

NZ Funds

Active Inflation Series

Product Disclosure Statement

Issued by New Zealand Funds Management Limited 1 August 2024

This document replaces the Product Disclosure Statement dated 5 December 2023.

This document gives you important information about this investment to help you decide whether you want to invest. There is other useful information about this offer on *disclose-register.companiesoffice.govt.nz*. New Zealand Funds Management Limited has prepared this document in accordance with the Financial Markets Conduct Act 2013. You can also seek advice from a financial advice provider to help you to make an investment decision.

NZFunds

1. Key information summary

What is this?

This is a managed investment scheme. Your money will be pooled with other investors' money and invested in various investments.

New Zealand Funds Management Limited (NZ Funds, we, us or our) will invest your money and charge you a fee for its services.

The returns you receive are dependent on the investment decisions of NZ Funds and the performance of the investments.

The value of those investments may go up or down. The types of investments and the fees you will be charged are described in this document.

What will your money be invested in?

The NZ Funds Active Inflation Series offers six actively managed funds (also referred to as Portfolios).

These investment options are summarised in the table on page 4. More information about the investment target and strategy for each investment option is provided on pages 8 and 9.

Who manages the Portfolios?

NZ Funds is the manager of the Portfolios. See section 7 of this Product Disclosure Statement (PDS) 'Who is involved?' on page 13 for more information.

How can you get your money out?

You must give 14 days' notice of your intention to withdraw unless you are switching to another Portfolio.

In certain circumstances, NZ Funds may defer or suspend withdrawals and switches. See section 2 of this PDS 'How does this investment work?' on page 6 for more information.

Your investment in the Portfolios can be sold but there is no established market for trading these financial products. This means that you may not be able to find a buyer for your investment.

How will your investment be taxed?

All of the Portfolios offered under this PDS are Portfolio Investment Entities (PIEs). The amount of tax you pay in respect of a PIE is based on your prescribed investor rate (PIR).

To determine your PIR go to www.ird.govt.nz/roles/portfolio-investment-entities/using-prescribed-investor-rates. See section 6 of this PDS 'What taxes will you pay?' on page 13 for more information.

Where can you find more key information?

NZ Funds publishes Quarterly Fund Updates for each Portfolio.

The updates show the returns, and the total fees actually charged to investors, during the previous year. The latest Quarterly Fund Updates are available at www.nzfunds.co.nz. NZ Funds will also give you copies of those documents on request.

Comparing our investment options

Name	Objective	Description	Risk indicator ¹	Estimated annual fund charges ^{2,3}	Estimated annual fund charges after fee rebate ^{2,3,4}	
					Total invested \$1m - \$3m	Over \$3m
New Zealand Property & Retirement Villages		Anticipated to mainly own and trade New Zealand property and retirement village company shares. The Portfolio may also hold an allocation to Australian shares and other actively managed authorised asset classes ⁵ with the aim of mitigating the downside and capturing the upside.		2.95%	2.55%	1.25%
New Zealand Infrastructure		Anticipated to mainly own and trade New Zealand infrastructure company shares. The Portfolio may also hold an allocation to Australian shares and other actively managed authorised asset classes ⁵ with the aim of mitigating the downside and capturing the upside.		2.95%	2.55%	1.25%
New Zealand Utilities	To mitigate the impact of inflation on your investment over the medium and/or long term with active management.	Anticipated to mainly own and trade New Zealand utility company shares. The Portfolio may also hold an allocation to Australian shares and other actively managed authorised asset classes ⁵ with the aim of mitigating the downside and capturing the upside.		2.95%	2.55%	1.25%
Global Property		Anticipated to mainly own and trade international property company shares. The Portfolio may also hold an allocation to other actively managed authorised asset classes ⁵ with the aim of mitigating the downside and capturing the upside.		2.95%	2.55%	1.25%
Global Infrastructure		Anticipated to mainly own and trade international infrastructure company shares. The Portfolio may also hold an allocation to other actively managed authorised asset classes ⁵ with the aim of mitigating the downside and capturing the upside.		2.95%	2.55%	1.25%
Global Utilities		Anticipated to mainly own and trade international utility company shares. The Portfolio may also hold an allocation to other actively managed authorised asset classes ⁵ with the aim of mitigating the downside and capturing the upside.		2.95%	2.55%	1.25%

See page 9 for an explanation of the risk indicator and for information about other risks that are not included in the risk indicator. To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at portal.nzfunds.co.nz/RiskLaunch/.

