

For the quarter ended 31 December 2025

## NZ Funds Active Series Global Property

This fund update was first made publicly available on 16 February 2026

### What is the purpose of this update?

This document tells you how the Global Property fund has performed and what fees were charged. The document will help you to compare the fund with other funds. New Zealand Funds Management Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

### Description of this fund

The objective of the Global Property fund is to mitigate the impact of inflation on your investment over the medium and/or long term with active management. The fund is anticipated to mainly own and trade international property company shares. The fund may also hold other actively managed authorised asset classes.

Total value of the fund	\$49,332,958
The date the fund started	17 March 2023

### What are the risks of investing?

Risk indicator for the Global Property fund:<sup>1</sup>

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at <https://portal.nzfunds.co.nz/RiskLaunch>.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

The risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five years to 31 December 2025<sup>1</sup>. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

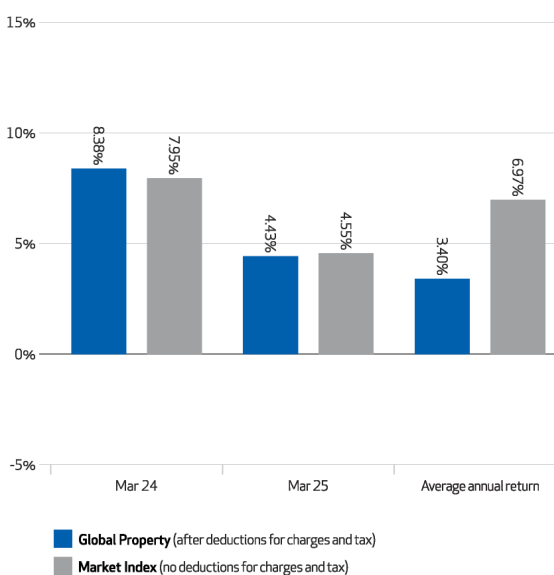

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

### How has the fund performed?

	Past year
<b>Annual return</b> (after deductions for charges and tax)	-2.15%
<b>Annual return</b> (after deductions for charges but before tax)	-1.82%
<b>Market index annual return</b> (reflects no deduction for charges and tax)	5.37%

The market index annual return is based on a composite index calculated using the market indices and weightings set out in the Statement of Investment Policy and Objectives. On 28 October 2025, the market index was changed to reflect a change in the implementation of the investment strategy of the fund. Additional information about the market index is available on the offer register at [www.companiesoffice.govt.nz/disclose](http://www.companiesoffice.govt.nz/disclose).

#### Annual return graph<sup>2</sup>

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 31 December 2025.

**Important:** This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

## What fees are investors charged?

Investors in the Global Property fund are charged fund charges. In the year to 31 March 2025 these were:

	% of net asset value
<b>Total fund charges</b>	2.85%
Which are made up of:	
<b>Total management and administration charges</b>	2.85%
Including:	
Manager's basic fee	2.63%
Other management and administration charges	0.22%
<b>Total performance-based fees</b>	0.00% <sup>3</sup>

For the 12 months to 31 December 2025, manager's basic fee was 2.20%. As a result, total fund charges for that period totalled 2.57%.

Investors may also be charged individual action fees for specific actions or decisions (for example, if an investor has a financial adviser and has agreed to pay a fee to the adviser for providing financial advice). NZ Funds does not currently charge any establishment, contribution, termination, withdrawal or switch fees. See the PDS for the NZ Funds Active Series for more information about fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

## Example of how this applies to an investor

Liam had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Liam incurred a loss after fund charges were deducted of -\$215 (that's -2.15% of his initial \$10,000). Liam did not pay any other charges. This gives Liam a total loss after tax of -\$215 for the year.

## What does the fund invest in?

This shows the types of assets that the fund invests in.

### Actual investment mix<sup>4</sup>

### Target investment mix<sup>5</sup>

Cash and cash equivalents	2%
New Zealand fixed interest	4%

## Further information

---

You can also obtain this information, the PDS for the NZ Funds Active Series, and some additional information from the offer register at [www.companiesoffice.govt.nz/disclose/](http://www.companiesoffice.govt.nz/disclose/).

## Notes

1. As the fund was registered on 14 February 2023, and commenced its business on 17 March 2023, actual returns for the last five years are not available. To calculate the risk indicator, a combination of actual returns and market index returns have been used. Market index returns were used for the period prior to 17 March 2023. As a result, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund.
2. The bar graph shows fund returns after the deduction of fees and tax; however, the market index returns are shown before any fees or tax are deducted.
3. Total performance based fees are paid with respect to certain related underlying funds managed by NZ Funds and are payable where performance of the underlying funds exceeds the hurdle rate. Details of the underlying funds to which a performance fee applies can be found in the PDS, along with details of the hurdle rate and the percentage amount of the performance fee applying to each underlying fund.
4. NZ Funds uses derivatives as part of its active management approach. The use of derivatives can result in the total economic exposure of the fund exceeding 100% which means the fund is leveraged. Where economic exposure exceeds 100%, the actual investment mix pie graph has been scaled to 100%.

Without scaling, the total economic exposure of the fund, as shown in the actual investment mix would be 100.85%, made up as follows: International fixed interest 0.02% and Listed property 100.83%.

For more information on the calculation of economic exposure and the use of leverage, see the Other Material Information document.

5. Targets indicate what are expected to apply over the course of an economic cycle and should be considered as general guidance only. NZ Funds is an active manager and may use investment strategies that differ materially from the targets.
6. The top 10 investments have been compiled using a balance sheet approach. This differs from the approach used in compiling the actual and target investment mixes, which include the impact of derivatives.
