What are the risks of investing?

Risk indicator for the Pathfinder KiwiSaver Balanced Fund

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz/tools/investor-kickstarter.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the last 5 years to 31 December 2021. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

Also, see *Note 1* for information on the risk indicator calculation.

How has the fund performed?

	Past Year
Annual return (after deductions for charges and tax)	11.28%
Annual return (after deductions for charges but before tax)	11.77%
Market index annual return (reflects no deductions for charges and tax)	7.67%

The Market Index is the Morningstar® Target Allocation Index™: Balanced Multisector for New Zealand, non-New Zealand Fixed Interest 100% hedged to NZD.

The market index has changed since the last Fund Update. The new index is independently administered and widely used to compare funds in New Zealand. The index is gross of dividends and tax except for International Equities and International Listed Properties.

Additional information about the index is available on the offer register at www.business.govt.nz/disclose (search Offers, using Offer OFR12680, Documents, Other Material Information).

Annual return graph

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 31 December 2021.

Important: this does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Pathfinder KiwiSaver Balanced Fund are charged fund charges. In the year to 31 March 2021 these were:

	% of net asset value
Total fund charges*	1.14%
Which are made up of:	
Total management and administration charges	1.14%
Including:	
Manager basic fee	1.10%
Other management and administration expenses	0.04%
Other Charges	
Administration and member fees	\$27 per investor per year

*All amounts exclude any applicable GST
Member fees are not applicable for members under 16 years old.

Performance fees and individual action fees: There are no performance fees or individual action fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

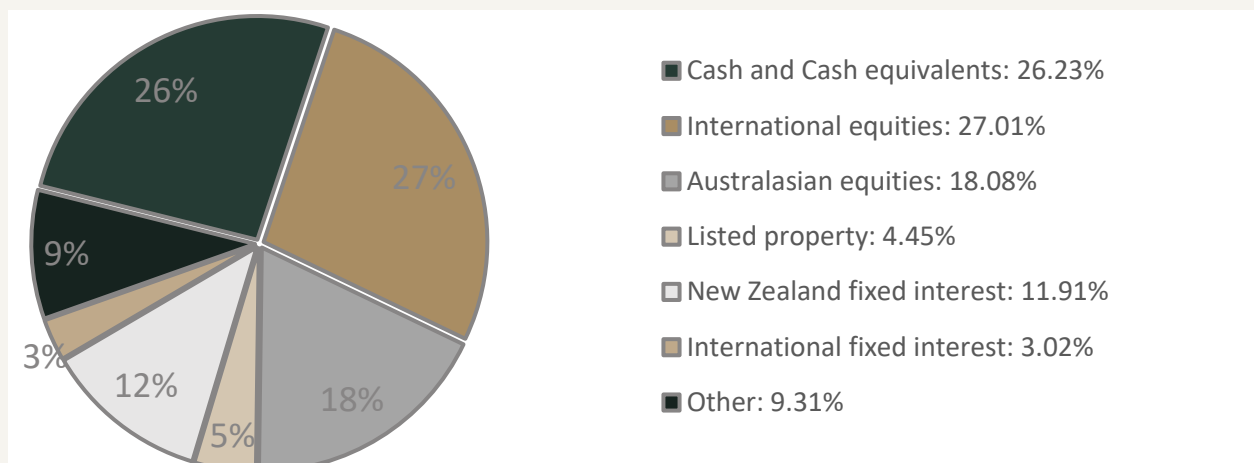

Example of how this applies to an investor

Tara had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Tara received a return after fund charges were deducted of \$1,177 (that is 11.77% of her initial \$10,000). Tara also paid \$27 in other charges. This gives Tara a total return after fees, charges and tax of \$1,101 for the year.

Notes

- 1) **Risk indicator:** This risk indicator is not a guarantee of a fund's future performance. Market index returns as well as the fund's actual returns have been used to fill in the risk indicator because the risk indicator is calculated using returns data for the five-year period ending on 31 December 2021. Market index returns have therefore been used for the period from 1 January 2017 to 23 July 2019 when the fund was not in existence or available for investors, and actual fund returns have been used since then. As a result of those returns being used, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.
- 2) **Actual Investment Mix- Other:** Other assets are direct investments that are unlikely to be stock exchange listed. These can include investments known as 'impact investments', 'venture capital', 'private equity', carbon credits, and also 'private credit'. This category also includes unlisted property, such as direct ownership in property or ownership of property companies that are not listed on a stock exchange.