1. The Portfolios have not been in existence for a full five years to 30 June 2024. Accordingly, the risk indicator for each Portfolio was prepared using the returns of a market index as well as actual returns. Market index returns have been used for the period prior to 17 February 2023. As a result, the risk indicator may provide a less reliable indicator of the potential future volatility of the Portfolios. 2. As a percentage of the net asset value of each Portfolio. 3. Includes estimated performance fees. See page 11 for more information. 4. If you have \$1 million or more invested in managed funds offered by NZ Funds, a fee rebate will apply. The estimated annual fund charges shown are after this fee rebate. See page 11 for more information. 5. The authorised asset classes for each Portfolio can be found in the table on pages 8 and 9.

2. How does this investment work?

Legal structure

The Portfolios are established within the NZ Funds Managed Portfolio Service Part Two Scheme, a managed investment scheme (Scheme) registered under the Financial Markets Conduct Act 2013 (FMC Act).

The Scheme is governed by a trust deed (Trust Deed) between NZ Funds and The New Zealand Guardian Trust Company Limited (Supervisor).

The money you invest into a Portfolio is pooled with other investors' money to purchase assets. You will receive units in each Portfolio you invest in which represent your interest in that Portfolio.

The units do not give you legal ownership of the Portfolio's assets but they do give you the right to a share of any returns from those assets. The assets of a Portfolio are not available to meet the liabilities of any other fund in the Scheme.

The number of units you receive is based on the unit price. The performance of your investment will be measured by the rise or fall of the unit price. The Portfolios do not make distributions and any income received by the Portfolios is reflected in the unit price.

Features and benefits

NZ Funds' active management approach aims to capture returns in a rising market and mitigate the downside in a falling market, in each case relative to the broader market. The principal benefit of this approach is that, in our view, investors are more likely to meet their long-term investment objectives.

Some of the features of this offer, including the use of derivatives and leverage, may mean an investment in the Portfolios is not appropriate for you.

We recommend you discuss the features and benefits of this offer with a financial adviser before deciding whether to invest.

The Portfolios

The NZ Funds Active Inflation Series Portfolios provide investors with exposures to specific market sectors. In each sector, investors have a choice of investing in a Portfolio that predominantly invests in shares issued by New Zealand and Australian companies, or investing in a Portfolio with a focus on shares issued by global companies.

The Portfolios predominantly invest in shares. They may also hold an allocation to other actively managed asset classes, with the aim of mitigating the downside and capturing the upside. The Portfolios may also invest in any approved asset class through derivatives.

A diversified approach

The Portfolios are designed specifically for use by financial advisers. They can be used as either stand-alone investments or combined in different ways along with the other Portfolios in the NZ Funds Active Series in order to achieve different investment outcomes.

Active management

NZ Funds uses an active investment management approach when managing the Portfolios. This approach seeks to maintain a balance between preserving your capital and growing your wealth in a manner that is consistent with each Portfolio's objective. This is different from a passive investment approach.

NZ Funds active investment management approach means that we make ongoing investment decisions, search for emerging opportunities, buy or sell securities, and use sophisticated investment instruments and techniques (used by other managers who manage money in similar ways to us) in seeking to achieve the investment objective of each Portfolio. These are described in the Statement of Investment Policy & Objectives (SIPO), which is available on the scheme register at disclose-register.companiesoffice.govt.nz.

