Description of this fund

Objective: To provide long-term capital growth by gaining exposure to a diversified portfolio of securities associated with approved developed markets (excluding Australia), with increased emphasis on higher expected return securities. The fund also considers non-financial factors to target sustainability goals. The Fund also takes into account certain non-financial Sustainability Considerations when making investment decisions. The Fund has a Portfolio Carbon Footprint Reduction Goal and seeks to exclude companies involved in particular business practices. The fund mitigates currency risk by hedging most major foreign currency exposures to the New Zealand dollar.

Strategy: The fund is expected to be fully invested. A portion of the portfolio may be allocated to cash and cash equivalents for liquidity purposes. The fund is not managed with the objective of achieving a particular return relative to a benchmark index. However, to compare the performance of the fund with a broad measure of market performance, reference may be made to the MSCI World ex Australia Index (net div., hedged to NZD).

Notes

1. A combination of actual fund returns and market index returns have been used to determine the risk indicator as the fund has not been operating for the required five years. Market index returns have been used until 30 June 2022 and fund returns thereafter. The risk indicator may therefore provide a less reliable indicator of the fund's future volatility.
2. The bar chart shows fund returns after deducting fees and tax. Tax is deducted at the highest Prescribed Investor Rate of 28%. However, the market index returns are shown before deducting fees and tax.
