WELCOME TO THE ANZ INVESTMENT FUNDS

GETTING STARTED

Making the right decisions now could help you achieve your financial goals. After you've read the guide and product disclosure statement (PDS), there are **three important choices** you need to make.

1

Choose a fund
that suits you

See page 8 of
the PDS

2

Choose how
to invest

See page 4

3

Choose your
correct tax rate

See page 14 of
the PDS

A copy of the ANZ Investment Funds PDS is available at anz.co.nz/investmentfunds or by calling 0800 736 034.

Once you've made your choices, you can let us know by **completing the relevant application form** at the back of the PDS.

SEEK ADVICE

We recommend you seek advice from a financial adviser who can help with these choices and provide you with guidance and support based on your personal financial situation. A financial adviser can provide you with a copy of their disclosure statement on request and free of charge.

You can find definitions of the terms used throughout the guide and PDS in the other material information, available on the offer register at companiesoffice.govt.nz/disclose (click SEARCH OFFERS and search for 'ANZ Investment Funds').

WHY US?

Your investment is managed by experts

Our highly experienced investment management team has a focus on long-term performance. They have a strong record of investment performance based on a consistent and disciplined process for managing investments.

They manage and adjust the mix of asset classes that make up your investments and also manage most of the Australasian assets.

For international assets, we use a small number of external fund managers who we believe are among the best in their class.

You can find out more about our investment management team at anz.co.nz/anzinvestments

See pages 8 to 9 for more information about our external fund managers.

“A quality investments team leading a proven investment process gives confidence.”

– Morningstar Research Report, published 16 March 2018*

Your investment is actively managed

Markets never stand still and neither do we. Our active approach means we constantly monitor local and global markets to identify what we believe are the best opportunities to optimise your investment.

Your investment is diversified

You benefit from investing in multi-asset-class funds that spread their investments over hundreds of assets across local and international markets.

Your investment will access a broad range of assets you might not be able to invest in yourself.

See page 6 for more information about the assets our funds invest in.

A complement to other savings and investments

Your investment in the funds is flexible as you can withdraw some or all of your investment at any time. The funds can be used to complement other types of savings or investments, such as KiwiSaver and term deposits.

Together you can make your money work smarter, keeping you on track for all of your saving and investment goals.

See page 12 for more information on how this could work for you.

We're trusted by many New Zealanders

We've operated in New Zealand since 1989 and manage more than \$25 billion on behalf of individuals, trusts, corporates, KiwiSaver schemes, superannuation schemes, government organisations and charities.

We are New Zealand's largest fund manager – more than 720,000 New Zealanders trust us to manage their investments.

You can find out more about us at anz.co.nz/anzinvestments

You're always connected

You can track your investment in ANZ Internet Banking and ANZ goMoney. This will give you access to up-to-date information, including your investment balance, transactions and a summary of your investment performance.

If you provide us your email address you'll also get regular, practical information and insights about your investment, helping you to make informed choices.

You can find helpful resources online

Our website has valuable information and resources that can help you manage your investment.

You'll also find the latest:

- fund performance
- fund unit prices
- fund fact sheets
- fund updates
- market information.

anz.co.nz/investmentfunds

* Morningstar has consented to the use of this quote. For more information about Morningstar, see our website.

WE HAVE AN IMPRESSIVE TRACK RECORD

Our investment management team and funds have been recognised with numerous awards and ratings from independent research houses.

Awards

Morningstar Awards, Fund Manager of the Year, New Zealand Category

Winner: 2015, 2012, 2006, 2005, 2004, 2001 and 2000
Finalist: 2016, 2014, 2013, 2010 and 2002

See anz.co.nz/anzinvestmentsawards for our full awards history, ratings and disclaimers.

“ANZ Investments continues to lead the way in multi-asset investing. There’s a continuity of people and process no one else in New Zealand can match.”

– Morningstar Research Report, published 16 March 2018*

Morningstar Analyst Ratings™

The funds have a Morningstar Analyst Rating™ of ‘Silver’, which is currently the highest rating for a diversified fund in New Zealand.

- Conservative Fund – silver rating assigned on 16 March 2018
- Conservative Balanced Fund – silver rating assigned on 16 March 2018
- Balanced Fund – silver rating assigned on 16 March 2018
- Balanced Growth Fund – silver rating assigned on 16 March 2018
- Growth Fund – silver rating assigned on 16 March 2018

See inside back cover for ratings disclaimer.

A SNAPSHOT OF THE FUNDS

How do you join?

