This PDS is an offer of units in the TAHITO Te Tai o Rehua Fund. The Fund is a Māori indigenous ethical and sustainable fund. The Fund is actively managed and integrates Māori values and Environmental, Social and Governance (ESG) data to select investments.

The TAHITO Te Kōwhiringa Tapu is the investment process for measuring companies. The process combines Māori ancestral knowledge with sophisticated ESG data capture technology and strong financial analysis. In applying this investment approach, we are endeavouring to select New Zealand and Australian companies that best display collective and relational ethics and behaviours derived from indigenous Māori culture and ancestry which places people and the environment first and centres on the connection and interdependence of all living things.

The TAHITO investment process is set out in detail in the TAHITO Environmental, Social and Governance – Sustainability, Ethics and Impact Policy, which is available at www.tahito.co.nz.

The Fund is constituted within the Clarity Funds Managed Investment Scheme, a managed investment scheme that is governed by a Trust Deed dated 12 August 2019.

A managed investment scheme enables investors to pool their investments together to achieve benefits that may not be possible individually, including access to a wider range of assets and greater investment diversity. The Fund offers professional investment management, ease of administration, and utilises the benefit of the PIE tax regime.

The money you invest buys units in the Fund. The price of each unit you receive depends on the value of the Fund at the time you invest. We calculate the unit price by dividing the Net Asset Value of the Fund by the number of units the Fund has on issue. We also have the discretion to include trading costs in determining the unit price received. The unit price is calculated each business day and published on our website. The daily unit price of the Fund will change as the market value of the Fund's assets change. The return on your investment is reflected in any increase or decrease in the unit price.

Units do not give you legal ownership of the Fund's assets, however they do give you rights to the returns earned on those assets.

The number of units you have (your unitholding), when multiplied by the unit price, gives you the total value of your investment in the Fund (although the impact of tax can result in a change in the number of units you hold, up or down, as the unit price is calculated before tax).

The assets of the Fund are separate and are not available to meet the liabilities of any other fund in the Scheme.

Investment decisions are very important. They often have long-term consequences. We recommend you read all documents carefully. Ask questions. Seek advice from relevant professionals before committing yourself.

³As the Fund has existed for less than five years, the risk indicator has been calculated using a combination of actual returns and the market index returns. As a result, the risk indicator may provide a less reliable indicator of potential future volatility of the Fund.

Understanding the risk indicator

Managed funds in New Zealand must have a standard risk indicator. The risk indicator is designed to help investors understand the uncertainties both for loss and growth that may affect their investment. You can compare funds using the risk indicator.

The risk indicator for the Fund can be seen in section 3 (*Description of your investment option*).

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the Fund's assets can go up and down (volatility). A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at www.sorted.org.nz/tools/investor-kickstarter.

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance.

The Fund has not been operational for the required five years. We have therefore determined the risk indicator using a combination of market index returns and actual Fund returns. The risk indicator is based on the returns data for the market index returns for the period from 1 April 2018 to 31 October 2019 (Index) and 1 November 2019 to 31 March 2023 (Actual).

While risk indicators are usually relatively stable, they do shift from time to time. You can see the most recent risk indicator in the latest Fund Update for the Fund.

Ka taurimāhia tēnei tūraru mā te aroturuki riterite o te whaihua o te Tahua me te tohanga rawa e whāia ana e te Kaitaurima.

General investment risks

Some of the things that may cause the Fund's value to move up and down, which affect the risk indicator, are:

Market Risk

Many factors affect financial market performance, meaning that the value of investments rise and fall as a result. This could be economic, political, tax and regulatory conditions as well as general market sentiment. The performance of asset categories and individual asset categories could be impacted by these or business specific conditions. The risk is mitigated by holding a diverse portfolio of securities.

Currency and Hedging Risk

The risk of losses from fluctuating foreign exchange rates. We may seek to mitigate the risk of currency exposures by offsetting the impact of currency fluctuations by the use of forward contracts that will lock in an exchange rate for a currency transaction at a future date, known as 'hedging'. Currency hedging provides some protection against changes in currency exchange rates.

Liquidity Risk

The risk that an investment cannot be traded for periods in volatile and illiquid market conditions. This may affect the processing of fund transactions and there could be a delay in an investor receiving requested funds. Liquidity risk is managed by diversifying the securities held and holding enough liquid assets to manage short-term obligations.

Investment Return Risk

Past performance is no guarantee of future performance. There is a risk that the investment objectives of a fund may not be met or the fund underperforms its benchmark index over the suggested minimum investment timeframe. This risk is managed through the regular monitoring of the Fund's performance and target asset allocation by the Manager.

Ētahi atu tūraru tauwhāiti

Ko te Tahua he Otinga Ahumoni Pāhekoheko, ko te whakamāramatanga e whai whakaarohia ana ngā āhuatanga ahumoni, ahumoni kore hoki ina whakamahi ina whakatau ana i te whakangao. E wātea ana ētahi atu mōhiohio e pā ana ki ngā tūraru i roto i te Clarity Funds Management pukapuka Other Material Information ki <https://disclose-register.companiesoffice.govt.nz/>.

