These investment options have not been in existence for 5 years, so a combination of actual returns and market index returns have been used to complete the risk indicators. As a result, the risk indicators may provide a less reliable indicator of the potential future volatility of these investment options. The risk indicators use 2 years and 4 months of market index returns.

Ka Uruora WhānauSaver has five investment options

– SuperLife Income, SuperLife Conservative, SuperLife Balanced, SuperLife Growth and SuperLife High Growth. You have the flexibility to combine the investment options.

The principles that underlie the Scheme's broad investment philosophy are:

- ▶ **Passive:** We believe that a passive approach to investing will deliver better long-term results. Passive investing means we will either invest in a fund designed to track an index or in a number of assets for the long term. We do not think that constantly changing our investments (that is, trading regularly and seeking short-term gains), consistently adds value to investors.
- ▶ **Cost effective:** We make decisions based on what is practical, sensible and for the long term. All decisions must be cost effective – the return to you is improved by the careful management of costs.
- ▶ **Diversified:** We believe that better and more consistent outcomes result from diversification. Diversification is about investing in a number of investments and reducing your risk by doing so.
- ▶ **Simple:** We aim to keep things simple.

The Scheme is a managed investment scheme under the Financial Markets Conduct Act 2013. To protect the interests of investors, the Scheme's investments are held by independent custodians, and our operations are supervised by an independent supervisor, Public Trust. The Scheme is established as a trust and is governed by a trust deed between the supervisor and us.

Your money is pooled and invested with other investors' money. Contributions are made by you. Your iwi may also make contributions and if it does, your iwi will tell you the level of iwi contributions and the conditions that apply to such contributions.

Your contributions go into your voluntary account. Any contributions from your iwi go into your iwi account. Each of these accounts is in your name and is invested in one or more of the investment options chosen by you.

Every time you or your iwi pay money into the Scheme you will receive units in the funds you invest in. The number of units that you hold in a fund represents your proportionate interest in that fund. All units in a fund have equal value.

Units only give a beneficial interest in fund assets and do not give you any right to any particular asset of a fund.

You can withdraw your investment by redeeming your units in the Scheme for cash, if permitted. There are no regular distributions from the Scheme (although once eligible you can make regular withdrawals).

He rawa ō ngā tahua katoa (ko ngā haumitanga o te tahua), otirā, he herenga hoki (ko ngā utu, ko ngā utu tāke, ko ērā atu nama hoki me utu e te tahua). Katoa ngā herenga ka puta e hāngai ana ki tētahi tahua ka ea i ngā rawa o taua tahua i te tuatahi. I te korenga o te rahinga pūtea e tika ana i tētahi tahua hei whakaea i ana herenga, e āhei ana te whakamahia o ngā haumitanga i tahua kē atu hei whakaea i aua herenga.

Ina uru mai tētahi tamaiti ki te Hōtaka i raro i Ka Uruora WhānauSaver, mā tōna Kaitiaki Ka Uruora WhānauSaver e pīkau ngā whakataunga katoa e pā ana ki te unutanga haumitanga, me te whakawhiti i waenga i ngā whiringa haumitanga, tae noa ki te ekenga o te tamaiti ki te pakeke i whakatauhia e te Kaitiaki Ka Uruora WhānauSaver. Ko te Kaitiaki Ka Uruora WhānauSaver, koia te tangata i whakaingoatia i te pukatono nō te urunga mai o te tamaiti ki te Hōtaka.

Ka tahuri pea te Hōtaka ki te tuku taurewa i ngā hangarau ahumoni (he mea whakatupu moni whiwhi anō hei painga mō ngā kaihaumi). I te nuinga o te wā ka tuku taurewa mātou i ngā hangarau ahumoni ki tētahi whakahāere ahumoni (**te kaitono pūtea**) kāore i a ia te nui o te hangarau ahumoni e tika ana hei whakatutuki i tētahi hokonga kua whakaetia kētia e ia. Nō reira, ka tono te kaitono pūtea i ngā hangarau ahumoni atu i te Hōtaka e ea ai ana utanga. Ka oti ana te hokonga, ka whakahokia e te kaitono pūtea he hangarau ahumoni whakakapi ki te Hōtaka, tae atu hoki ki tētahi tahua pūtea e ōrite ana ki te tapeke hua tūtanga tērā tonu pea ka utua i te wā o te pūtea taurewa, me tētahi utu mō te tuku taurewa i ngā hangarau ahumoni.

