Note 1. Significant accounting policies

Reporting entity

PMG Direct Office Fund ('the Fund') is a Managed Investment Scheme domiciled in New Zealand. The Fund is managed by Property Managers Limited ('the Manager'), and the supervisor of the Fund is Covenant Trustee Services Limited ('the Supervisor'). The Manager of the Fund is licensed under the Financial Markets Conduct Act 2013 ('FMCA') as a manager of Managed Investment Schemes. The Supervisor holds any properties in the Fund in trust on behalf of the Investors through a custodian company wholly-owned by the Supervisor, called PMG Direct Office Fund Trustees Limited ('the Custodian').

The Fund was established on 14 December 2016, pursuant to a Master Trust Deed and an Establishment Deed dated 1 November 2016 between the Supervisor and the Manager as varied by deed from time to time in compliance with the FMCA ('the Trust Deeds'). Copies of the Trust Deeds can be found at www.business.govt.nz/disclose.

The Fund's primary purpose is to hold commercial property in a geographically diversified portfolio for rental income and potential capital appreciation.

This financial report is for the 3 ½ month period from 14 December 2016 to Balance Date being 31 March 2017.

Basis of preparation

As the Fund was established during the year these are the first financial statements prepared for the Fund. The financial statements have been prepared for the Fund by the Manager, on behalf of the Supervisor, in accordance with the requirements of the Financial Reporting Act 2013 (FRA), the FMCA and the provisions of the Trust Deeds.

The financial statements have been prepared in accordance with New Zealand Generally Accepted Accounting Practice ('NZ GAAP'). They comply with New Zealand Equivalents to International Financial Reporting Standards ('NZ IFRS') and other applicable financial reporting standards, as appropriate for tier 1 for-profit oriented entities. The financial statements also comply with the requirements of International Financial Reporting Standards ('IFRS').

The financial statements were authorised for issue by the directors of the Manager on 30 June 2017.

As required by FRS-42 – Prospective Financial Statements, the prospective financial information provided in the Product Disclosure Statement of the Fund, issued 1 November 2016, has been provided for comparative purposes in these financial statements. Any major variances in actual financial information compared to the prospective financial information are provided in note 22.

Basis of measurement

The financial statements have been prepared on the historical cost basis, and the going concern concept and the accrual basis of accounting have been adopted. Where required under NZ IFRS fair value measurement has been applied - see note of

These financial statements are presented in New Zealand Dollars ('\$'), which is also the Fund's functional currency. All information presented in New Zealand Dollars has been rounded to the nearest dollar.

The principal accounting policies adopted in the preparation of the financial statements are set out below.

New, revised or amending Accounting Standards and Interpretations adopted

The Fund has adopted all new, revised or amending Accounting Standards and Interpretations issued by the External Reporting Board ('XRB') that are mandatory for the current reporting period.

Any new, revised or amending Accounting Standards or Interpretations that are not yet mandatory have not been early adopted. The extent of the impact of such Standards or Interpretations on the financial statements of the Fund has not yet been determined.

Management are currently working through the assessed impact of the upcoming standards and once the impact of these standards has been fully assessed the fund will bring the relevant changes into account.

Note 1. Significant accounting policies (continued)

The following new Accounting Standards and Interpretations are likely to be most relevant to the Fund in future periods, but have not yet been adopted:

- NZ IFRS 15 Revenue from Contracts with Customers effective for periods beginning 1 January 2018. The
 standard contains a single model that applies to contracts with customers and two approaches to recognising
 revenue: at a point in time or over time. The model features a contract-based five-step analysis of transactions to
 determine whether, how much, and when revenue is recognised.
- NZ IFRS 9 Financial Instruments effective for periods beginning 1 January 2018. The new standard includes
 revised guidance on the classification and measurement of financial assets, including a new expected credit loss
 model for calculating impairment.
- NZ IFRS 16 Leases effective for periods beginning on or after 1 January 2019. The standard removes the
 classification of leases as either operating or finance leases for the lessee effectively treating all leases as finance
 leases. Lessor accounting remains like ourrent practice i.e. lessors continue to classify leases as finance and
 operating leases.

Operating segments

Operating segments are presented using the 'management approach', where the information presented is on the same basis as the internal reports provided to the Chief Operating Decision Makers ('CODM'). The CODM is responsible for the allocation of resources to operating segments and assessing their performance.

Revenue recognition

Revenue is recognised when it is probable that the economic benefit of a transaction will flow to the Fund and that revenue can be reliably measured. Revenue is measured at the fair value of the consideration received or receivable.

Rent

Rent revenue from investment properties is recognised on a straight-line basis over the lease term. Lease incentives granted are recognised as part of the rental revenue. Contingent rentals are recognised as income in the period when earned.

Operating Expenses recoveries

Operating Expenses recoveries revenue is recognised on an accrual basis as the expenses are incurred and expected to be recovered from tenants.

Interest

Interest revenue is recognised as interest accrues using the effective interest method. This is a method of calculating the amortised cost of a financial asset and allocating the interest income over the relevant period using the effective interest rate, which is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset to the net carrying amount of the financial asset.