Ka tūtohu mātou kia rapu koe i te tohutohu ngaio i mua i te haumi ki te Tahua kia mārara he aha ngā tūraru e hāngai ana ki tēnei haumitanga, otirā e pā ana ki ōu ake āhuatanga.

Other specific risks

The Fund is an Integrated Financial Product which means that both financial and non-financial factors are considered when making investment decisions. In TAHITO's case, companies who align with Maori ancestral values are sought and TAHITO utilises exclusions and positive screening to do this, which is further explained in the TAHITO SIPO. As a result of considering non-financial factors, investment opportunities may be limited and/or the fund may produce more modest returns than funds who do not take non-financial factors into consideration when making investment decisions.

More information relating to risks is available in the Clarity Funds Other Material Information document, which is available at <https://disclose-register.companiesoffice.govt.nz/>.

We recommend that you seek professional advice before investing in the Fund to understand what risks are associated with this investment, especially in relation to your personal circumstances.

You will be charged fees for investing in the Fund. Fees are deducted from your investment and will reduce your returns. The fees you pay will be charged in two ways:

- regular charges (for example, annual fund charges). Small differences in these fees can have a big impact on your investment over the long term;
- one-off fees (for example, contribution fees). Currently there are no one-off fees charged by Clarity.

Total annual fund charges

Total fund charges, as a percentage of net asset value (excluding GST)		
Management Fee	Estimated Other Administration Charges and Expenses	Estimated Total Annual Fund Charges
0.85%	0.35%	1.20%

The total annual fund charges (excluding GST and any extraordinary expenses) shall not exceed the amounts shown above for the Fund. Fees are accrued daily, paid monthly in arrears to us and reflected in the unit price.

The charges outlined above cover:

Management fee: A management fee is accrued daily in the unit price of the Fund and is payable to Clarity as Manager. A portion of this fee is paid to TAHITO for its Investment Advisory services.

Administration fee: An administration fee is accrued daily in the unit price of the fund. This fee covers other expenses including supervisor, custodian, administration manager, unit registrar, unit pricing, fund accounting, legal, audit regulatory and compliance.

Brokerage and other transaction costs are paid directly by the fund. Under the terms of Funds governing document, other expense such as one off costs and taxes may also be charged to the Fund. Total Fund Charges for the previous financial year are available in the latest Fund Update.

Spreads: We do not typically apply a spread to our unit price. However, we may apply a spread to particularly large applications or redemptions, or during periods of heightened market volatility. This is done to protect non-transacting investors from the transaction costs related to buying or selling underlying securities.

Mā mātou e panoni ngā horapatanga me te kore pānui mēnā e whakaaro ana mātou he tika i raro i ngā āhuatanga o te taiahumoni.

We can change the fees charged from time-to-time, with the approval of the Supervisor. We will give you three months' written notice before any fees are increased.

Clarity must publish a Fund Update for the Fund showing the fees actually charged during the most recent year. Fund updates are available at www.tahito.co.nz.

6. He aha ngā tāke ka utu koe? What taxes will you pay?

He hinonga huinga haumitanga te Tahua. Ka hāngai te rahi o te tāke ka utu koe ki tō pāpātanga kaihaumi kua tūtohua (**PIR**). Ki te whakarite i tō PIR, haere ki www.ird.govt.nz/toii/pir/workout. Ki te kore koe e mōhio ki tō PIR, ka tūtohu mātou kia rapu koe i te tohutohu ngaio, whakapā atu rānei ki te Tari Taake.

Ka noho haepapa koe ki te whakamōhio atu ki a Clarity tō PIR ina haumi ana koe, ina panoni ana rānei tō PIR. Ki te kore koe e whakamōhio mai, ka pā pea te pāpātanga taunoa. He rerekē te tūnga tāke o ngā kaihaumi katoa, ā, ka whakatenatena mātou i a koe ki te rapu i tōu ake tohutohu tāke i mua i te haumitanga.

The Fund is a portfolio investment entity. The amount of tax you pay is based on your prescribed investor rate (**PIR**). To determine your PIR, go to www.ird.govt.nz/toii/pir/workout. If you are unsure of your PIR, we recommend you seek professional advice or contact the Inland Revenue Department.

It is your responsibility to tell Clarity your PIR when you invest or if your PIR changes. If you do not tell us, a default rate may be applied. If the advised PIR is lower than the correct PIR, you will need to complete a personal tax return and pay any tax shortfall, interest, and penalties. If the default rate, or the advised PIR, is higher than the correct PIR, then you may complete a personal tax return and any additional tax paid by the Scheme on your behalf may reduce your income tax liability for that income year, and may give rise to a tax refund.

All investors have different tax positions and we encourage you to seek your own tax advice prior to investing.
