

# Fund update

## Mercer Conservative fund Mercer FlexiSaver

### Quarter ending 31 December 2025

This fund update was first made publicly available on: 13 February 2026.

### What is the purpose of this update?

This document tells you how the Mercer Conservative fund has performed and what fees were charged. The document will help you to compare the fund with other funds. Mercer (N.Z.) Limited prepared this update in accordance with the Financial Markets Conduct Act 2013.

This information is not audited and may be updated.

### Description of this fund

Invests mostly in defensive assets such as fixed interest and cash, with only limited investment in growth assets such as shares and real assets. May be suitable for investors who want to achieve slightly higher returns than those expected from investing solely in the Cash fund. Investors need to be comfortable with the possibility of some fluctuations in returns.

Total value of the fund	\$6,216,843
The date the fund started	9 October 2015

### What are the risks of investing?

#### Risk indicator for the Mercer Conservative fund:

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [www.riskquiz.co.nz](http://www.riskquiz.co.nz).

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 31 December 2025. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

See the Product Disclosure Statement (PDS) for more information about the risks associated with investing in this fund.

## How has the fund performed?

	Average over past 5 years	Past year
<b>Annual return</b> <sup>2</sup> <i>(after deductions for charges and tax)</i>	1.97%	4.37%
<b>Annual return</b> <sup>2</sup> <i>(after deductions for charges but before tax)</i>	2.29%	5.60%
<b>Composite of market index annual return (reflects no deduction for charges and tax) and peer group indices annual return (after deduction for charges but before tax)</b> <sup>1</sup>	2.81%	6.12%

The composite index return is the strategic asset allocation weighted benchmark index return, where the benchmark indices are defined in the Statement of Investment Policy and Objectives. Additional information about the composite index is available on the offer register.

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 31 December 2025.<sup>3</sup>

**Important:** This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

## What fees are investors charged?

Investors in the Mercer Conservative fund are charged fund charges. In the year to 31 March 2025 these were:

	% of net asset value
<b>Total fund charges</b> <sup>6</sup>	0.91% <sup>4,5</sup>
Which are made up of:	
<b>Total management and administration charges</b>	0.91% <sup>4,5</sup>
Including:	
Manager's basic fee	0.71% <sup>4</sup>
Other management and administration charges	0.20% <sup>5</sup>
<b>Total performance-based fees</b>	0.00%

Investors are not currently charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the Mercer FlexiSaver scheme PDS for more information about Scheme fees.

Small differences in fees and charges can have a big impact on your investment over the long term.

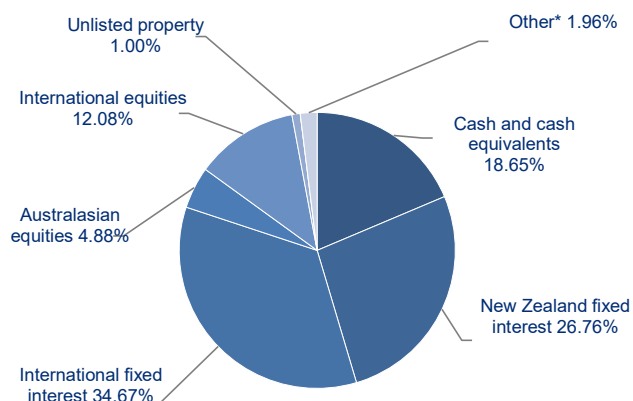

### Example of how this applies to an investor <sup>7</sup>

Ben had \$10,000 in the fund at the start of the year and did not make any further contributions. At the end of the year, Ben received a return after fund charges were deducted of \$437.00 (that is 4.37% of his initial \$10,000). Ben also paid \$0.00 in other charges. This gives Ben a total return after tax of \$437.00 for the year.

### Currency hedging

Currency hedging can apply to some of the asset classes this fund invests in. The level of currency hedging for global shares is managed between 0% and 100% and may change over time depending on Mercer's view of the relative strength (or weakness) of the New Zealand dollar. Other global asset classes (Global Fixed Interest and Real Assets) target a 100% hedge to the New Zealand dollar. Refer to the Statement of Investment Policy and Objectives for more information which is available from [www.disclose-register.companiesoffice.govt.nz](http://www.disclose-register.companiesoffice.govt.nz).

Hedging coverage for the Fund's exposure to foreign currency as at 31 December 2025 was 87.86%.

## Notes

1. Returns may vary for some investors depending on the fund charges applicable to them.
2. The average annual return is from 30 November 2015. Returns for the year to 31 March 2024 are based on a unit price at 28 March 2024.
3. The manager's basic fee varies for some investors, including those who joined through an employer based group. The actual fee used in this fund update is the general Mercer FlexiSaver fee charged.

The manager's basic fee that applies to investors who were in the New Zealand Defence Force FlexiSaver section was 0.48%. The manager's basic fee for these members varies due to a rebate which applies to the aggregate funds under management in the NZDF Savings Schemes and has been calculated using the rebate for the year ending 31 March 2025.

4. Other management and administration charges vary for different investors. The actual fee used in this fund update is for the general section. For those investors in the New Zealand Defence Force FlexiSaver section the other management and administration charge was 0.29%.
5. GST may be included in some expenses. GST will be included in fees where applicable.
6. Returns may vary for some investors depending on the fund charges applicable to them. Returns may also differ for some investors who do not incur the other charges shown.
7. For the reporting of the types of assets under Actual investment mix, cash retained for liquidity management at a sector level is assigned to the asset class to which it relates to.
8. The Top 10 investments have been calculated excluding cash retained for liquidity purposes.
9. Anna Scott has not been named as a key person in the previous fund update.
