Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

Notes

1. Gross Return is the return before the deduction of tax, expenses and fees and assumes all income is reinvested.
2. These returns are for the periods ending 31 March 2025.
3. The after-tax return is higher than the pre-tax return over this period as a result of volatile tax obligations attributed to the investments during the year. The impact of tax credits this way is uncommon and should not be expected.
4. The bar graph shows fund returns after the deduction of fees and tax, however, the market index returns are shown before any fees or tax are deducted.
5. GST is currently charged at 15% on 10% of the management fee in accordance with the non-binding IRD agreement with the Financial Services Council of New Zealand Incorporated on behalf of the funds management industry. GST on management fees is currently under review and therefore this percentage may change in the future.
6. For the reporting of the types of assets under "Actual investment mix", foreign exchange hedging positions have been assigned to the asset class to which they relate.
7. The Top 10 investments have been calculated excluding operational cash and derivatives.