As part of our investment approach we use active-quant investment management. Active-quant means we select companies from the sectors that are the focus of the relevant Portfolio and then use a quantitative screen to determine their portfolio weight and liquidity.

This approach is active to the extent that the criteria we screen for can be varied over the course of the economic cycle to emphasise different attributes in the Portfolio.

The Portfolios may also deviate from the target allocations, due to our active investment management approach and factors such as fund flows or movements in securities prices.

NZ Funds may choose to modify its investment approach or the target allocations from time to time to, for example, ensure that the Portfolios meet our responsible investment policy, or as part of its active management approach.

Downside mitigation

As part of our active investment management approach, we may employ downside mitigation strategies designed to mitigate the effect of large market downturns on the Portfolios.

The ability to access downside mitigation is a key feature of the Portfolios. However, there may be periods where downside mitigation is not successful or was not applied.

Specialist managers

As part of our active investment management approach, we may use specialist external investment managers (external managers), specialising in different asset classes and investment approaches.

External managers may be selected where we consider their investment approach will help meet the Portfolios' objectives. Some of the external managers we use may not offer their services to individual investors or may have high threshold amounts for investment.

Wholesale trusts

The Portfolios may invest directly, or indirectly via wholesale trusts. A wholesale trust is a wholesale fund managed by us which holds investments. The wholesale trust investment structure provides operational and administrative efficiencies.

In addition to the Portfolios, the wholesale trusts may also be invested in by other wholesale investors, including directors and employees of NZ Funds and its related entities.

Use of derivatives

NZ Funds may use derivatives in managing the Portfolios. A derivative is a specialised financial instrument that gets (derives) its value from another asset (the underlying asset).

Derivatives are useful because they are financially equivalent to buying, selling, or trading the underlying asset itself, and are generally very liquid because of the volume of transactions traded daily.

The use of derivatives can help us achieve better outcomes by enabling us to implement changes rapidly. The transaction costs associated with trading derivatives are also minimal when compared to the costs of buying, selling, or trading the underlying assets.

Derivatives can be considered to be 'leveraged' investments, which means that a relatively small investment in derivatives can produce the same gain or loss as a much larger investment in the underlying asset. As a result, gains or losses may be increased compared to an investment approach that does not use derivatives.

The use of derivatives and the leverage their use creates may increase or decrease investment risk. NZ Funds uses derivatives in a selective manner and makes decisions on the amount of leverage that individual Portfolios may use.

The use of derivatives is managed through NZ Funds' active investment management approach and through the processes and policies surrounding our investment guidelines. The guidelines are not limits on the amount of leverage that the use of derivatives may create in each authorised asset class.

NZ Funds expects to regularly use leverage (via derivatives) to change the exposure to authorised asset classes. The actual amount of leverage used by the Portfolios since their inception is set out in the Other Material Information (OMI) document, which is available on offer register at disclose-register.companiesoffice.govt.nz.

NZ Funds' use of derivatives in managing the Portfolios is a key feature of the Portfolios and may be extensive. The use of derivatives may also lead to the Portfolios being leveraged.

Securities lending

The Portfolios may undertake securities lending and other revenue generating activities. Securities lending involves the transfer (lending) of securities (e.g. bonds or shares) to a third party (the borrower) for a fixed period of time, in return for a payment (revenue).

To protect against loss the borrower may provide the lender with collateral in the form of cash or securities. There is no guarantee that the relevant Portfolio will not incur a loss.

The net proceeds generated from these activities will be shared equally between NZ Funds and the relevant Portfolio. Where these activities involve risks, such as the risk of default, the risks are borne by the relevant Portfolio.

Borrowing

The Portfolios do not borrow to invest.

Making investments

You can invest in a Portfolio by completing an application form. An investment can be made by lump sum or regular contributions. You can choose to make regular contributions on a weekly, fortnightly, monthly or quarterly basis. You can stop regular contributions at any time by sending us a letter or email.

NZ Funds does not charge a contribution fee.