It's easy to join. All you need to do is:

1. read the PDS
2. complete and send us an application form.

Remember to provide your email address, so we can keep you up-to-date on your investment.

If you have any questions, contact us:

 service@anzinvestments.co.nz

 0800 736 034

You decide which fund to invest in

We offer five diversified investment funds. Each fund has a different asset class mix. This means each fund has a different level of risk and expected return.

You can choose the fund that is best suited to your needs.

 For more information about our funds, including investment objectives, an asset allocation summary and minimum investment timeframes, see pages 8 to 9 of the PDS.

You have access to advice

Our financial advisers can help you choose the right fund. They can provide you with free, easy and convenient advice based on your personal financial situation.

 wealthdirect@anz.com

 0800 269 238

Use our online risk profile tool

You can use our online risk profile tool to help identify your tolerance for risk, and which fund might be right for you.

anz.co.nz/riskprofiletool

Flexible payment options

Invest as much or as little as you like

We don't have a minimum payment amount into our funds; it can be as big or as small as you like. We also don't have a required minimum balance. However, if your account balance reaches \$0, we will close your account.

The minimum withdrawal amount is \$500, although regular withdrawals can be less.

You can make regular payments

You can make regular fortnightly, monthly or quarterly payments straight from your bank account.

You can make lump sum payments

You can also make lump sum payments at any time, whether or not you have a regular payment set up.

Or, you can do both

The funds offer you the flexibility to make contributions on a regular basis, as well as adding a lump sum investment.

 For more information about payment options, see pages 6 to 7 of the PDS.

You can withdraw at any time

You can request a withdrawal on any business day. You decide when and how much to withdraw.

You can also set up a regular withdrawal to supplement your income or support your lifestyle.

 For more information, including minimum withdrawal amounts, see page 7 of the PDS.

Each fund has a maximum fee

The annual fund charge is the total fee for your investment. The fee is a percentage of the net asset value of each fund, and is deducted from it.

You will not pay more than this fee.

 For more information, see page 12 of the PDS.

Investing involves risks

Investing in the funds will involve taking some risk.

Your investment might not do as well as expected and you may not receive back the full amount you invested.

We recommend that you talk to an ANZ financial adviser about the investment options available to you.

Your investment is not guaranteed

Your investment in the funds is not guaranteed by anyone.

YOUR INVESTMENT IS MADE UP OF:

+/-

Your payments

The payments (less withdrawals) you make.

 See pages 6 to 7 of the PDS.

-

Returns

Your investment can go up or down because of the performance of your fund.

Returns reflect gains or losses made when assets our funds invest in change in value or earn income.

-/+

Fees

There is an annual fund charge that varies depending on the fund you're invested in.

It's deducted straight from the fund.

 See page 12 of the PDS.

Taxes

If you're an individual or joint investor, taxes (or tax rebates) that apply to your investment are automatically deducted from (or added to) your account at the prescribed investor rate (PIR) you provide us with.

If you're not an individual or joint investor, you may need to pay tax yourself.

 See page 14 of the PDS.

Make sure you're on the right tax rate. Check your PIR. See page 14 of the PDS for more information.

THE ASSETS YOUR FUND WILL HOLD

Types of assets

The funds invest in a variety of asset classes, including cash and cash equivalents, fixed interest, equities and listed property, both local and international. They may also invest in alternative assets.

The main asset classes can be grouped into two categories, as shown below.

The mix of assets in your fund is important

Growth assets are likely to experience larger movements in value compared to income assets. However, they are also expected to achieve higher investment returns over the long term. This concept is the 'risk/return' relationship, and is illustrated in the graph below and bar chart on the opposite page.

We offer a range of funds that invest in a different mix of growth assets and income assets. Depending on the mix of assets, each fund has a different risk/return profile.

If you're seeking:

- **higher returns**, you need to be willing to accept more risk (for example, by investing in a fund with more growth assets)
- **lower risk**, you need to be willing to accept lower returns (for example, by investing in a fund with more income assets).

INCOME ASSETS

Cash and cash equivalents

Fixed interest (such as bonds)

GROWTH ASSETS

Listed property

Equities

Risk/return profile over the long term

The graph is not to scale and is for illustrative purposes only. Risk and returns of the different types of assets can vary over different stages of the market cycle. For more information about risks see page 11 of the PDS. Also see our investment objectives on page 8 of the PDS.

PROJECTED RANGE OF RETURNS

As explained on the page opposite, the relationship between risk and return is mostly determined by the mix of assets your fund holds. This is illustrated by the projected range of returns shown in the bar chart below.

