1. Description of the scheme

The ANZ Default KiwiSaver Scheme (the **scheme**) is a managed investment scheme.

Funds

The scheme offers seven funds (each a **fund** and together the **funds**), including six multi-asset-class funds and a single-asset-class fund.

The multi-asset-class funds are:

- High Growth Fund
- Growth Fund
- Balanced Growth Fund
- Balanced Fund
- Conservative Balanced Fund
- Conservative Fund

The single-asset-class fund is the Cash Fund.

See Appendix A for more information on the asset classes our funds invest in.

Lifetimes

The scheme also offers a Lifetimes option. If you select the Lifetimes option, your KiwiSaver savings are invested in one of our funds (excluding High Growth Fund), based on your age.

2. Manager, supervisor and custodian, investment manager

ANZ New Zealand Investments Limited is the manager of the scheme (**ANZ Investments, manager, we, us and our**). As the manager, we are responsible for managing the investments of the funds.

The New Zealand Guardian Trust Company Limited is the licensed supervisor of the scheme (**supervisor**) and custodian for the scheme (**custodian**). The supervisor is independent of us and supervises how we run the scheme, for the benefit of you and other investors. As custodian, they hold the scheme's assets "in trust" for you, entirely separate from both their assets and our assets.

We have appointed BlackRock Investment Management (Australia) Limited (BlackRock) as an investment manager for the Conservative Fund. See the Global expertise section for more information on the services being provided by BlackRock.

3. Investment philosophy

Our investment philosophy is based on eight key beliefs. We believe:

- long-term investors outperform short-term investors
- the target investment mix of a fund is the primary driver of investment risk and return
- a well-diversified portfolio providing exposure to a carefully selected mix of asset classes is necessary for investors to meet their investment goals
- markets are not perfectly efficient, leading to opportunities for active management
- active management can add value both at the asset allocation and investment selection levels
- in the value of quality, simplicity and transparency when selecting investments
- in the importance of strong governance and efficient portfolio management and implementation, and
- in the integration of environmental, social and governance (**ESG**) factors into our investment management processes because we believe that these factors are some of the drivers of long-term investment risks and returns.

Our active management of the funds may include:

- varying the investment mix by adjusting allocations to asset classes depending on how we expect them to perform, and
- selecting the asset classes and assets that a fund invests in.

The aim of active management is to achieve better investment performance than investing by tracking a particular index or market.

4. Investment strategy

Investment strategy

Each fund has a different investment strategy. The investment strategy of a fund is made up of the:

- investment objectives
- target investment mix
- target investment mix ranges (or limits), and
- index or composite index that performance is measured against.

See Appendix B for more information on the investment strategies of our funds.

Permitted investments

Our funds are permitted to invest in underlying funds, cash and cash equivalents, and derivatives.

See Appendix A for more information on the nature and type of investments that our underlying funds invest in.

5. Investment objectives

Each fund has a different investment objective. See Appendix B for more information on the objectives of our funds.

6. Investment policy and processes

The investment policy of the scheme is to invest the assets of each fund according to the investment strategy described in the SIPO, while complying with:

- all applicable laws, and
- the requirements of the scheme's governing document.

The processes set out below are followed when managing the assets of each fund.

Investment strategy review

We review the investment strategy for each fund as part of our strategic asset allocation process. This is done at least once every three years to set each fund's target investment mix and ranges.

We forecast how each asset class will perform over the long term, both in isolation and in relation to other asset classes. We then use the forecasts to construct what we believe will be the most effective target investment mix and ranges, with the aim of:

- increasing the probability of achieving the investment objectives, and
- achieving the highest return over time within acceptable risk levels.

As part of the review, we include scenario modelling, stress testing and other analytics to assess portfolio resilience to downside and concentration risks.

For the Cash Fund it is unlikely that the target investment mix and ranges will change, because it only invests in the cash and cash equivalents asset class.

Tactical asset allocation

For the multi-asset-class funds, we use tactical asset allocation to set each fund's desired investment mix (within the target investment mix ranges), based on how we believe an asset class is likely to perform over the short term. In some instances, an asset class may be positioned at or close to the target. We may also vary the investment mix to manage risk and cash flow.