Withdrawing your investments

You can withdraw all or part of your investment in a Portfolio (subject to the withdrawal restrictions below) by completing a withdrawal form. You can obtain this form from your financial advice provider, from our website, or by contacting us.

You must give 14 days' notice of your intention to withdraw. This process is designed to minimise the impact of withdrawals on investors. Withdrawals are normally paid within four business days after the end of the notice period.

Withdrawal proceeds will be calculated on the date that the notice period expires and not on the date you provide your withdrawal form to NZ Funds. You should be aware this can affect the amount of the withdrawal proceeds.

If you experience financial hardship or in other exceptional circumstances, we may waive the notice period. Once you give your withdrawal notice, you cannot revoke it unless we agree.

You can also choose to make regular withdrawals of a set amount on a fortnightly, monthly or quarterly basis. You can set up regular withdrawals by completing a single withdrawal form; you do not need to complete a form for each withdrawal. The withdrawal notice period must expire before your first regular withdrawal commences. You can stop regular withdrawals any time by sending us a letter or email.

You can withdraw from a Portfolio in the NZ Funds Active Inflation Series and have the proceeds paid into an NZ Funds managed portfolio offered under another PDS that is not a part of the NZ Funds Active Series. To do this, you will need to complete an application form for the other managed portfolio either online, or by completing the application form in the other PDS.

NZ Funds may in our discretion defer withdrawals for up to two business days. We may also suspend withdrawals in certain circumstances where we consider that it is not practicable or would be materially prejudicial to the interests of any investors in the Portfolio.

NZ Funds does not charge a withdrawal fee.

How to switch between funds

A switch is considered a withdrawal from one Portfolio and an application for units in another Portfolio. You can switch between Portfolios that are part of the NZ Funds Active Series by completing a switch form.

There are no notice periods for switches so you can generally switch your investment at any time (subject to our right to defer or suspend switches). Switch requests are normally processed within two business days of receipt.

NZ Funds may in our discretion defer processing some or all switch requests for up to 20 business days. We may also suspend switches in certain circumstances where we consider that it is not practicable or would be materially prejudicial to the interests of any investors in the Portfolio.

NZ Funds does not charge a switch fee.

For more information on withdrawals and switches, see the OMI document on the offer register at disclose-register.companiesoffice.govt.nz.

3. Description of your investment options

NZ Funds uses an active investment management approach when managing the Portfolios. This approach seeks to maintain a balance between preserving your capital and growing your wealth in a manner that is consistent with each Portfolio's objective.

NZ Funds' active investment management approach allows the Portfolios to be invested in authorised asset classes in any proportion. It also includes the ability for the Portfolios to use derivatives which can create leverage. NZ Funds also actively manages the foreign currency in the Portfolios.

Investment guidelines

NZ Funds uses a combination of authorised asset classes, guideline ranges and target investment mixes in the oversight of the Portfolios.

The **authorised asset classes** are the types of assets that each Portfolio is permitted to invest in.

The **guideline ranges** are the ranges within which each Portfolio will normally (but not always) invest in the authorised asset classes over the course of an economic cycle. More information on the guideline ranges is contained in the OMI document.

The OMI also contains information on how we manage foreign currency, and (where relevant) the historical investment mix and historical leverage range for each Portfolio.

The **target investment mix** (being the dark coloured portion of the guideline range for each asset class) is the expected target investment mix for each Portfolio over the economic cycle.

The guideline ranges and target investment mix shown on pages 8 and 9 can be expected to change for each Portfolio over the course of the economic cycle.

* Numbers exceeding 100% illustrate use of leverage via derivatives.

Investment policy & objectives

Further information on NZ Funds' investment approach can be found in the SIPO. The SIPO is available on the scheme register at disclose-register.companiesoffice.govt.nz. We may make changes to the SIPO at any time after consulting with the Supervisor.

A description of any material changes will be included in the Scheme's annual report. Where required by the Trust Deed or law, you will receive notice of material changes before they occur. Further information about the assets in each Portfolio can be found in the Quarterly Fund Updates at www.nzfunds.co.nz.