Other revenue

Other revenue is recognised when it is received or when the right to receive payment is established.

Income tax

The Fund elected to be a Portfolio Investment Entity ('PIE') from the commencement date of the Fund and as such is not liable for income tax. However, the Fund is required to allocate income to investors under one of the options available under the PIE rules, daily or quarterly. The Fund distributes 100% of adjusted net income (being surplus less adjustments for fair value recognition) to investors and as a result the Fund has no undistributed surplus that would be liable for tax.

The Fund deducts tax at the investors prescribed investor rate of either 0%, 10.5%, 17.5% or 28%. The tax rate is capped at 28%. The tax deducted is a debt due to the crown and is paid directly to the inland Revenue Department on the investors' behalf. If any income is not allocated to investors it is liable for tax at 28%.

Note 1. Significant accounting policies (continued)

Financial Assets

Cash and cash equivalents

Cash and cash equivalents includes cash on hand, deposits held on call with financial institutions, and other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value. For the statement of cash flows presentation purposes, cash and cash equivalents also includes bank overdrafts, which are shown within borrowings in current liabilities on the statement of financial position when applicable. Cash and cash equivalents are classified as loans and receivables.

Trade and other receivables

Trade receivables are initially recognised at fair value and subsequently measured at amortised cost using the effective interest method, less any provision for impairment. Trade receivables are generally due for settlement within 30 days.

Collectability of trade receivables is reviewed on an ongoing basis. Debts which are known to be uncollectable are written off by reducing the carrying amount directly. A provision for impairment of trade receivables is raised when there is objective evidence that the Fund will not be able to collect all amounts due according to the original terms of the receivables. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation and default or delinquency in payments (more than 60 days overdue) are considered indicators that the trade receivable may be impaired. The amount of the impairment allowance is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the original effective interest rate. Cash flows relating to short-term receivables are not discounted if the effect of discounting is immaterial.

Other receivables are recognised at amortised cost, less any provision for impairment.

Both trade and other receivables are classified as loans and receivables.

Other financial assets

Other financial assets are initially measured at fair value. Transaction costs are included as part of the initial measurement. They are subsequently measured at amortised cost. Classification is determined based on the purpose of the asset and subsequent reclassification to other categories is restricted.

All financial assets are derecognised when the rights to receive cash flows from the financial assets have expired or have been transferred and the Fund has transferred substantially all the risks and rewards of ownership.

Impairment of financial assets

The Fund assesses at the end of each reporting period whether there is any objective evidence that a financial asset or group of financial assets is impaired. Objective evidence includes significant financial difficulty of the issuer or obligor; a breach of contract such as default or delinquency in payments; the lender granting to a borrower concessions due to economic or legal reasons that the lender would not otherwise do; it becomes probable that the borrower will enter bankruptcy or other financial reorganisation; the disappearance of an active market for the financial asset; or observable data indicating that there is a measurable decrease in estimated future cash flows.

The amount of the impairment allowance for financial assets carried at cost is the difference between the asset's carrying amount and the present value of estimated future cash flows, discounted at the current market rate of return for similar financial assets.

Investment properties

Investment properties principally comprise freehold land and buildings held for long-term rental and capital appreciation that are not occupied by the Fund. Investment properties are initially recognised at cost, including transaction costs, and are subsequently remeasured annually at fair value. Movements in fair value are recognised directly in profit or loss.

Investment properties are derecognised when disposed of or when there is no future economic benefit expected.

Notes to the Financial Statements For the period ended 31 March 2017

Note 1. Significant accounting policies (continued)

Leases

The determination of whether an arrangement is or contains a lease is based on the substance of the arrangement and requires an assessment of whether the fulfilment of the arrangement is dependent on the use of a specific asset or assets and the arrangement conveys a right to use the asset.

A distinction is made between finance leases, which effectively transfer from the lessor to the lessee substantially all the risks and benefits incidental to the ownership of leased assets, and operating leases, under which the lessor effectively retains substantially all such risks and benefits.

In all cases the Fund is not a lessee, but a lessor of investment property. The Fund only enters leases where it retains substantially all risk and ownership of the leased asset. All such leases are therefore classified as operating leases. All leased assets are included within investment Properties.

Impairment of non-financial assets

Non-financial assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount.

Recoverable amount is the higher of an asset's fair value less costs of disposal and value-in-use. The value-in-use is the present value of the estimated future cash flows relating to the asset using a pre-tax discount rate specific to the asset or cash-generating unit to which the asset belongs. Assets that do not have independent cash flows are grouped together to form a cash-generating unit.

Financial liabilities

Trade and other payables

These amounts represent liabilities for goods and services provided to the Fund prior to the end of the financial year and which are unpaid. They are initially recognised at fair value and subsequently measured at amortised cost. Due to their short-term nature, they are not discounted. The amounts are unsecured and are usually paid within 30 days of recognition, and as a result are recorded at the invoice amount with no accrued interest. Trade and other payable are classified as financial liabilities measured at amortised cost.