Underlying funds

Our multi-asset-class funds (except for our Conservative Fund) invest into our underlying wholesale multi-asset-class funds that we manage.

Our underlying wholesale multi-asset-class funds invest in underlying funds that each invest in a single-asset-class. We use external fund managers to select the assets in some of our underlying single-asset-class funds.

Our Conservative Fund gains exposure to asset classes by investing into underlying wholesale funds that each focus on investing in a single-asset-class.

Our Cash Fund gains exposure to the cash and cash equivalents asset class by investing into an underlying wholesale single-asset-class fund.

See Appendix A for more information on the nature and type of investments that our underlying funds invest in.

See Appendix C for more information on our underlying fund structure.

Rebalancing

A fund's investment mix is generally monitored each business day to check that it is within its target investment mix ranges. The target investment mix and ranges are based on:

- the cash and cash equivalents held by the fund, and
- the asset class of the underlying single-asset-class funds.

They are not based on the cash, cash equivalents or any other assets held by the underlying fund(s).

Factors that may cause a fund's ranges to be exceeded may include:

- size and timing of cash flows, and
- market volatility.

If a fund's ranges are exceeded, we will rebalance its actual investment mix to bring it back within the ranges. This process usually occurs within five business days.

Liquidity risk management

We maintain a liquidity risk management framework that includes strategies and controls to manage liquidity risk. Our management of liquidity risk includes consideration of asset allocation, diversification across and within asset classes, the liquidity of the assets held and our ability to readily pay withdrawal requests.

Currency hedging

Currency hedging is used to mitigate foreign currency risk. Currency hedging is carried out in line with the hedging style, benchmark and ranges set out in the table below for the applicable asset class. Currency hedging is generally implemented using derivatives such as forward foreign exchange contracts.

Currency hedging is generally monitored each business day to check that it is in line with the fund's desired hedging level and within the fund's currency hedging ranges.

Asset class	Sub-class	Hedging style	Benchmark (%)	Range (%)
Fixed interest assets	New Zealand	Not applicable	Not applicable	Not applicable
	International	Passive	100	Targets 100
Listed property assets	Australasian	Passive	100	Targets 100
	International	Passive	100	Targets 100
Equities	Australasian	Active	75	0-100
	International (developed)	Active	60	0-100
	International (emerging markets)	Active	0	0-100
Other	Listed infrastructure	Passive	100	Targets 100

Active hedging aims to add value to a fund by tactically adjusting the hedging level above or below the benchmark and/or by adjusting the mix of currencies that the New Zealand dollar is hedged to. This is always done within specified ranges based on the view of how the New Zealand dollar will perform.

Passive hedging targets the benchmark hedging level (i.e. 100%), although actual hedging may differ from this, due to cash flow and market movements.

Derivatives

Derivatives are used to reduce investment risks, such as currency risk, or as an efficient way to gain exposure to an asset or an asset class such as equities (e.g. using equity futures). They are not used for leverage. When we use derivatives to gain exposure to an asset class, these derivatives will be backed by cash or cash equivalents and/or fixed interest. Derivative exposures are managed and monitored each business day.

The use of derivatives is subject to the limitations imposed by the governing document, the SIPO, the SIPOs of any underlying funds and our derivatives policy. In addition, our derivative counterparties must meet minimum credit ratings.

Trade allocation

All our funds invest in other funds (called underlying funds) managed by us. Orders to buy or sell units in underlying funds are generally fully allocated. For derivatives such as forward foreign currency contracts and futures, orders to buy or sell these contracts are generally fully allocated. In the unlikely event that an order isn't fully allocated, it will be allocated fairly on a pro rata basis of the total order.

Proxy voting

As the funds do not hold equities directly, they are not called on to vote on resolutions proposed for securities in which the funds ultimately invest. However, for the underlying funds that hold equities, our general policy is to vote on all proxies. We vote on resolutions in line with our investment beliefs and our Responsible Investment Framework. For more information, see our Responsible Investment Framework at anz.co.nz/responsibleinvesting.

