01. General

The purpose of this document is to provide you with important information on the investment options that Sharesies Investment Management Limited (SIML) offers to members of the Sharesies KiwiSaver Scheme.

This document should be read with the Product Disclosure Statement. Investment options include a range of funds that provide exposure to investments such as New Zealand equities and managed funds.

The annual fund charges are calculated as a percentage of the net asset value and include GST.

The investment options are grouped by underlying asset class.

02. Understanding the risk indicator

Managed funds in New Zealand must have a standard risk indicator. The risk indicator is designed to help investors understand the uncertainties both for loss and growth that may affect their investment. You can compare funds using the risk indicator.

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund’s assets goes up and down (volatility). A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at sorted.org.nz/tools/investor-kickstarter.

Note that even the lowest category does not mean a risk-free investment, and there are other risks (described under the heading “Other specific risks” in the Product Disclosure Statement) that are not captured by this rating.

This risk indicator is not a guarantee of a fund’s future performance. The risk indicator is based on the returns data for the 5 years to 30 September 2023. While risk indicators are usually relatively stable, they do shift from time to time. You can see the most recent risk indicator in the latest fund update for this fund.

See **section 4 “Investment Options”** on page 5 for risk indicator for each investment option. The risk indicator for each self select investment option has been calculated and filled in using a framework that SIML has approved for the calculation of self select investment option risk indicators. Risk indicators for self select investment options have been calculated using weekly returns of the underlying investments for up to 5 years, where the underlying investment has not been in existence for at least 2 years the maximum risk indicator of 7 is applied.

03. What are the fees?

Administration fee

This is paid to us for the operation of the Self Select Fund and is included in the Annual fund charges. There is no Administration fee for the Base Funds as we are remunerated by the underlying fund managers.

	Annual fund charges (incl. GST)
Sharesies Self Select Fund	0.15% ¹

¹Self select investment options that invest in underlying funds may also have fees (including performance-based fees), and expenses which are charged by the manager of that fund. These fees and expenses will be reflected in the fund's unit price and may therefore indirectly affect your returns.

Base Fund annual fund charges (% of net asset value)

	Annual fund charges (incl. GST)
Sharesies Pathfinder Ethical Growth Fund	1.32% ²
Sharesies SuperLife Growth Fund	0.51% ²
Sharesies Pie Global Growth 2 Fund	1.52% ²
Sharesies SuperLife Balanced Fund	0.50% ²
Sharesies SuperLife Conservative Fund	0.47% ²

² Base Fund annual fund charges include an estimate of applicable underlying fund charges

The fund charges represent our best estimates of the fees and expenses that will be charged to each Fund. These have been estimated using information provided by the underlying fund managers and by reference to each underlying fund's disclosure documents.

The fund charges are deducted from and reflected in the value of each Fund. The fund charges include all normal day-to-day fund costs and expenses including the fees and charges charged by the Supervisor, custodian and other service providers. They also include the fees and costs charged by any other funds we invest in.

We do not charge any other fees to you, however, Sharesies Investments is remunerated by the underlying fund managers.

Transaction fees

When you buy or sell units in the Self Select Fund, you will be charged a transaction fee. This fee will be deducted from the buy or sell amount.

There is no GST charged on transaction fees.

	Transaction fee
Sharesies Self Select Fund	1% for amounts up to \$1,000 plus 0.1% for amounts above \$1,000

Example of how fees apply to an investor

Katy invests \$10,000 in a mix of one Base Fund (\$7,000) and investment options within the Self Select Fund (\$3,000).

They are charged a Transaction fee when the funds are invested in the Self Select Fund of \$30 (1% of \$3,000).

This brings the starting value of their investment to \$9,970.

They are charged an Administration Fee on the Self Select Fund, which works out to \$4.50 (0.15% of \$3,000).

They are charged an Annual fund charge on the Base Fund, which works out to \$92.40 (1.32% of \$7,000).

These fees might be more or less if their account balance has increased or decreased over the year and are dependent on the type of investment they have selected.

Estimated total fees for the year

Transaction fees (Self Select Fund) *: \$30

Administration Fee (Self Select Fund): \$4.50

Annual fund charge (Base Funds): \$92.40

*These fees will change depending on how often Katy buys or sells units in the Self Select Fund. When you buy or sell units in the Self Select Fund, any transaction fees applicable at that time will be a cost to you.

If Katy's investment options include funds/ETFs, Katy may be subject to underlying fund fees and expenses.

This example may not be representative of the actual fees you may be charged.

04. Investment Options

Base Funds

Fund	Underlying Investment Manager	Description	Estimated annual fund charges (Incl. GST)
Sharesies Pathfinder Ethical Growth Fund	Pathfinder Asset Management Limited	Invests wholly in the Pathfinder Ethical Growth Fund, an ethical portfolio with a higher exposure to growth assets and a lower exposure to income assets.	1.32%

Sharesies Smartshares Conservative Fund	Smartshares Limited	Invests wholly in the SuperLife Conservative Fund. Designed for investors that want a conservative investment option that aims to provide more stable returns over the short to medium term. Provides exposure to a diverse range of domestic and global income assets.	0.47%
<div> <div>Lower Risk</div> <div>Higher Risk</div> <div> <div>1</div> <div>2</div> <div>3</div> <div>4</div> <div>5</div> <div>6</div> <div>7</div> </div> <div>Potentially Lower Returns</div> <div>Potentially Higher Returns</div> </div>			

The funds do not have a five-year return history. The risk indicator was prepared using market index returns for the period 1 October 2018 to 30 April 2023, and actual returns for the period 1 May 2023 to 30 September 2023. Accordingly, the risk indicator may provide a less reliable indicator of the potential future volatility of each fund.

Self Select Fund

Underlying asset class	Fund charges	Transaction fees
NZ Equities & Exchange Traded Funds (ETFs)	Administration fee 0.15% p.a.*	1% for amounts up to \$1,000 plus 0.1% for amount above \$1000

*Self select investment options that invest in underlying funds may also have fees and expenses which are charged by the manager of that fund, these fees and expenses are included in the annual fund charges set out in the table below.