Borrowings

Loans and borrowings are initially recognised at the fair value of the consideration received, net of transaction costs. They are subsequently measured at amortised cost using the effective interest method. They are classified as financial liabilities measured at amortised cost.

Derivative financial instruments

The Fund enters interest rate swaps. These are classified as financial assets or liabilities at fair value through the profit or loss on initial recognition. They are initially recognised at fair value on the date a derivative contract is entered and are subsequently remeasured to their fair value at each reporting date. The accounting for subsequent changes in fair value is recorded directly in profit or loss.

Due to their nature, derivative financial instruments are classified as financial assets or liabilities

Finance costs

Finance costs attributable to qualifying assets are capitalised as part of the asset. All other finance costs are expensed in the period in which they are incurred.

Provisions

Provisions are recognised when the Fund has a present (legal or constructive) obligation because of a past event, it is probable the Fund will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. The amount recognised as a provision is the best estimate of the consideration required to settle the present obligation at the reporting date, considering the risks and uncertainties surrounding the obligation. If the time value of money is material, provisions are discounted using a current pre-tax rate specific to the liability. The increase in the provision resulting from the passage of time is recognised as a finance cost.

Notes to the Financial Statements For the period ended 31 March 2017

Note 1. Significant accounting policies (continued)

Fair value measurement

When an asset or liability, financial or non-financial, is measured at fair value for recognition or disclosure purposes, the fair value is based on the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date; and assumes that the transaction will take place either: in the principal market; or in the absence of a principal market, in the most advantageous market.

Fair value is measured using the assumptions that market participants would use when pricing the asset or liability, assuming they act in their economic best interests. For non-financial assets, the fair value measurement is based on its highest and best use. Valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, are used, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

Assets and liabilities measured at fair value are classified, into three levels, using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. Classifications are reviewed at each reporting date and transfers between levels are determined based on a reassessment of the lowest level of input that is significant to the fair value measurement.

For recurring and non-recurring fair value measurements, external valuers may be used when internal expertise is either not available or when the valuation is deemed to be significant. External valuers are selected based on market knowledge and reputation. Where there is a significant change in fair value of an asset or liability from one period to another, an analysis is undertaken, which includes a verification of the major inputs applied in the latest valuation and a comparison, where applicable, with external sources of data.

Issued units

Units Issued are classified as equity.

Incremental costs directly attributable to the issue of new units are shown in equity as a deduction, net of tax, from the proceeds from issue of those units.

Distributions

Distributions are recognised when declared during the financial year and no longer at the discretion of the Fund.

Goods and Services Tax ('GST') and other similar taxes

Revenues, expenses and assets are recognised net of the amount of associated GST, unless the GST incurred is not recoverable from the Inland Revenue Department. In this case, it is recognised as part of the cost of the acquisition of the asset or as part of the expense.

Receivables and payables are stated inclusive of the amount of GST receivable or payable. The net amount of GST recoverable from, or payable to, the tax authority is included in other receivables or other payables in the statement of financial position.

Cash flows are presented on a gross basis. The GST components of cash flows arising from investing or financing activities which are recoverable from, or payable to the tax authority, are presented as operating cash flows.

Commitments and contingencies are disclosed net of the amount of GST recoverable from, or payable to, the tax authority.

Insurance costs

Insurance premiums form part of the property operating expenses and are charged to tenants where the lease agreement allows.

Impairment of non-financial assets

The Fund assesses impairment of non-financial assets at each reporting date by evaluating conditions specific to the Fund and to the asset that may lead to impairment. If an impairment trigger exists, the recoverable amount of the asset is determined. This involves fair value less costs of disposal or value-in-use calculations, which incorporate several key estimates and assumptions.

Note 1. Significant accounting policies (continued)

Management Fees

The Manager is entitled to a management fee equal to:

0.5% of the carrying value of the investment property assets in the Fund, based on the carrying value as at the beginning of the applicable financial year (i.e. 1 April) and a property management fee equal to 2.00% of the gross annual rental of the investment property assets in the Fund. The management fees are paid to the Manager monthly in respect of the property and funds management services provided by the Manager during the prior month.

Performance Fee

The Manager is entitled to a performance fee equivalent to 20% of the excess performance above the Fund's performance benchmark (Performance Fee). The current performance benchmark is the average 10-year government bond yield plus 6%. Performance is measured by the annual capital and income returns to Investors at the end of each financial year against the performance benchmark. If this performance measurement is a negative return, no performance fee is payable in respect of that year.

Property Project Fees

The Manager is entitled to on acquisition of a new property by the Fund, a fee equal to 1% of the acquisition price of the property with a minimum fee of \$150,000 per property (Acquisition Fee) (such fees will no longer be payable if the Fund's value exceeds \$250 million); on disposal of a property held by the Fund, a fee equal to 1% of the sales price for the property is also payable to the manager if the fund undertakes an investigation into the acquisition of a new property or disposal of an existing property in the Fund, a fee (Investigation Fee), on a time and attendance basis, as agreed between the Manager and Supervisor is payable, if the Manager is paid an investigation Fee and the relevant transaction subsequently proceeds, an amount equal to the investigation Fee will be deducted from the Acquisition Fee.