The narrow (dark blue) range shows the projected average annual return for each fund that we believe may occur **over the next 10 years**. These returns are also stated in the table below.

The wide (light blue) range shows the projected range of returns we expect each fund may achieve **in any single year**. These returns take into account current market circumstances as at the date of this guide, as well as long-term considerations.

Both sets of returns are after fund charges and before taxes. They are based on assumptions such as:

- what the expected return of each asset class will be
- what the volatility of each asset class will be (how much the value will go up and down).

The return assumptions include consideration of:

- factors such as inflation, economic growth, corporate earnings growth, trends in interest rates and market sentiment towards asset classes, and
- fund-specific factors such as fund fees and expected added value from active management.

It is important to remember that both sets of returns are **estimated** and are **not guaranteed**. Your actual return each year could be outside of the narrow range or the wide range.

Projected average annual returns for next 10 years

Fund	Narrow range
Conservative	3.3%–4.5%
Conservative Balanced	3.6%–4.8%
Balanced	4.1%–6.3%
Balanced Growth	4.3%–7.2%
Growth	4.7%–8.3%

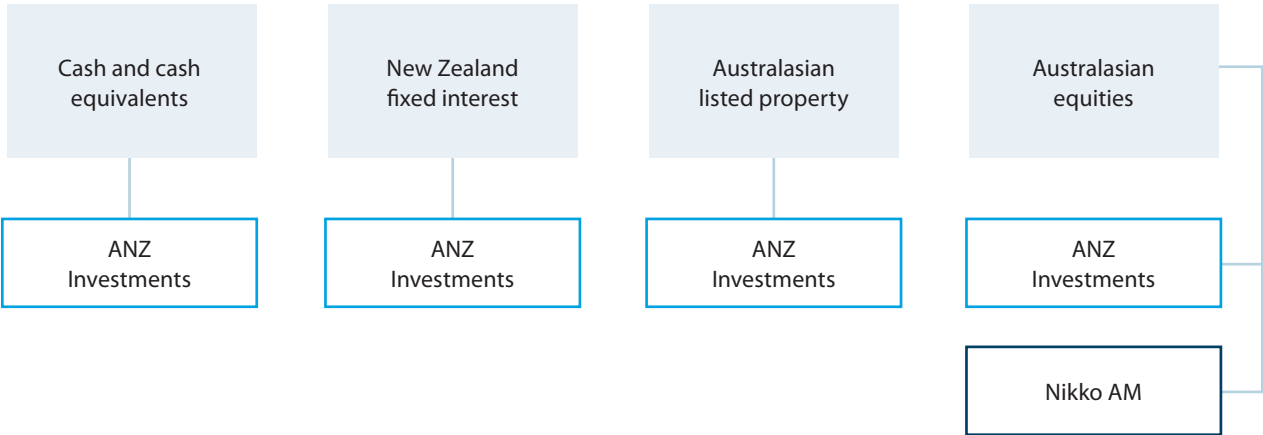

HOW THE FUNDS ARE MANAGED

Our New Zealand-based investment management team manages these funds. They monitor the attractiveness of each asset class, and adjust the allocation depending on how they believe each will perform.

The funds invest into underlying funds that we manage. We believe this management structure benefits you because it creates efficiencies and we have greater control of the overall cost to you.

Our investment management team selects the assets for most of the underlying funds investing in Australasian assets. For the underlying funds investing in international assets, they are selected by a small number of external fund managers who we believe are among the best in their class.

Australasian asset classes

ANZ Investments

We set and adjust the mix of asset classes that make up each fund. Additionally we manage cash and cash equivalents, New Zealand fixed interest, Australasian listed property and some Australasian equities. We look for high-quality assets with an attractive return profile at a reasonable price.

Nikko AM

Nikko AM Limited (Nikko AM) is a Sydney based manager who manages a portfolio of Australian equities. Nikko uses an investment style that seeks to identify good value stocks that offer the best compromise between risk and expected return.

Vanguard Investments Australia

Vanguard Investments Australia Limited (Vanguard) manages a portfolio of international fixed interest assets issued by governments. Vanguard also manages a portfolio of international credit securities.

Resolution Capital

Resolution Capital Limited (Resolution Capital) manages a select and diverse group of global listed property assets that are capable of generating superior risk adjusted returns for investors.

OUR SELECTION AND MONITORING PROCESS

Our selection of external fund managers follows an extensive research process. A number of factors are considered, such as people (experience and stability of the team), process (consistency of philosophy and style), business and performance.

The managers' performance, strategy and investment processes are monitored on a regular basis.