Valuation

We generally calculate the unit price for each fund on each business day. This unit price will set the transactional value of a fund on that day for those investors wishing to contribute to or withdraw from the fund, and takes into account the following factors:

- known assets and liabilities
- expected income, and
- daily fees and charges.

Our valuation process will generally:

- use market values where available (including either the bid, ask or last traded prices for quoted investments) to value investments held
- assume investments are held on a going concerns basis
- apply exchange rates on the basis of the exchange rate applicable to a transaction, or value investments held at the WM/Reuters 4pm London Exchange Rates, and
- value most assets and liabilities held by the fund each business day using the latest market information available.

In addition, our valuations are objective, not subject to undue influence and are independently verified by external audit processes on an annual basis.

Once the daily unit price is calculated and verified, it is applied to investors' accounts within our registry. The value of an investor's account on a particular day is the unit price calculated for that day multiplied by the number of units on issue to that investor (plus or minus any tax accrual).

In the event market values, systems or pricing interfaces are unavailable, we may price the fund based on the movement of the market index the fund is measured against. Once market values become available, the normal valuation/pricing process will be followed.

External fund manager selection and monitoring

We have a process for selecting our external fund managers, who manage some of the assets in the underlying funds. We use external fund managers that we believe are among the best in their class.

Once selected, an external fund manager is subject to a rigorous on-going monitoring process. Our external fund managers may change from time to time. The current external fund managers can be found in the 'Underlying Funds and External Fund Managers' document available at anz.co.nz/kiwisaverforms and on the offer register at disclose-register.companiesoffice.govt.nz.

Global expertise

We may use external global experts to support or help deliver investment management functions such as identifying investment opportunities, investment risk management, trade processing and external fund manager selection and monitoring.

We have appointed BlackRock to provide services to our Conservative Fund, our underlying wholesale multi-asset-class funds and some underlying single-asset-class funds, such as:

- trade execution and completion for currency hedging and exchange traded futures
- rebalancing and cashflow management
- access to global investment expertise and insights
- monitoring and analytics across these funds

The services complement and enhance our existing investment and risk management capabilities helping us to deliver improved investment outcomes. We remain responsible for all investment decision making, the active management of our funds and our investment philosophy.

Responsible investment

Our approach to responsible investment is a core component in the way we research, select and manage investments.

Our Responsible Investment Framework at anz.co.nz/responsibleinvesting sets out our approach to responsible investment and how we apply it to our investment activities. It also sets out how we monitor and report on our approach.

We believe that environmental, social and governance (ESG) factors are important drivers of long-term investment risks and returns. The three core components of this approach are exclusions, ESG integration, and stewardship.

1. We exclude some companies¹ and industries based on their involvement in areas of harm, or for breaching global norms.
2. For the companies we invest in or are looking to invest in, we integrate ESG considerations into our evaluation of a company.
3. For the companies we invest in, we demonstrate our stewardship through engagement and proxy voting.

For the avoidance of doubt, we do not make investments in companies or industries based solely on ESG factors.

Climate change

We believe that climate change is a systemic challenge. Climate-related risks and opportunities can materially impact investments so we've developed a climate-related goal, set of interim targets, and a specific climate approach as part of our investment framework. Our goal is to reach net zero greenhouse gas emissions by 2050 across all of our funds under management (FUM), although not on a fund by fund basis. This is our 'Net Zero 2050' goal. 'Net zero' means cutting greenhouse gas emissions to as close to zero as possible, with any remaining emissions re-absorbed from the atmosphere.

Our responsible investment approach to meeting this goal includes taking a stewardship-based approach to decarbonisation and we have set interim targets to track our progress towards Net Zero 2050. Stewardship involves using our influence as a manager with a view to shaping the behaviour and climate impact of a number of the companies we invest in.