If construction or refurbishment is undertaken on a property held by the Fund, a fee equal to 5% of the development costs is payable (provided that those development costs exceed \$50,000). The Manager is entitled to recover any costs incurred by the Manager from any consultants or advisers engaged in relation to property acquisition, disposal, investigation, construction or refurbishment subject to those costs being approved by the Supervisor.

Supervisor's Fees

The Supervisor is entitled to an annual base fee, as agreed between the Manager and Supervisor. This must not exceed 0.06% per annum of the Net Asset Value (NAV) of the Fund (subject to a minimum annual fee of \$20,000). Special fees are payable, in amounts agreed with the Manager, for any services provided by the Supervisor of an unusual or onerous nature outside of the Supervisor's regular services.

Recovery of Expenses

The Manager and Supervisor are entitled to be reimbursed by the Fund for certain fees and expenses. These include costs incurred in connection with this Offer, the acquisition of Properties, the investigation and negotiation of additional properties for the Fund, the fees and expenses of the fund's auditor, any fees or expenses incurred for any engagement by the Supervisor or as required by law, any taxes, duties, imposts or levies charged to the Manager or Supervisor in connection with the Fund, the costs of convening and holding investor meetings, professional services fees (legal, accounting, etc) incurred by the Manager or Supervisor in the discharge of their duties under the Master Trust Deed, communication and postage costs, expenses relating to the Unit registrar, and any other expenses properly and reasonably incurred by the Manager or Supervisor in connection with carrying out their duties under the Master Trust Deed.

Sub-contracted investment and administration services

If the Manager sub-contracts investment management or administration services, the providers of those services will be paid a reasonable fee on normal commercial terms, and will be entitled to be reimbursed for any costs, charges or disbursements, out of the Fund.

Other fees

If the Manager, with the approval of the Supervisor, undertakes any works related to any of the properties in the Fund that do not fit within any of the obligations contemplated under schedule of the Establishment Deed related to fees, the Manager is entitled to be paid out of the Fund such fees for those works calculated on a "time in attendance" market rate, as agreed between the Manager and Supervisor.

Note 2. Critical accounting judgements, estimates and assumptions

The preparation of the financial statements requires management to make judgements, estimates and assumptions that affect the reported amounts in the financial statements. Management continually evaluates its judgements and estimates in relation to assets, liabilities, contingent liabilities, revenue and expenses. Management bases its judgements, estimates and assumptions on historical experience and on other various factors, including expectations of future events, that management believes to be reasonable under the circumstances. The resulting accounting judgements and estimates will seldom equal the related actual results. The judgements, estimates and assumptions that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial year are discussed below.

Fair value measurement hierarchy

The Fund is required to classify all assets and liabilities, measured at fair value, using a three level hierarchy, based on the lowest level of input that is significant to the entire fair value measurement, being: Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date; Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or Indirectly; and Level 3: Unobservable inputs for the asset or liability. Considerable judgement is required to determine what is significant to fair value and therefore which category the asset or liability is placed in can be subjective.

Valuation of the Investment Properties are based on key estimates and judgements. These are made in the choice of Inputs used in the valuation of the Funds Investment Assets by the external Independent Valuer. Note 9 presents an analysis of the Key Inputs used in these valuations.

The fair value of assets and liabilities classified as level 3 is determined using valuation models. These include discounted cash flow analysis or the use of observable inputs that require significant adjustments based on unobservable inputs. Whilst these may be provided by an independent third party, they are still inherently subject to significant estimation, judgement and use of assumptions.

Note 3. Operating segments

Identification of reportable operating segments

The Fund consists of only one operating segment; commercial office property rental. This is based on the internal reports that are reviewed and used by the Board of Directors of the Manager (who are identified as the Chief Operating Decision Makers ('CODM')) in assessing performance and in determining the allocation of resources. There is no aggregation of operating segments. The CODM reviews EBITDA (earnings before interest, tax, depreciation and amortisation). The accounting policies adopted for internal reporting to the CODM are consistent with those adopted in the financial statements. The information reported to the CODM is on at least a monthly basis

Types of products and services

The principal products and services of the only operating segment are the provision of commercial office properties for rent across the Upper North Island of New Zealand.

Major customers

During the period ended 31 March 2017 no customers individually generated greater than 10% of revenue for the Fund.

Key metrics

As there is only one operating segment, all figures throughout the financial statements are applicable to the only operating segment.

Geographical location of non-current assets

All non-current assets are located within the Upper North Island of New Zealand.

Note 4. Revenue

2017 \$

Sales revenue
Rent from investment properties
Operating expenses recoveries

1,075,517 257,417 1,332,934

Notes to the Financial Statements For the period ended 31 March 2017

Note 5. Specific expenses

	2017 \$
Net profit before tax includes the following specific expenses:	
Property operating expenses Expenses on investment property that generated rental income	326,115
Administrative Auditors remuneration - Audit of the Fund's financial statements	22,000
Net finance expenses Interest and finance charges paid/payable Interest revenue	245,789 (1,725) 244,064
Note 6. Cash and cash equivalents	
	2017 \$
Cash at bank – ASB Bank Limited	145,260
	145,260

All cash and cash equivalents are held with ASB Bank, a financial institution counterparty, who are rated AA-, based on rating agency Standard and Poors.

