

Fisher Funds KiwiSaver Plan Fund Update

Default Fund

For the quarter ended: 30 September 2024
This fund update was first made publicly available on:
29 October 2024.

What is the purpose of this update?

This document tells you how the Default Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Fisher Funds Wealth Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

Description of this fund

The fund aims to provide a balance between stability of returns and growing your investment over the long term by investing in a mix of income and growth assets. An enhanced passive investment style may be used at times.

Total value of the fund	\$785,450,040
Number of investors in the fund	69,847
The date the fund started	1 December 2021

What are the risks of investing?

Risk indicator for the Default Fund¹:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at sorted.org.nz/tools/investor-profiler.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the past 5 years. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the [product disclosure statement \(PDS\)](#) for more information about the risks associated with investing in this fund.

How has the fund performed?

	Past year
Annual return (after deductions for charges and tax)	13.36%
Annual return (after deductions for charges but before tax)	15.86%
Market index annual return (reflects no deduction for charges and tax)	16.94%

The market index is a composite of S&P and Bloomberg published and unpublished indices, weighted for the fund's target investment mix. The specific indices used for each asset class are set out in the Statement of Investment Policy and Objectives (SIPO). Additional information about the market index is available on the offer register at disclose-register.companiesoffice.govt.nz under Fisher Funds KiwiSaver Plan or OFR10715.

Annual return graph

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 30 September 2024.

Important: This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower. The market index return reflects no deduction for charges and tax.

What fees are investors charged?

Investors in the Default Fund are charged fund charges. In the year to 31 March 2024 these were:

	% of net asset value
Total fund charges	0.36%
Which are made up of:	
Total management and administration charges	0.36%
Including:	
Manager's basic fee	0.36%
Other management and administration charges	0.00%

Example of how this applies to an investor

Alice had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Alice received a return after fund charges were deducted of \$1,336 (that is 13.36% of her initial \$10,000). This gives Alice a total return after tax of \$1,336 for the year.

An annual fund charge of 0.37% applies to Default Fund investments – unless your Default Fund balance is \$1,500 or less, in which case no annual fund charge applies.

Small differences in fees and charges can have a big impact on your investment over the long term.

GST is not included in any of the fees stated and will be added where required.

What does the fund invest in?

Actual investment mix

This shows the types of assets that the fund invests in.

Cash and cash equivalents	9.38%
New Zealand fixed interest	20.79%
International fixed interest	13.72%

Further information

You can also obtain this information, the PDS for the Fisher Funds KiwiSaver Plan, and some additional information from the offer register at disclose-register.companiesoffice.govt.nz under Fisher Funds KiwiSaver Plan or OFR10715.

Notes

- Market index returns as well as the fund's actual returns have been used to fill in the risk indicator, as this fund has not been in operation for 5 years. Market Index returns have been used from 1 October 2019 to 30 November 2021 and actual returns after that. As a result of those returns being used, the risk indicator may provide a less reliable indicator of the potential future volatility of the fund.
- Quin Casey, Senior Portfolio Manager — Fixed Interest, has replaced David McLeish as key personnel having influence on investment decisions for the fund.