We use a variety of tools to identify, assess and manage climate risks and opportunities as part of our ESG integration. We consider climate risk and opportunities throughout our investment decision making process from our strategic asset allocation process, external fund manager selection, through to when we select securities and construct our portfolios. Once we have invested, working on behalf of investors, the aim is to encourage the companies we invest in to align their business with the transition to net zero greenhouse gas emissions by 2050. We will monitor the effectiveness of our stewardship activities and we (and our external fund managers) may take steps such as divestment or exclusion.

Further information on our Net Zero 2050 goal and interim targets is set out at Appendix D.

7. Investment performance

Measuring performance

We measure performance for each fund on:

- an after-fees and before-tax basis, and
- an after-fees and after-tax basis (at the highest prescribed investor rate).

Each month, the daily performance outcomes for each fund are aggregated into longer-term measures of performance, including but not limited to monthly, three-monthly, one-year, three-year and five-year measures of performance. These are compared against fund objectives, indices, peers and other like funds.

¹ The term 'companies' and 'company' is used broadly in our Responsible Investment Framework to refer to companies and other issuers, including government entities.

Market indices

The performance of each fund is compared against a relevant market index or composite index. See Appendix C for more information on these indices.

8. SIPO compliance and review

We generally monitor the funds each business day to confirm compliance with the SIPO.

We review the SIPO annually and on an ad-hoc basis as required. An ad-hoc review may be carried out due to:

- creation of a new fund within the scheme
- a review of a fund's target investment mix or investment objectives
- a change in the underlying funds or external fund managers
- fundamental changes in the investment environment, or
- a change in law or regulation.

We can make changes to the SIPO at any time. Any changes are approved by us in accordance with our internal policies and procedures. This may include approval by internal committees and forums covering product and investment management (as appropriate to the change).

We will consult with the supervisor before making any changes and any material changes will be outlined in the scheme's annual report.

APPENDICES

APPENDIX A – ASSET CLASSES

The asset classes that our funds and underlying funds invest in are described below:

Asset class	Description
Cash and cash equivalents	Interest-bearing deposits with one or more registered banks (such as term deposits), short-term debt securities (maturity no greater than 365 days), floating rate notes.
Fixed interest	Debt securities issued by governments, corporations, local authorities or banks (called issuers). The issuer generally pays a set (or fixed) interest rate for a set period of time. Cash and cash equivalents may also be included in fixed interest assets.
Listed property	Shares or units in property trusts or companies. Those trusts or companies own or invest directly in property. These investments are generally listed on a stock exchange.
Equities	Investments that give the holder part-ownership of a company, corporation or similar entity, including units, shares, or other equity investments, such as some types of exchange traded futures or exchange traded funds. These investments are generally listed on a stock exchange. Equities might sometimes be referred to as shares.
Other (listed infrastructure)	Shares in infrastructure companies. Those companies own or invest directly in assets that communities and economies require to function, for example water, gas and electricity distribution assets, airports, toll-roads and telecommunication towers. These investments are generally listed on a stock exchange.
Other (alternatives)	An asset that doesn't fit into our four main asset classes (cash and cash equivalents, fixed interest, listed property and equities) and is not listed infrastructure. Alternative assets may include commodities, hedge funds and private equity.

The funds and underlying funds may invest in other investments that we consider to be part of the relevant asset class. We may also use derivatives.

See section 6 for more information.

APPENDIX B – FUND OBJECTIVES AND STRATEGY

The investment strategy and objectives for each fund are outlined on the following pages.

Capital market assumptions

Our fund objectives are based on capital market assumptions. Capital market assumptions are what we assume:

- the expected return of each asset class will be, and
- the volatility of each asset class will be (how much the value will go up and down).

These assumptions are based on an analysis of factors such as:

- inflation
- economic growth
- corporate earnings growth
- current valuations of asset classes
- trends in interest rates and central bank action, and
- market sentiment towards the different asset classes.

Our fund objectives are intended to be measured over the long term, which we define as at least one complete market cycle. Market cycles typically last 5-15 years. For this reason when assessing our fund objectives, we focus on longer-term return expectations.