Note 7. Trade and other receivables

	2017 \$
Trade receivables	18,526
	18,526
GST receivable Interest receivable	87,413
	105,939

Impairment of receivables

The Fund has recognised no amount in profit or loss in respect of impairment of receivables for the period ended 31 March 2017.

Past due but not impaired

There are no customers with balances past due but without provision for impairment of receivables as at 31 March 2017.

The Fund did not consider a credit risk on the aggregate balances after reviewing the credit terms of customers based on recent collection practices.

Note 8. Other current assets	2017 \$
Accrued revenue Prepayments Deferred expenses	11,013
	11,013
Note 9. Investment properties	2017 \$
Investment properties - at independent valuation	47,825,000
Reconciliation Reconciliation of the fair values at the beginning and end of the current financial year are set out below:	
Opening fair value Acquisition of investment property at cost Capital additions to investment property at cost Revaluation increments Revaluation decrements	45,560,000 283,677 1,981,323
Closing fair value	47,825,000

Acquisition of investment properties

During the period the Fund purchased eight investment properties. Their purchase cost was equivalent to their fair value at that time.

Valuations of investment properties

The basis of the valuation of investment properties is fair value, being the amounts for which the properties could be exchanged between willing parties in an arm's length transaction, based on current prices in an active market for similar properties in the same location and condition, subject to similar leases and takes into consideration occupancy rates and returns on investment. The investment properties are revalued annually based on independent assessments by a member of the Property Institute of New Zealand.

Valuation to market value is performed based on a variety of complementary approaches, including the income approach (direct capitalisation), the cost approach, and discounted cash flow approach, establishing value based on potential highest and best use of the properties. This considers recent sales evidence, market rental analysis and contract rental analysis, amongst other matters. A summary of the fair value of each investment property is provided further in this note.

Note 9. Investment Properties (continued)

Summary of investment properties held at 31 March 2017:

Property	Cost at acquisition	Capital cost during period	Fair valuation movement	Fair value at 31 March 2017
52 Lovegrove Crescent, Otara, Auckland	3,950,000	9,500	15,500	3,975,000
5 Short Street, Newmarket, Auckland	14,200,000	72,171	877,829	15,150,000
2 Robert Street, Ellerslie, Auckland	8,850,000	8,299	41,701	8,900,000
22 Amersham Way, Manukau, Auckland	7,300,000	188,812	11,188	7,500,000
143 Durham Street, Tauranga	4,850,000	960	324,040	5,175,000

1214 Ranolf Street, Rotorua	Telfer Young (Rotorua) Ltd	131,000	7.6%	2.0 years

Fair value measurement

Fair value hierarchy

The following tables detail the Fund's assets and liabilities, measured or disclosed at fair value, using a three-level hierarchy, based on the lowest level of input that is significant to the entire fair value measurement, being:

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly

Level 3: Unobservable inputs for the asset or liability

Investment properties are the only assets carried at fair value, and they are included within level 3 of the fair value hierarchy. They have a carrying value of \$47,825,000,

Derivative financial instruments are the only liabilities carried at fair value, and they are included within level 2 of the fair value hierarchy. They have a carrying value of \$59,086.

There were no transfers between levels during the financial period.

The carrying amounts of trade and other receivables, trade and other payables and distributions payable are assumed to approximate their fair values due to their short-term nature.

The fair value of financial liabilities is estimated by discounting the remaining contractual maturities at the current market interest rate that is available for similar financial liabilities,

Valuation techniques for fair value measurements categorised within level 2 and level 3

Investment properties have been valued based on similar assets, location and market conditions. The valuation techniques per note 9 rely on significant inputs such as market rental yield, rental growth rates, vacancy rates, market capitalisation rates and discount rates.

Note 9. Investment Properties (continued)

Generally, a change in the market capitalisation rate is accompanied by a directionally similar change in the discount rate. The adopted market capitalisation rate forms part of the direct capitalisation approach and the discount rate forms part of the discounted cash flow approach. Both valuation methodologies are considered when determining fair value of investment property.

When performing the direct capitalisation approach, the market rental has a strong interrelationship with the market capitalisation rate given the methodology involves assessing the total market rental income receivable from the property and capitalising this in perpetuity to derive a capital value. In theory, an increase in the market rent and an increase in the market capitalisation rate could potentially offset the impact to fair value. The same can be said for a decrease in the market rent and a decrease in the adopted market capitalisation rate. A directionally opposite change in the market rent and the adopted market capitalisation rate could potentially magnify the impact on fair value.