All funds have assets (the investments of the fund) and liabilities (the taxes, fees and costs payable by the fund). All liabilities incurred in respect of a fund will be met from the assets of that fund. If the investments in a fund are not sufficient to meet its liabilities, the investments in another fund cannot be used to meet those liabilities.

If a child joins the Scheme as part of Ka Uruora WhānauSaver, their Ka Uruora WhānauSaver Guardian will make all decisions about withdrawing investments and switching between investment options until the child reaches the age set by the Ka Uruora WhānauSaver Guardian. The Ka Uruora WhānauSaver Guardian is the person specified in the application form when the child joined the Scheme.

The Scheme may undertake financial product lending (which generates additional revenue for the benefit of investors). We typically lend financial products to a financial institution (**borrower**) that does not have sufficient financial products to complete a sale that it has agreed to. The borrower therefore borrows financial products from the Scheme to meet its obligations. After completion of the sale, the borrower returns replacement financial products to the Scheme, together with an amount equal to any dividends that may have become payable over the loan period and a financial product lending fee.

The funds invest in income and growth assets. No one knows for certain how these types of assets are going to perform, but based on our experience we would expect the following characteristics:

- ▶ **Income assets:** Income assets include cash and fixed interest. With cash, we would expect positive returns, but lower than the returns for other assets over the long term. Investing in cash is suitable when money may be required in the short term (0 – 3 years). With fixed interest, we would expect positive returns that are higher than the returns for cash over 3 – 5 years, but at times returns can be negative over the shorter term, investing in fixed interest is suitable when money may be required in the medium term (3 – 10 years).
- ▶ **Growth assets:** Growth assets include shares and property. With shares and property, we would expect positive returns that are higher than the returns for cash and fixed interest over the long term, but at times returns can be negative over the short to medium term, these negative returns can be quite large. Investing in shares and property is suitable when money can be invested for the long term (7 years plus).

To help you understand what type of investor you are, you can seek financial advice or work it out at www.sorted.org.nz/tools/investor-kickstarter.

UNDERSTANDING THE RISK INDICATOR

Funds in New Zealand must have a standard risk indicator. The risk indicator is designed to help investors understand the uncertainties both for loss and growth that may affect their investment. You can compare funds using the risk indicator.

Lower risk	Higher risk
1 > 2 > 3 > 4 > 5 > 6 > 7	
Potentially lower return	Potentially higher return

See section 3 for the risk indicators which have been calculated for each of the investment options described in this product disclosure statement.

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the investment option's assets goes up and down (volatility). A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz/tools/investor-kickstarter.

Note that even the lowest category does not mean a risk-free investment, and there are other risks (described under the heading 'Other specific risks') that are not captured by this rating.

This risk indicator is not a guarantee of an investment option's future performance. The risk indicator is based on the returns data for 5 years to 30 June 2019.

While risk indicators are usually relatively stable, they do shift from time to time. You can see the most recent risk indicator in the latest fund update for each of the investment options.

TŪRARU WHĀRAHI MŌ TE HAUMITANGA

I ngā haumitanga katoa, he tūraru kāore te whaihua e pērā i tāu i whakapae ai, i tāu rānei i tūmanako ai. Ko te take peā e pērā ana: (a) ko te iti, ko te kore rānei o te hua o tō haumitanga; (b) kāore te rautaki haumi i kōwhirihia e koe e hāngai pai ana ki ū whāinga.

Koinei ētahi o ngā take e piki ake ai, e heke iho ai rānei te uara o tētahi tahua, e whai pānga ana ki te tohu tūraru:

GENERAL INVESTMENT RISKS

When you invest, there is always a risk that the outcome is not what you expected or hoped for. This could be because: (a) the return on your investment was negative or low; or (b) your chosen investment strategy was not always suited to your goals.