No guarantee of investments in the scheme

ANZ Investments is not an authorised deposit-taking institution (ADI) under Australian law and investments in the scheme aren't deposits in or liabilities of ANZ Bank New Zealand Limited, Australia and New Zealand Banking Group Limited, or their subsidiaries (together 'ANZ Group'). ANZ Group does not stand behind or guarantee ANZ Investments. Investments in the scheme are subject to investment risk, including possible delays in repayment, and loss of income and principal invested. ANZ Group will not be liable to you for the capital value or performance of your investment.

Your investment in the scheme is not guaranteed by ANZ Group, the supervisor, any of their directors or any other person.

No guarantee of fund objectives

We do not guarantee that the objectives of each fund will be achieved.

High Growth Fund

Description

The High Growth Fund invests in growth assets (equities, listed property and listed infrastructure), with a very small exposure to income assets (cash and cash equivalents and fixed interest). The fund may also invest in alternative assets.

For more information on these asset classes, see Appendix A.

Objectives

The High Growth Fund aims to achieve (after the fund charge and before tax) over the long term higher returns, allowing for larger ups and downs in value.

Target investment mix and ranges

Asset class	Sub-class	Target (%)	Range (%)
Cash and cash equivalents	New Zealand	5	0-25
	International		
Fixed interest	New Zealand	0	0-20
	International	0	0-20
Other	Alternatives	0	0-15
Sub-total (cash and cash equivalents, fixed interest & other)		5	0-40
Listed property	Australasian	4	0-17
	International	3.5	
Equities	Australasian	19	0-39
	International	65	50-85
Other	Listed infrastructure	3.5	0-14
	Alternatives	0	0-15
Sub-total (listed property, equities & other)		95	60-100

Growth Fund

Description

The Growth Fund invests mainly in growth assets (equities, listed property and listed infrastructure), with a small exposure to income assets (cash and cash equivalents and fixed interest). The fund may also invest in alternative assets.

For more information on these asset classes, see Appendix A.

Objectives

The Growth Fund aims to achieve (after the fund charge and before tax) over the long term high returns, allowing for large ups and downs in value.

Target investment mix and ranges

Asset class	Sub-class	Target (%)	Range (%)
Cash and cash equivalents	New Zealand	3	0-23
	International		
Fixed interest	New Zealand	4.2	0-24
	International	12.8	0-32
Other	Alternatives	0	0-15
Sub-total (cash and cash equivalents, fixed interest & other)		20	0-40
Listed property	Australasian	3.2	0-17
	International	3	
Equities	Australasian	16	0-36
	International	54.8	35-75
Other	Listed infrastructure	3	0-12
	Alternatives	0	0-15
Sub-total (listed property, equities & other)		80	60-100

Lifetimes option

Investors who have selected the Lifetimes option will be allocated to the Growth Fund if they are aged 35 or under.

Balanced Growth Fund

Description

The Balanced Growth Fund invests mainly in growth assets (equities, listed property and listed infrastructure), with some exposure to income assets (cash and cash equivalents and fixed interest). The fund may also invest in alternative assets.

For more information on these asset classes, see Appendix A.

Objectives

The Balanced Growth Fund aims to achieve (after the fund charge and before tax) over the long term moderate to high returns, allowing for moderate to large ups and downs in value.

Target investment mix and ranges

Asset class	Sub-class	Target (%)	Range (%)
Cash and cash equivalents	New Zealand	4.5	0-25
	International		
Fixed interest	New Zealand	7.8	0-28
	International	22.7	3-43
Other	Alternatives	0	0-15
Sub-total (cash and cash equivalents, fixed interest & other)		35	15-55
Listed property	Australasian	2.6	0-15
	International	2.4	
Equities	Australasian	12.95	0-32
	International	44.65	25-65
Other	Listed infrastructure	2.4	0-10
	Alternatives	0	0-15
Sub-total (listed property, equities & other)		65	45-85

Lifetimes option

Investors who have selected the Lifetimes option will be allocated to the Balanced Growth Fund if they are aged between 36 and 45.

Balanced Fund

Description

The Balanced Fund invests in similar amounts of income assets (cash and cash equivalents and fixed interest) and growth assets (equities, listed property and listed infrastructure). The fund may also invest in alternative assets.