When performing a discounted cash flow valuation, the discount rate and terminal yield (a factor of market yield and growth rate) have a strong interrelationship in deriving fair value given the discount rate will determine the rate at which the terminal value is discounted to present value. In theory, an increase in the adopted discount rate and a decrease in the terminal yield could potentially offset the impact to fair value. The same can be said for a decrease in the discount rate and an increase in the terminal yield. A directionally similar change in the discount rate and the terminal yield could potentially magnify the Impact on fair value.

Level 3 assets and liabilities

Movements in level 3 assets and liabilities during the current and previous financial year are set out below:

Investment properties

\$

Additions Gains recognised in profit or loss 45,843,677 1,981,323

Balance at 31 March 2017

47,825,000

The key level 3 unobservable inputs and the valuation sensitivity is as follows:

Description	Unobservable inputs	Range (weighted average)
Investment properties	Rental yield Rental growth Market capitalisation rate Discount rate	7.6% to 9.0% (8.3%) 1.25% to 1.75% (1.50%) 6,5% to 8,5% (7,5%) 7.0% to 9.5% (8.25%)

Sensitivity Analysis

At 31 March it is estimated a general decrease in the value of the investment properties of 1% would have decreased the Groups profit before income tax by \$478,250.

Note 10. Trade and other payables

2017

Trade payables PIE Tax payable 168,521 37,212

205,733

Note 11. Derivative financial instruments

2017 \$

Interest rate swaps - ASB Bank Limited

59,086

The Fund entered into two interest rate swap agreements with the ASB Bank on 14 December 2016. The Fund is a fixed rate payer under the terms of these agreements. Specific details are as follows:

Details	Maturity date	Notional value	Fixed interest rate	Fair value \$
Interest rate swap 1 Interest rate swap 2	14 December 2018 16 December 2019	4,000,000 8,000,000	2,4900% 2,7175%	(14,857) (44,229)
		12,000,000	=	(59,086)

Payments are made monthly in accordance with the terms of the swap agreements. There is no difference between the fair value and the amounts the Fund is contractually required to pay at maturity.

Refer to note 16 for further information on financial instruments.

Note 12. Other current liabilities

	2017 \$

Balance	31 March 2017	28,000,000	1	27,088,989

Units

Units entitle the investor to participate in distributions and the proceeds on the winding up of the Fund in proportion to the number of and amounts paid on the units held. The fully paid units have no par value and the Fund's limit on the number of authorised units on issue is currently being met.

On a show of hands every investor present at a meeting in person or by proxy shall have one vote and upon a poll each share shall have one vote.

Unit buy-back

There is no current on-market unit buy-back.

Capital risk management

The Fund's objectives when managing capital (Total Equity) is to safeguard its ability to continue as a going concern, so that it can provide returns for investors and benefits for other stakeholders and to maintain an optimum capital structure to reduce the cost of capital.

To maintain or adjust the capital structure, the Fund may adjust the amount of distributions paid to investors, return capital to investors, issue new units or sell assets to reduce debt.

The Fund would look to raise capital when an opportunity to invest in further investment property was value adding relative to the Fund's financial position and performance at the time of raising capital. The Fund is not actively pursuing additional investments in the short term as it continues to focus on maximising its returns from its existing property portfolio.

The Fund is subject to certain covenants and meeting these is given priority in all capital risk management decisions. There have been no events of default on the financing arrangements during the financial year.

2047

Note 15. Distributions

Distributions

Distributions paid and payable during the financial year were as follows:

	\$
Distribution paid for period ended 31 December 2016 31.99 cents per unit Distribution paid for period ended 31 January 2017 58.34 cents per unit Distribution paid for period ended 28 February 2017 58.34 cents per unit Distribution payable for period ended 31 March 2017 58.34 cents per unit	89,570 163,333 163,333 163,333
	579,569

On 31 March 2017 the directors of the Manager declared a final distribution for the period ended 31 March 2017 of 58.34 cents per unit which was paid on 25 April 2017, a total distribution of \$163,333 based on the number of units on issue as at 31 March 2017. As the Fund is a PIE, income tax will be deducted from this distribution per unit by the Fund at each Investors' respective Prescribed Investor Rate.

PIE tax deducted at source

During the financial period, the Fund deducted \$60,945 from distributions made to investors. \$37,212 remains payable at 31 March 2017 and is shown on the statement of financial position.

Note 16. Financial instruments

Financial risk management objectives

The Fund's activities expose it to a variety of financial risks: market risk (including price risk and interest rate risk), credit risk and liquidity risk. The Fund's overall risk management program focuses on the unpredictability of financial markets and seeks to minimise potential adverse effects on the financial performance of the Fund. The Fund uses derivative financial instruments such as interest rate swaps to hedge certain risk exposures. Derivatives are exclusively used for hedging purposes, i.e. not as trading or other speculative instruments. The Fund does not apply Hedge accounting principles in relation to their Interest Rate swap.

The Fund uses different methods to measure different types of risk to which it is exposed. These methods include sensitivity analysis in the case of interest rate and other price risks, ageing analysis for credit risk and a combination of occupancy and yield analysis in respect of investment portfolios to determine market risk.