The external fund managers of our underlying funds at the date of this guide are shown below. They may change from time to time.

 You can find the current external fund managers in the SIPO, which is available on the offer register at companiesoffice.govt.nz/disclose (click SEARCH OFFERS and search for 'ANZ Investment Funds').

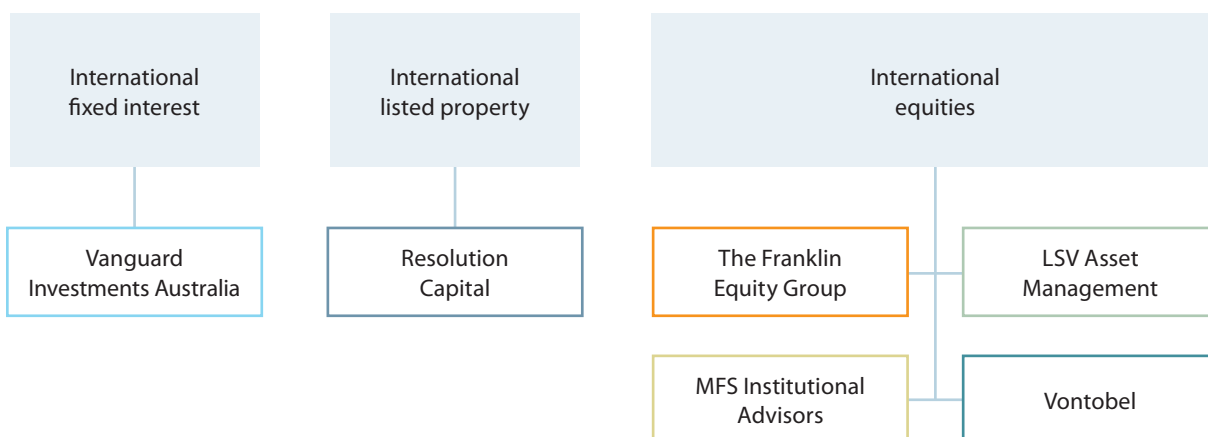

Responsible investing

We're committed to responsible investing because we believe it's in the best long-term interests of our investors. Responsible investing is good for society, and it's good for our investment portfolios too.

Our goal is to deliver sustainable performance in a sustainable way. When we assess investments, we look at a range of both financial and non-financial criteria. We believe that environmental, social and governance factors are some of the drivers of long-term investment risks and returns.

 Find out more at anz.co.nz/responsibleinvesting

International asset classes

The Franklin Equity Group

The Franklin Equity Group (Franklin), a part of Franklin Templeton Investments, manages a portfolio of international equities. Franklin aims to invest in quality companies with the potential to produce sustainable earnings and cash flow growth.

LSV Asset Management

LSV Asset Management (LSV) manages a portfolio of international equities. LSV aims to invest in out-of-favour or undervalued stocks that have the potential for near-term appreciation.

MFS Institutional Advisors

MFS Institutional Advisors Inc. (MFSI) manages a portfolio of international equities. MFSI aims to invest in quality companies with sustainable, above-average growth and returns.

Vontobel

Vontobel Asset Management Inc (Vontobel) manages a portfolio of international equities. Vontobel aims to invest in sensibly priced, high-quality companies that can grow earnings faster than the market on a sustainable basis.

CASE STUDY: REGULAR CONTRIBUTIONS CAN MAKE A BIG DIFFERENCE

George and Karen are both aged 47 and own a business. They've worked hard over the past 20 years and managed to save a nest egg of \$250,000. They want to continue building on that sum while they're still working.

They're considering investing a further \$1,000 each month – on top of their lump sum – until they're ready to retire, probably when they both turn 65. So they're looking for an investment that offers both flexibility and moderate risk. They decide to invest in the Balanced Fund.

By the time they reach 65, their investment could have grown to \$465,000 (\$325,000 when adjusted for inflation). However, if they chose to make regular contributions of

\$1,000 each month on top of the lump sum, their total savings could have grown to \$763,000 (\$534,000 when adjusted for inflation).

Depending on their circumstances at retirement, George and Karen could continue to invest in the Balanced Fund or switch to a lower-risk fund, review their regular payment amount, perhaps start a regular withdrawal, or even think about a large withdrawal for a dream holiday.

We recommend you talk to one of our financial advisers about the investment options available to you.

 For background information and numbers used in this case study, see page 15.