For more information on these asset classes, see Appendix A.

Objectives

The Balanced Fund aims to achieve (after the fund charge and before tax) over the long term moderate returns, allowing for moderate ups and downs in value.

Target investment mix and ranges

Asset class	Sub-class	Target (%)	Range (%)
Cash and cash equivalents	New Zealand	8	0-28
	International		
Fixed interest	New Zealand	10.8	0-26
	International	31.2	16-46
Other	Alternatives	0	0-12
Sub-total (cash and cash equivalents, fixed interest & other)		50	35-65
Listed property	Australasian	2	0-14
	International	1.85	
Equities	Australasian	9.9	0-25
	International	34.4	19-50
Other	Listed infrastructure	1.85	0-8
	Alternatives	0	0-12
Sub-total (listed property, equities & other)		50	35-65

Lifetimes option

Investors who have selected the Lifetimes option will be allocated to the Balanced Fund if they are aged between 46 and 55.

Conservative Balanced Fund

Description

The Conservative Balanced Fund invests mainly in income assets (cash and cash equivalents and fixed interest), with some exposure to growth assets (equities, listed property and listed infrastructure). The fund may also invest in alternative assets.

For more information on these asset classes, see Appendix A.

Objectives

The Conservative Balanced Fund aims to achieve (after the fund charge and before tax) over the long term low to moderate returns, allowing for small to moderate ups and downs in value.

Target investment mix and ranges

Asset class	Sub-class	Target (%)	Range (%)
Cash and cash equivalents	New Zealand	12	0-32
	International		
Fixed interest	New Zealand	13.2	0-28
	International	39.8	25-55
Other	Alternatives	0	0-10
Sub-total (cash and cash equivalents, fixed interest & other)		65	50-80
Listed property	Australasian	1.4	0-15
	International	2.5	
Equities	Australasian	6.8	0-22
	International	23	8-38
Other	Listed infrastructure	1.3	0-7
	Alternatives	0	0-10
Sub-total (listed property, equities & other)		35	20-50

Lifetimes option

Investors who have selected the Lifetimes option will be allocated to the Conservative Balanced Fund if they are aged between 56 and 60.

Conservative Fund

Description

The Conservative Fund invests mainly in income assets (cash and cash equivalents and fixed interest), with a smaller exposure to growth assets (equities, listed property and listed infrastructure). The fund may also invest in alternative assets.

For more information on these asset classes, see Appendix A.

Objectives

The Conservative Fund aims to achieve (after the fund charge and before tax) over the long term low relatively stable returns, allowing for small ups and downs in value.

Target investment mix and ranges

Asset class	Sub-class	Target (%)	Range (%)
Cash and cash equivalents	New Zealand	15	0-35
	International		
Fixed interest	New Zealand	16	0-31
	International	49	34-64
Other	Alternatives	0	0-8
Sub-total (cash and cash equivalents, fixed interest & other)		80	65-95
Listed property	Australasian	0.8	0-9
	International	1.5	
Equities	Australasian	3.75	0-19
	International	13.2	0-29
Other	Listed infrastructure	0.75	0-6
	Alternatives	0	0-8
Sub-total (listed property, equities & other)		20	5-35

Lifetimes option

Investors who have selected the Lifetimes option will be allocated to the Conservative Fund if they are aged between 61 and 64.

Cash Fund

Description

The Cash Fund invests in cash and cash equivalents. These may include investments issued by New Zealand-registered banks, the New Zealand Government, corporations or local authorities, or non-New Zealand governments.

Objective

The Cash Fund aims to achieve (after the fund charge and before tax) over the short term lower but stable returns, allowing for smaller ups and downs in value.

Target investment mix and ranges

Asset class	Sub-class	Target (%)	Range (%)
Cash and cash equivalents	New Zealand	100	100

Lifetimes option

Investors who have selected the Lifetimes option will be allocated to the Cash Fund if they are aged 65 or over.