Portfolio	Objective	Portfolio summary, guideline range & target investment mix ¹	Risk indicator ²	Minimum suggested timeframe
New Zealand Property & Retirement Villages		<p>Anticipated to mainly own and trade New Zealand property and retirement village company shares. The Portfolio may also hold an allocation to Australian shares and other actively managed authorised asset classes with the aim of mitigating the downside and capturing the upside.</p>	5	5 years+
New Zealand Infrastructure	To mitigate the impact of inflation on your investment over the medium and/or long term with active management.	<p>Anticipated to mainly own and trade New Zealand infrastructure company shares. The Portfolio may also hold an allocation to Australian shares and other actively managed authorised asset classes with the aim of mitigating the downside and capturing the upside.</p>	5	5 years+
New Zealand Utilities		<p>Anticipated to mainly own and trade New Zealand utility company shares. The Portfolio may also hold an allocation to Australian shares and other actively managed authorised asset classes with the aim of mitigating the downside and capturing the upside.</p>	6	5 years+

1. For more information on what is included in each asset class see the SIPO. Monthly updates of the actual investments held by each Portfolio are available on the Performance page of our website at www.nzfunds.co.nz. 2. The Portfolios have not been in existence for a full five years to 30 June 2024. Accordingly, the risk indicator for each Portfolio was prepared using the returns of a market index as well as actual returns. Market index returns have been used for the period prior to 17 February 2023. As a result, the risk indicator may provide a less reliable indicator of the potential future volatility of the Portfolios. 3. Alternative securities are investments not usually accessed by retail investors, for example hedge funds.

The risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for the five years to 30 June 2024. While risk indicators are usually relatively stable, they do shift from time to time. You can see the most recent risk indicator in the latest Quarterly Fund Update for each Portfolio.

The Active Inflation Series Portfolios do not have a five-year return history. Accordingly, the risk indicators were prepared using a combination of market index returns and actual returns.

The risk indicators are calculated using historical returns only. If the period of returns used in calculating the risk indicators reflected a time of unusually low or high volatility, the risk indicator may not reflect the future volatility of a Portfolio.

NZ Funds is not a passive fund manager. Our active investment approach seeks to anticipate future events and this leads to changes in our asset allocations. Changing our asset allocation may lead to material changes to expected future risk or expected returns.

General investment risks

Some of the things that may cause a Portfolio's value to move up and down, which affect the risk indicator, are:

Market risk

Market risk is the risk of volatility or loss caused by a change in the value of the investments held by a Portfolio. Market risk arises from uncertainty about the future value of investments held by a Portfolio. Changes in value may be caused by factors specific to an investment, or as a result of factors affecting financial markets generally.

Sector risk

Each Portfolio invests predominantly in investments that give it exposure to its respective market sector. The Portfolios may therefore have a concentrated exposure to that sector and as a result may be substantially exposed to movements in prices of the particular market sector they are invested in.

Currency risk

The Portfolios' unit prices are denominated in New Zealand dollars but the Portfolios may be exposed directly or indirectly to foreign currencies. There is a risk that the Portfolios' returns may be adversely affected by foreign currency volatility.

Other specific risks

Other circumstances that can significantly increase the risk to returns for investors and that may not be reflected in the risk indicator include:

Active management risk

NZ Funds uses an active investment management approach. Active management is subject to different risks (which may be considered higher risks), than non-active (or passive) management. As a result, our active investment management approach may cause the returns and capital stability of the Portfolios to significantly differ from the returns and capital stability of other managers and the underlying asset classes used or targeted.

Active-quant risk

NZ Funds active-quant investment approach allocates funds based on a set of quantitative criteria and an assessment of liquidity to help determine the asset allocation of certain wholesale trusts that the Portfolios invest into. The Portfolios' returns may therefore be materially determined by this investment approach.