Risk management is carried out by senior executives ('Executives') under policies approved by the Supervisor ('the Board'). These policies include identification and analysis of the risk exposure of the Fund and appropriate procedures, controls and risk limits. Executives identify, evaluate and hedge financial risks within the Fund, and they report to the Board monthly.

Market risk

Price risk

The Fund's main price risk arises from its investment property. Buildings that are not fully occupied, or are not appropriately positioned in the market, expose the Fund to price risk and fair value risk. The Fund's policy is to maintain a strategic refurbishment and leasing plan that is conservative and achievable, through utilisation of in-house specialist property management experience to enable value-add repositioning opportunities capable of increasing rental income across the Fund's property portfolio. All the Fund's properties are assessed at least annually against several key metrics to determine whether property should be sold or remain in the Fund. The sensitivities of key price inputs are disclosed in Note 9.

Interest rate risk

The Fund's main interest rate risk arises from long-term borrowings. Borrowings issued at variable rates expose the Fund to interest rate risk. The policy is to hedge this risk by maintaining interest rate swap agreements with a combination of maturities.

The Fund's bank loans outstanding, totalling \$18,542,402, are interest-only payment loans. Monthly cash outlays of approximately \$65,000 per month are required to service the interest payments. An official increase/decrease in interest rates of 100 basis points would have an adverse/favourable effect on profit before tax of \$59,086 per annum.

Credit risk

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Fund. The Fund has a strict code of credit, including obtaining agency credit information, confirming references and setting appropriate credit limits. The maximum exposure to credit risk at the reporting date to recognised financial assets is the carrying amount, net of any provisions for impairment of those assets, as disclosed in the statement of financial position and notes to the financial statements. The Fund does not hold any collateral.

Credit risk in respect of derivative financial instruments is accounted for in the fair valuation of those instruments. The impact of credit risk on the valuation of the derivative financial instruments held by the Fund is however considered to be immaterial and thus changes in fair value attributable to changes in credit risk of counter parties (or the Fund) are not separately disclosed.

Liquidity risk

Note 16, Financial instruments (continued)

The Fund manages liquidity risk by maintaining adequate cash reserves and available borrowing facilities by continuously monitoring actual and forecast cash flows and matching the maturity profiles of financial assets and liabilities.

Financing arrangements

Unused borrowing facilities at the reporting date:

2017 \$

Bank overdraft Bank loans

3,122,598 3,122,598

The bank loan facilities may be drawn at any time and may be terminated by the bank without notice. Subject to the continuance of satisfactory credit ratings, the bank loan facilities may be drawn at any time and have an average maturity on a rolling 3 year facility.

Remaining contractual maturities

The following tables detail the Fund's remaining contractual maturity for its financial instrument liabilities. The tables have been drawn up based on the undiscounted cash flows of financial liabilities based on the earliest date on which the financial liabilities are required to be paid. The tables include both interest and principal cash flows disclosed as remaining contractual maturities and therefore these totals may differ from their carrying amount in the statement of financial position.

2017	Weighted average interest rate %	1 year or less \$	Between 1 and 2 years \$	Between 2 and 5 years \$	Over 5 years \$	Total \$
Non-derivatives						
Non-interest bearing	O.	don rad		_	_	168,521
Trade payables	-%	168,521	.=	· T	.77	
Other payables	-%	152,415	*	*	•	152,415
Distributions payable	-%	163,333	-	-	-	163,333
PIE Tax Payable	-%	37,212				37,212
Interest-bearing - floating rate						
Bank loans	4.05%	750,951	750,951	19,105,213		20,607,115
Total non-derivatives	1100,0	1,273,308	750,951	19,105,213	-	21,129,472
Local Hott-delivatives		1,210,000			*	
Derivatives						
	4.63-4.86%	90,200	67,500	49,650		207,500
Interest Rate Swaps	4,05-4,00%		67,500	49,650		207,500
Total derivatives		90,200	07,000	43,000		207,000

The cash flows in the maturity analysis above are not expected to occur significantly earlier than contractually disclosed above.

The 30 day BKBM spot rate as at 31 March 2017 has been used to forecast the floating rate cashflows on the loans and swaps.

In managing interest rate risks the Fund aims to reduce the impact of short term fluctuations on the Funds earnings. Over the longer term permanent changes in the interest rates will have an impact on profit.

At 31 March it is estimated that a general increase of 1% in interest rates would have decreased the Funds profit before income tax of \$65,424. This was calculated by reference to an increase to the floating rate on the loans that do not have derivatives in place.

Fair value of financial instruments

Unless otherwise stated, the carrying amounts of financial instruments reflect their fair value.

Note 17. Contingent liabilities

There are no contingent liabilities to disclose in the financial statements.

Note 18, Commitments

2017 \$

Capital commitments

Committed at the reporting date but not recognised as liabilities:

Investment properties

90,062

Commitments to capital expenditure on investment properties relate to fit out commitments of two tenancies in the Newpark property.

Note 19. Related party transactions

The Fund's related parties consist of the Manager, the Supervisor, and members of key management personnel of the Manager and the Supervisor.