APPENDIX C – INFORMATION ON UNDERLYING FUND STRUCTURE AND MARKET INDICES

Overview

Each multi-asset-class fund (except for the Conservative Fund) will invest in its corresponding underlying wholesale multi-asset-class fund, being one of:

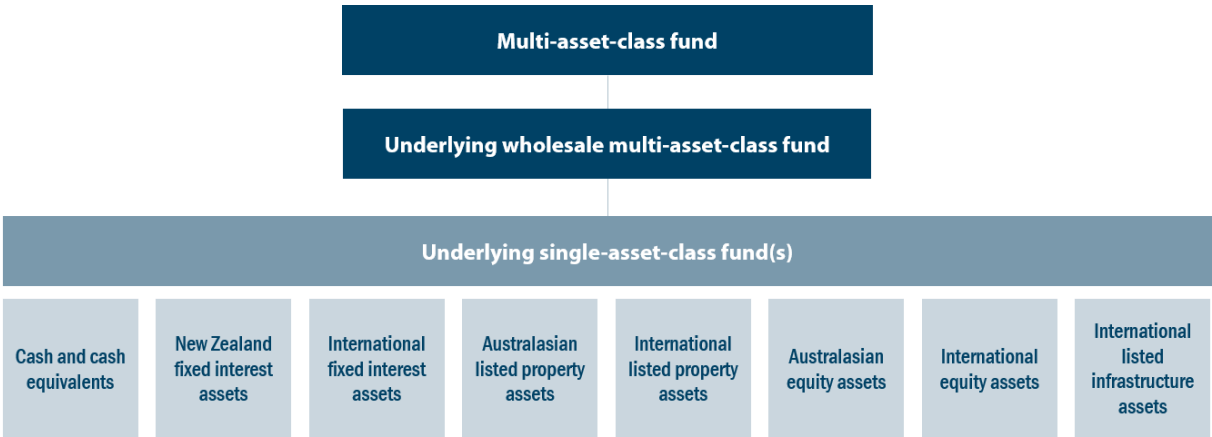

- ANZ Wholesale Conservative Balanced Fund
- ANZ Wholesale Balanced Fund
- ANZ Wholesale Balanced Growth Fund
- ANZ Wholesale Growth Fund, and
- ANZ Wholesale High Growth Fund.

Our wholesale multi-asset-class funds are managed by us. These funds will gain exposure to asset classes by investing in underlying funds that each focus on investing in a single-asset-class.

Our Conservative Fund gains exposure to asset classes by investing into underlying funds that each focus on investing in a single-asset-class.

Our Cash Fund gains exposure to the cash and cash equivalents asset class by investing in an underlying single-asset-class fund.

A diagram of our multi-asset-class fund investment structure is set out below.

We choose either to manage all the assets of an underlying single-asset-class fund ourselves or use carefully chosen external fund managers to manage a portion of the assets. We monitor what these external fund managers do and how they perform.

We can change any (or all) of the underlying funds, external fund managers or indices – provided that we continue to comply with the restrictions detailed in the SIPO.

For more information on the underlying funds and external fund managers, see the ‘Underlying Funds and External Fund Managers’ document available at anz.co.nz/kiwisaverforms and on the offer register at disclose-register.companiesoffice.govt.nz. Composite indices

The relevant index for each of the multi-asset-class funds is a composite index. This is calculated using the target investment mix of each multi-asset-class fund and the relevant indices of the asset class.

Relevant market indices

The market indices for each asset class are as follows:

