invested, less any losses attributed to the person by PIEs.

"PDS" means a product disclosure statement under the FMC Act. A PDS is a document containing information about that Fund intended to assist a prudent but non-expert person to decide whether to invest in that Fund. A retail investor must be given a copy of the relevant PDS before investing. The PDSs for the Funds can be obtained from the offer register on the Disclose website at <https://disclose-register.companiesoffice.govt.nz>.

"PIR" means the Prescribed Investor Rate as that term is defined in the Tax Act.

"Scheme" means the Kernel Funds, a registered managed investment scheme.

"SIPO" means the statement of investment policy and objectives for the Funds. In broad terms, the SIPO is a document setting out the parameters pursuant to which each of the Funds will be invested. The SIPO for the Funds can be obtained from the scheme register on the Disclose website at <https://disclose-register.companiesoffice.govt.nz>.

"Supervisor" means Trustees Executors Limited, the supervisor of the Scheme.

"Tax Act" means the Income Tax Act 2007.

"Unit" means an undivided interest in the relevant Fund as more fully defined in the Master Trust Deed.

"You" or **"Your"** refers to a person who invests in the Funds.