Transactions with related parties

The following transactions occurred with related parties:

	2017 \$
Payment for goods and services: Payment of Property Fund and management fees to the Manager Payment of Project Management fees to the Manager Payment of Performance fees to the Manager Payment of Supervisor fees to the Supervisor	93,344 21,626 89,182 5,924
Income was received by the Fund for Rent paid by the Manager for office in 5 Short Street, Newmarket	4,486
Investments in the Fund: Issuance of units to Denis McMahon Family Trust (Manager-related entity, Denis McMahon, is a Director of the Manager) Distribution made to Denis McMahon Family Trust	200,000 4,140

Receivable from and payable to related parties

The following balances are outstanding at the reporting date in relation to transactions with related parties:

	2017 \$
Current payables:	
Trade payables to the Manager	120,549
Trade payables to the Supervisor	5,000
Distribution payable to Denis McMahon Family Trust	1.167

Loans to/from related parties

There were no loans to or from related parties at the current reporting date.

Terms and conditions

All transactions were made on normal commercial terms and conditions and at market rates.

Note 20. Events after the reporting period

No matter or circumstance has arisen since 31 March 2017 that has significantly affected, or may significantly affect the Fund's operations, the results of those operations, or the Fund's state of affairs in future financial years.

Note 21. Reconciliation of profit after income tax to net cash from operating activities	2017 \$
Profit after income tax expense for the year	2,454,823
Adjustments for: Net fair value movement on investment properties Net fair value movement on derivative financial instruments	(1,981,323) 59,086
Change in operating assets and liabilities: Increase in trade and other receivables Increase in other current assets Increase in trade and other payables Increase in other current liabilities	(105,939) (11,013) 205,733 152,415
Net cash inflow/(outflow) from operating activities	773,782

Note 22. Comparison to prospective financial statements

A comparison to the prospective financial statements, as issued in the Product Disclosure Statement (PDS) issued 1 November 2016, has been provided below. The key differences between actuals and the product disclosure statement are noted below:

Statement of Financial Position and Changes in Equity

- The PDS did not include fair valuation of investment property.
- Capital expenditure was less than budgeted due to a number of reasons including capital expenditure being deferred to 2018 year and Securing tenants without having to spend budgeted tenancy fit out.
- The minimum Raise of \$28m units was allotted, the PDS was budgeted at maximum Raise of \$29m
- The distribution was reduced due to settlement of the properties 7 days later than budgeted.

Statement of Profit or Loss and Other Comprehensive Income

- Property Managers Limited is entitled to a performance fee based on performance of the Fund. The Prospective Financial Statements had no performance fee payable in them.
- The properties were settled on 14th December 2016 and the Prospective Financial Statements were based on a settlement of 7 December 2016.

Statement of Cash Flows

- Reduced capital expenditure
- Closed based on minimum Raise (PDS was on maximum Raise)

PMG Direct Office Fund

Independent Auditor's Report to the Investors of PMG Direct Office Fund

Opinion

We have audited the financial statements of PMG Direct Office Fund (the Fund) on pages 3 to 26, which comprise the statement of financial position as at 31 March 2017, and the statement of profit or loss and other comprehensive income, statement of changes in equity and statement of cash flows for the period then ended, and notes to the financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying financial statements present fairly, in all material respects, the financial position of the Fund as at 31 March 2017, and its financial performance and its cash flows for the year then ended in accordance with *New Zealand equivalents to International Financial Reporting Standards* (NZ IFRS).

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (New Zealand) (ISAs (NZ)). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Fund in accordance with Professional and Ethical Standard 1 (Revised) Code of Ethics for Assurance Practitioners issued by the New Zealand Auditing and Assurance Standards Board and the International Ethics Standards Board for Accountants' Code of Ethics for Professional Accountants (IESBA Code), and we have fulfilled our other ethical responsibilities in accordance with these requirements and the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Other than in our capacity as auditor we have no relationship with, or interests in, the PMG Direct Office Fund.

Other Information

The directors are responsible for the other information. The other information comprises the Chairman's Report which is expected to be made available to us after the date of the audit report.

Our opinion on the financial statements does not cover the other information and we do not express any form of audit opinion or assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit or otherwise appears to be materially misstated.

Crowe Horwath...

If, based on the work we have performed on the other information that we obtained prior to the date of this auditors report, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Directors' Responsibilities for the Financial Statements

The directors are responsible on behalf of the entity for the preparation and fair presentation of the financial statements in accordance with NZ IFRS, and for such internal control as the directors determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Fund's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Fund or to cease operations, or have no realistic alternative but to do so.

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (NZ) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs (NZ), we exercise professional judgement and maintain professional scepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud
 or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is
 sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material
 misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve
 collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that
 are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
 effectiveness of the Fund's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of the use of the going concern basis of accounting by the directors and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Fund to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the
 disclosures, and whether the financial statements represent the underlying transactions and events in a
 manner that achieves fair presentation.

We communicate with the directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during the audit.

We also provide the directors with a statement that the we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with the directors, we determine those matters that are of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.
