

Fund update

Mercer High Growth fund

Mercer FlexiSaver

Quarter ending 31 March 2025

This fund update was first made publicly available on: 1 May 2025.

What is the purpose of this update?

This document tells you how the Mercer High Growth fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Mercer (N.Z.) Limited prepared this update in accordance with the Financial Markets Conduct Act 2013.

This information is not audited and may be updated.

Description of this fund

Invests almost entirely in growth assets such as shares and real assets, with only a small amount invested in defensive assets such as fixed interest and cash. May be suitable for investors wanting to invest predominately in growth assets, who want higher long-term returns and are comfortable with high volatility in returns.

Total value of the fund	\$16,429,984
The date the fund started	9 October 2015

What are the risks of investing?

Risk indicator for the Mercer High Growth fund†:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.riskquiz.co.nz.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 31 March 2025. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

† A combination of actual fund returns and composite index returns have been used to determine the risk indicator due to a change in investment policy at 31 August 2020. The risk indicator may therefore provide a less reliable indicator of the potential future volatility of the fund. For the five year period ending 31 March 2025 composite index returns have been used up to 31 August 2020 with actual fund returns used for the balance of the period to 31 March 2025.¹

How has the fund performed?

	Average over past 5 years	Past year
Annual return² <i>(after deductions for charges and tax)</i>	9.46%	5.63%
Annual return² <i>(after deductions for charges but before tax)</i>	10.55%	6.41%
Composite of market index annual return <i>(reflects no deduction for charges and tax)</i> and peer group indices annual return <i>(after deduction for charges but before tax)</i> ¹	11.04%	7.48%

The composite index return is the strategic asset allocation weighted benchmark index return, where the benchmark indices are defined in the Statement of Investment Policy and Objectives. Additional information about the composite index is available on the offer register.

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 31 March 2025.³

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

What fees are investors charged?

Investors in the Mercer High Growth fund are charged fund charges. In the year to 31 March 2024 these were:

	% of net asset value
Total fund charges ⁶	1.11% ^{4,5}
Which are made up of:	
Total management and administration charges	1.11% ^{4,5}
Including:	
Manager's basic fee	0.91% ⁴
Other management and administration charges	0.20% ⁵
Total performance-based fees	0.00%

Investors are not currently charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the Mercer FlexiSaver scheme PDS for more information about Scheme fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

Example of how this applies to an investor ⁷

Ben had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Ben received a return after fund charges were deducted of \$563.00 (that is 5.63% of his initial \$10,000). Ben also paid \$0.00 in other charges. This gives Ben a total return after tax of \$563.00 for the year.

What does the fund invest in?

Actual investment mix ⁸

This shows the types of assets that the fund invests in.

Target investment mix

This shows the mix of assets that the fund generally intends to invest in.

*Includes listed and unlisted infrastructure assets

Following changes to the strategic asset allocation, the fund no longer holds a Strategic Asset allocation to Listed Property. We continue to invest in Listed Property as a Dynamic Asset Allocation tilt.

Top 10 Investments ⁹

Name	% of fund net assets	Type	Country	Credit rating (if applicable)
1 Fisher & Paykel Healthcare Corporation Limited	3.18%	Australasian equities	New Zealand	NA
2 Microsoft Corporation	2.03%	International equities	United States	NA
3 Auckland International Airport Ltd	1.99%	Australasian equities	New Zealand	NA
4 Apple Inc.	1.95%	International equities	United States	NA
5 First Sentier Global Listed Infrastructure Fund	1.89%	Other**	New Zealand	NA
6 Nvidia Corporation	1.87%	International equities	United States	NA
7 Infratil Limited	1.70%	Australasian equities	New Zealand	NA
8 Amazon.com Inc	1.64%	International equities	United States	NA
9 Contact Energy Limited	1.43%	Australasian equities	New Zealand	NA
10 Meta Platforms Inc	1.25%	International equities	United States	NA

**An investment in a fund that is primarily comprised of listed infrastructure assets.

The top 10 investments make up 18.93% of the fund.

Currency hedging

Currency hedging can apply to some of the asset classes this fund invests in. The level of currency hedging for global shares is managed between 0% and 100% on a net of tax basis and may change over time depending on Mercer's view of the relative strength (or weakness) of the New Zealand dollar. Other global asset classes (Global Fixed Interest and Real Assets) target a 100% net of tax hedge to the New Zealand dollar. Refer to the Statement of Investment Policy and Objectives for more information which is available from www.disclose-register.companiesoffice.govt.nz.

Hedging coverage, on a net of tax basis, for the Fund's exposure to foreign currency as at 31 March 2025 was 53.93%.

Key personnel

This shows the directors and employees who have the most influence on the investment decisions of the fund.

Name	Current Position	Time in current position	Previous/other position	Time in previous/other position

Further information

You can also obtain this information, the PDS for the Mercer FlexiSaver scheme and some additional information from the offer register at www.disclose-register.companiesoffice.govt.nz.

Notes

1. The benchmark is a composite of market, peer group and absolute return indices. The absolute return indices were used up to 30 September 2018. From 30 September 2018 a composite index has been used as there is no appropriate market index for the fund as a whole and market indices are not applicable for some of the asset classes in this fund. The composite index has been used to calculate the risk indicator (where actual returns are not available for the period specified) and in the table and bar graph in the How has the fund performed? section. The composite index may be a less reliable indicator of performance than a market index. The peer group indices returns reflected in the table and the bar graph are after deductions for charges but before tax. Additional detail regarding the peer group and market indices can be found on the offer register www.disclose-register.companiesoffice.govt.nz.

2. Returns may vary for some investors depending on the fund charges applicable to them.

3. The average annual return is from 30 November 2015. Returns for the year to 31 March 2024 are based on a unit price at 28 March 2024.

4. The manager's basic fee varies for some investors, including those who joined through an employer based group. The actual fee used in this fund update is the general Mercer FlexiSaver fee charged.

The manager's basic fee that applies to the New Zealand Defence Force FlexiSaver section for the year was 0.81%. The manager's basic fee for these members varies due to a rebate which applies to the aggregate funds under management in the NZDF Savings Schemes and has been calculated using the rebate for the year ending 31 March 2024.

5. Other management and administration charges vary for different investors. The actual fee used in this fund update is for the general section. For those investors in the New Zealand Defence Force FlexiSaver section the other management and administration charge was 0.32%.

6. GST may be included in some expenses, but is not currently payable on the fees stated.
7. Returns may vary for some investors depending on the fund charges applicable to them. Returns may also differ for some investors who do not incur the other charges shown.
8. For the reporting of the types of assets under Actual investment mix, cash retained for liquidity management at a sector level is assigned to the asset class to which it relates to.
9. The Top 10 investments have been calculated excluding cash retained for liquidity purposes.