EMPOWER YOUR FUTURE: A COMPLEMENT TO OTHER SAVINGS AND INVESTMENTS

We know you have different savings goals, both short and long term. So, make your money work smarter using the flexible features of the funds, with other types of savings or investments, such as KiwiSaver and term deposits.

This table compares some of the features of each of these investments.

Product features	ANZ Investments Funds	KiwiSaver	Bank term deposit
Minimum investment	None	None	Yes
Withdrawal flexibility	Anytime	Restricted	Restricted
Add to your investment	Anytime	Anytime	No
Risk	Medium-high	Medium-high	Low
Investment timeframe	Medium to long term	Long term	Short to long term
Expected return	Variable	Variable	Fixed
Diversification	High	High	Low
Fund charges	Yes	Yes	No

You can contribute into a fund on any day, with no minimum contribution amount. Your investment also has more withdrawal flexibility than KiwiSaver and term deposits as you can request a withdrawal on any business day.

The funds can complement long-term goals such as retirement, but can also be used for other savings aspirations that you may have for yourself or family, such as saving for children's education, a house deposit, boat or home renovation. See our case study on the next page for how this might work for you.

 See pages 6 to 7 of the PDS for more information on contribution and withdrawal options, including any restrictions.

CASE STUDY: A SMART WAY TO INVEST MORE FOR YOUR FUTURE

Andrew is 30 years old and earns \$65,000 (before tax) per year. He's saving for his retirement using KiwiSaver, but wants to add to his savings without locking them in.

He contributes 3% of his salary to his KiwiSaver account. This way he benefits from his employer's contributions and the annual member tax credit of \$521.43. All his savings from his KiwiSaver account will be locked in until he's 65.

Andrew also wants to save more for his retirement, but has other more medium-term goals, such as a car or a holiday. Andrew needs withdrawal flexibility for these other goals. He wants a diversified investment that he can access at any time.

So he decides to also make regular payments of 5% of his salary into the Balanced Growth Fund.

Here's what Andrew's total retirement savings might look like at age 65. Note, at age 42, Andrew made a \$20,000 withdrawal from his investment fund to purchase a new car.

TOTAL COMBINED RETIREMENT SAVINGS: \$660,000 (\$330,000 when adjusted for inflation)

We recommend you talk to one of our financial advisers about the investment options available to you.

For background information and numbers used in this case study, see page 15.

NEXT STEPS

You can find more information about the ANZ Investment Funds in the PDS.

Complete the relevant
application form at the
back of the PDS.

ABOUT OUR CASE STUDIES

General assumptions

All of the case studies in this guide are examples to help you understand how an investment in a fund can help you achieve your investment goals. The figures and graphs used are for illustration only and may not reflect actual returns.

The figures in our case studies:

- show projected savings, both:
 - where they haven't been adjusted for the effect of rising prices over time (that is, inflation), in which case the amount does not reflect the 'real' buying power in the future
 - where they have been adjusted for inflation of 2% per year to show the 'real' buying power of the savings in the future
- assume positive investment performance each year (after charges and taxes at a prescribed investor rate of 28%) of:
 - Balanced Fund: 3.5%
 - Balanced Growth Fund: 4.1%

These returns are projected long-term returns. They differ from the projected average annual range of returns that we believe may occur in the next 10 years as described on page 7. This is because the time frames in the case studies are for the long term and we believe it is more appropriate for the case studies to use returns based on a longer-term horizon

- generally round savings to the nearest \$1,000
- account for tax when appropriate
- assume that no withdrawals are made during the course of the investment, unless specifically mentioned.

Additional assumptions

Andrew's case study:

- assumes he is invested in the Lifetimes option of the ANZ KiwiSaver Scheme, with figures that:
 - assume employer contributions are 3% of the stated before-tax salary
 - assume his salary will increase by 2.5% each year
 - apply member tax credits appropriate to the contributions made and at today's levels only
 - assume positive investment performance in the funds within the ANZ KiwiSaver Scheme each year (after fees and taxes using a prescribed investor rate of 28%) of:
 - Conservative Fund: 2.3%
 - Conservative Balanced Fund: 3.1%
 - Balanced Fund: 3.8%
 - Balanced Growth Fund: 4.4%
 - Growth Fund: 5.1%
 - assume a membership fee of \$2 per month
 - account for tax on employer contributions when appropriate
 - assume his date of birth is 1 July, with projected savings calculated in July.

ANZ New Zealand Investments Limited is the issuer and manager of the ANZ KiwiSaver Scheme. A copy of the ANZ KiwiSaver Scheme product disclosure statement is available at anz.co.nz/kiwisaverforms or on request from any ANZ branch.