Asset class	Sub-class	Relevant market index
Cash and cash equivalents	New Zealand	S&P/NZX Bank Bills 90 Day Index
Fixed interest assets	New Zealand	S&P/NZX NZ Government Bond Index and S&P/NZX Investment Grade Corporate Bond Index
	International	Bloomberg AusBond Govt 0+ Yr Index (100% hedged to the New Zealand dollar), Bloomberg AusBond Credit 0+ Yr Index (100% hedged to the New Zealand dollar) and Bloomberg Barclays Global Aggregate Total Return Index (100% hedged to the New Zealand dollar)
Listed property assets	Australasian	S&P/NZX All Real Estate (Industry Group) Gross (with imputation credits re-invested) and S&P/ASX 200 Acc A-REIT Index (100% hedged to the New Zealand dollar)
	International	FTSE EPRA Nareit Developed Rental Net Total Return Index (100% hedged to the New Zealand dollar)
Equity assets	Australasian	S&P/NZX50 Gross Index (with imputation credits re-invested) and S&P/ASX 200 Accumulation Index (75% hedged to the New Zealand dollar)
	International (excluding Conservative Fund)	MSCI World ex Australia Index with net dividends re-invested (60% hedged to the New Zealand Dollar) and MSCI Emerging Market Index with net dividends reinvested (unhedged)
	International (Conservative Fund)	MSCI World ex Australia Index with net dividends re-invested (60% hedged to the New Zealand Dollar)
Other	Listed infrastructure	FTSE Global CORE Infrastructure 50/50 Index net TR (100% hedged to the New Zealand dollar)

More information about the market indices can be found at the index providers' websites:

- spglobal.com/spdji
- ftserussell.com
- bloomberg.com/professional/product/indices
- msci.com/index-solutions

The above links may change from time to time.

APPENDIX D – FURTHER INFORMATION ON OUR APPROACH TO MANAGING CLIMATE-RELATED ISSUES

Net Zero 2050 goal and interim targets

To measure our progress in achieving our Net Zero 2050 goal, we have set interim targets based on the Paris Aligned Investment Initiative's Net Zero Investment Framework (**PAII framework**). The PAII framework has five categories: Achieving net zero, Aligned to a net zero pathway, Aligning towards a net zero pathway, Committed to aligning, and Not aligned.

Our interim targets are:

- 50% of in-scope FUM considered Achieving, Aligned or Aligning by 2030
- 100% of in-scope FUM considered Achieving, Aligned or Aligned by 2040

We use MSCI's data to classify the companies we invest in under the PAII framework. For more information on the PAII framework, please visit their website [here](#).

To measure the effectiveness of our engagement with the companies we invest in, we have set a secondary target to reduce our in-scope FUM weighted average carbon intensity (WACI) by 50% by 2030. This is from a baseline year ending 31 December 2022. This target is across all funds we manage, not on a fund by fund basis.

We use WACI to measure the funds' exposure to carbon intensive companies. It is a calculation of the tonnes of carbon dioxide (CO₂) emitted per NZ\$1 million of company sales. This is then weighted based on the size of the holding. It allows for comparison between different sized funds.

We prioritise our engagement on climate-related issues based on the status of a company under the PAII framework, based on their emissions intensity.

We review the interim targets, including the assets they apply to, annually and we will review our overall climate strategy every three years.

We do not guarantee that the Net Zero 2050 goal or the interim targets will be met, as they rely on a number of factors including changes in the global and domestic economies, the pace and change of global temperature rise, supportive regulatory and policy settings addressing climate change, and companies' stakeholder sentiment.

We will report our Net Zero 2050 goal, our interim targets and progress towards the goal and interim targets in accordance with requirements under New Zealand's climate-related disclosures regime. We issued our first climate statement under that regime in July 2024.

In-scope FUM for interim climate targets

Our interim climate targets apply to our "in-scope FUM", which covers the listed equity, listed property and corporate fixed interest asset classes of the funds. Cash and derivative assets are not included in our targets because there is currently no globally recognised methodology to calculate these emissions.

In addition, due to the nature of sovereign debt and the difficulty in demonstrating alignment to the PAII framework, sovereign debt is also excluded from our targets. Our interim PAII targets consider scope 1, 2, and material scope 3 emissions² (reported or estimated). Our secondary WACI target only considers scope 1 and 2 emissions. We will review the assets that are in scope at least once a year. We expect to increase the number of in-scope assets over time.

² 'Scope 1 emissions' means direct greenhouse gas (GHG) emissions from sources owned or controlled by the entity.

'Scope 2 emissions' means indirect GHG emissions from consumption of purchased electricity, heat or steam.

'Scope 3 emissions' means other indirect emissions from sources not owned or controlled by the entity (e.g. investments).