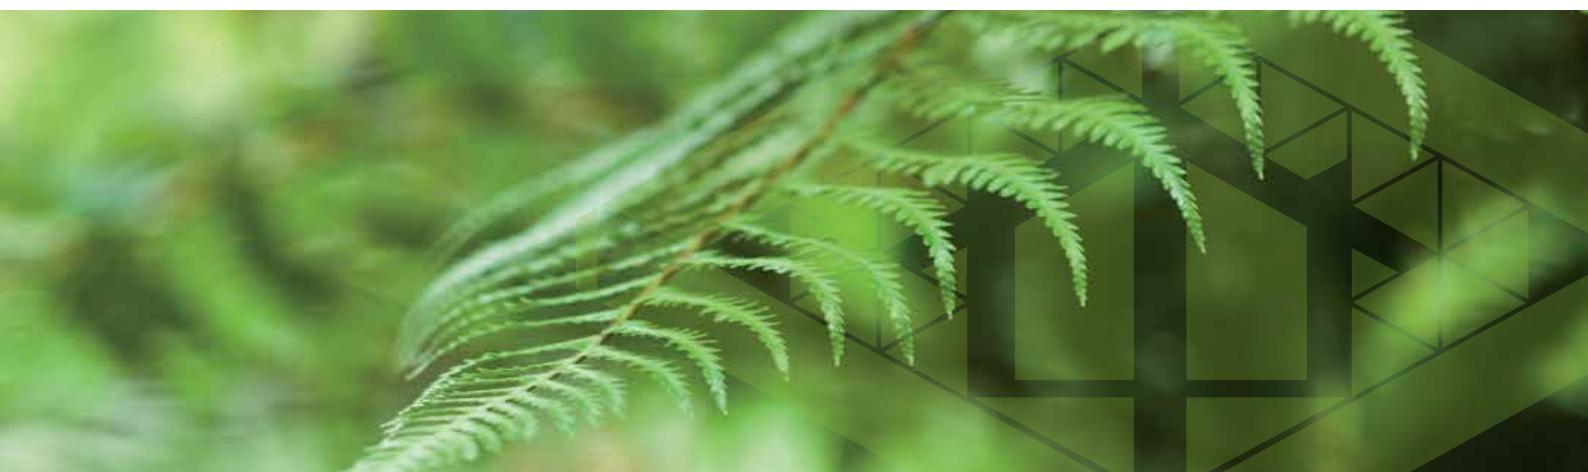

Some of the things that may cause a fund’s value to move up and down, which affect the risk indicator, are:

- ▶ **Market risk:** The risk that a market or a sector of a market that a fund invests in declines.
- ▶ **Individual financial product risk:** The risk that changes in the financial condition or credit rating of an issuer of a financial product causes the value of a financial product held by a fund to decline.
- ▶ **Liquidity risk:** The risk that an investment is difficult to buy or sell and a fund suffers a loss as a result.
- ▶ **Currency risk:** The risk that changes in exchange rates cause the value of an international investment to reduce.
- ▶ **Credit risk:** The risk that issuers of fixed interest or cash investments do not pay interest and/or capital repayments when these are due.
- ▶ **Interest rate risk:** The risk that interest rates rise and the value of investments (in particular, fixed interest and cash investments) reduce.

OTHER SPECIFIC RISKS

There are other risks that may affect returns for investors, which are not reflected in the risk indicator. These risks include investment management risk. In particular, while the Scheme’s investment philosophy is that a passive approach to investing will deliver better long-term results, we may make some active management decisions. There is a risk that this may result in a fund achieving a return that is lower than the investment objective for the fund.

See the ‘Other Material Information’ document on the offer register at www.discloseregister.companiesoffice.govt.nz for further information about the risks of investing in the Scheme.

You will be charged fees for investing in the Scheme. Fees are deducted from your investment and will reduce your returns. The fees you pay will be charged in two ways:

- ▶ regular charges (for example, fund charges). Small differences in these fees can have a big impact on your investment over the long term; and
- ▶ one-off fees (currently none).

These are as follows:

FUNDS	FUND CHARGES (% PER ANNUM OF THE FUNDS NET ASSET VALUE)
SuperLife Income	0.46%
SuperLife Conservative	0.47%
SuperLife Balanced	0.50%
SuperLife Growth	0.51%
SuperLife High Growth	0.53%

OTHER FEES AND INDIVIDUAL ACTION CHARGES

Administration fee - \$12 a year (regardless of the number of investment options you invest in, or the number of times you change investment options).

Paper statements fee - you will only be charged this fee if you choose to receive statements and other SuperLife communications in paper form. The fee is \$18 a year.

The fund charges set out above are deducted from, and reflected in the value of, the fund. The fund charges include the fees and costs charged by the supervisor, custodians and administration manager (together with the fees and costs charged by any other funds we invest in). They also include our regulatory and compliance costs.

The administration fee is deducted from your account balance at \$1 each month. The paper statements fee (if applicable) is deducted from your account balance at \$1.50 each month.

We do not charge any other fees on an individual basis for investor-specific decisions or actions.

We may, in exceptional circumstances, deduct costs that relate to the Scheme that arise outside the ordinary course of business from a fund (such occasions are likely to be very rare).

The revenue earned from financial product lending is shared equally, with 50% being paid to the fund the financial products were lent from, and 50% being paid to us (for administering the lending programme). Financial product lending is discussed in section 2.

Over the next year, Anaru pays other charges of \$12 (Anaru receives statements and other SuperLife communications electronically and was not charged the paper statements fee).

Other charges: \$12

See the latest fund update for SuperLife Growth for an example of the actual returns and fees investors were charged over the past year.

This example applies only to SuperLife Growth. If you are considering investing in other investment options in the Scheme, this example may not be representative of the actual fees you may be charged.

THE FEES CAN BE CHANGED

We may change the fees and charges payable by an investor at any time. Where we increase a fee or charge, we will give you notice of the change.

We must publish a fund update for each investment option showing the fees and charges actually charged during the most recent year. Fund updates, including past updates, are available at www.superlife.co.nz.

6. He aha ngā tāke ka utua e koe? What taxes will you pay?

He hinonga huinga haumitanga (PIE) te Hōtaka nei. Ko tō pāpātanga kaihaumi (**PIR**) te pūtake o te nui o te tāke ka utua e koe. Hei tātai i tō PIR, toro atu ki www.ird.govt.nz/toii/pir/workout/. Ki te rangirua koe ki tō PIR, ko tā mātou e tūtohu nei me whai tūtohu ngaio koe, me whakapā atu rānei ki Te Tari Taake. Kei a koe tonu te haepapa ki te whakamōhio mai i tō PIR i te wā o tō haumitanga, o te panonitanga rānei o tō PIR. Ki te kore koe e whakamōhio mai, he pāpātanga māori pea ka pā ki a koe. Ki te nui rawa te pāpātanga māori, te PIR rānei ka whakamōhiotia mai e koe, kāore e whakahokia te tāke e tuwhene ana.

The Scheme is a portfolio investment entity (PIE). The amount of tax you pay is based on your prescribed investor rate (**PIR**). To determine your PIR, go to www.ird.govt.nz/toii/pir/workout/. If you are unsure of your PIR, we recommend you seek professional advice or contact Inland Revenue. It is your responsibility to tell us your PIR when you invest or if your PIR changes. If you do not tell us, a default rate may be applied. If the advised PIR is lower than the correct PIR, you will need to complete a personal tax return and pay any tax shortfall, interest and penalties. If the default rate or the advised PIR is higher than the correct PIR, you will not get a refund of any overpaid tax.

This offer to Australian investors is a recognised offer made under Australian and New Zealand law. In Australia, this is Chapter 8 of the Corporations Act 2001 and Regulations. In New Zealand, this is Subpart 6 of Part 9 of the Financial Markets Conduct Act 2013 of New Zealand and the Financial Markets Conduct Regulations 2014 of New Zealand.

This offer and the content of the offer document are principally governed by New Zealand, rather than Australian, law. In the main, the Financial Markets Conduct Act 2013 of New Zealand and the Financial Markets Conduct Regulations 2014 of New Zealand set out how the offer must be made.

There are differences in how securities and financial products are regulated under New Zealand, as opposed to Australian, law. For example, the disclosure of fees for managed investment schemes is different under New Zealand law.

The rights, remedies and compensation arrangements available to Australian investors in New Zealand securities and financial products may differ from the rights, remedies and compensation arrangements for Australian securities and financial products.

Both the Australian and New Zealand securities regulators have enforcement responsibilities in relation to this offer. If you need to make a complaint about this offer, please contact the Australian Securities and Investments Commission (ASIC). The Australian and New Zealand regulators will work together to settle your complaint.

The taxation treatment of New Zealand securities and financial products is not the same as that for Australian securities and products.

If you are uncertain about whether this investment is appropriate for you, you should seek the advice of an appropriately qualified financial adviser.

The offer may involve a currency exchange risk. The currency for the security or financial product is in dollars that are not Australian dollars. The value of the security or financial product will go up and down according to changes in the exchange rate between those dollars and Australian dollars. These changes may be significant.

If you receive any payments in relation to the security or financial product that are not in Australian dollars, you may incur significant fees in having the funds credited to a bank account in Australia in Australian dollars.