Sophisticated instruments and techniques

In managing the Portfolios, NZ Funds and its external managers are able to use certain sophisticated investment instruments and techniques (including hedge funds and derivatives) which are used by other managers who manage money in similar ways to us. This may result in the returns on your investment fluctuating more than in some other funds. The risk of sophisticated investments may be higher than the risk indicator for the Portfolios.

Potentially extensive use of leverage via derivatives

In managing the Portfolios, NZ Funds uses derivatives to create leverage to seek to both increase returns (by taking active positions) and reduce risk (by taking hedge positions). There is no limit on our use of derivatives or the amount of leverage their use may create. The use of derivatives and the leverage their use may create can increase or decrease the risk of a Portfolio materially and is an essential aspect of our active investment approach.

Security risk

The Portfolios' returns may fluctuate as a result of changes in the value of securities that they invest in. The value of a security may be affected by many factors, including the performance of the relevant manager, market sector, asset class or country.

Execution risk

Each Portfolio's investment strategy depends on the ability of NZ Funds to establish and maintain a portfolio of investments and derivatives. If NZ Funds is unable to buy or sell investments or derivatives in a timely and efficient manner, and on terms, including price, that NZ Funds deems reasonable, a Portfolio may be adversely affected.

Specialist manager risk

NZ Funds may use external managers in the management of the Portfolios. There are a number of risks associated with investing with these managers. These include wide mandates, redemption restrictions, and the risk that a manager selected underperforms or generates a loss. We have a due diligence process for appointing external managers and managers are monitored and reviewed.

Securities lending risk

Securities lending risk is the risk that the borrower of securities is unable to meet, or refuses to honour, its obligations to return the borrowed securities, and that where collateral has been provided, the collateral is insufficient to cover the cost of repurchasing those securities, or those securities are unavailable for purchase.

Key person risk

The Portfolios may be dependent on the services of one or more key persons, either inside or outside NZ Funds, and may be adversely affected by the departure or poor performance of one or more of those individuals.

For more information on the risks of investing in the Portfolios, see the OMI document, which is available on the offer register at disclose-register.companiesoffice.govt.nz.

5. What are the fees?

You will be charged fees for investing in the Portfolios. Fees are deducted from your investment and will reduce your returns. If NZ Funds invests in other funds, those funds may also charge fees. The fees you pay will be charged in two ways:

- Regular charges (for example, annual fund charges). Small differences in these fees can have a big impact on your investment over the long term.
- One-off fees. NZ Funds does not charge any establishment, contribution, termination, withdrawal, switch or transfer fees.

Name	Estimated annual fund charges ^{1,2}	Estimated annual fund charges after fee rebate ^{1,2,3}	
		Total invested \$1m - \$3m	Over \$3m
New Zealand Property & Retirement Villages	2.95%	2.55%	1.25%
New Zealand Infrastructure	2.95%	2.55%	1.25%
New Zealand Utilities	2.95%	2.55%	1.25%
Global Property	2.95%	2.55%	1.25%
Global Infrastructure	2.95%	2.55%	1.25%
Global Utilities	2.95%	2.55%	1.25%

Annual fund charges

Annual fund charges are made up of a management fee, estimated performance fees, and external management fees and estimates of other fund charges incurred by the Portfolio. These fees and charges are deducted directly or indirectly from each Portfolio and are reflected in the unit price of that Portfolio.

In addition to annual fund charges, transaction costs of buying and selling assets (e.g. brokerage) are paid directly or indirectly by the Portfolios and reflected in the unit price.

The estimated annual fund charges set out previously represent the total estimated amount of all of the fees. For more details on the basis of estimation, see the OMI document.

Management fee

Each Portfolio is charged an annual management fee by NZ Funds. The management fee is fixed as a percentage of the gross asset value of each Portfolio. It is calculated daily and paid monthly.

Performance fee

NZ Funds may charge a performance fee in certain wholesale trusts that the Portfolios invest in. All performance fees are based on a hurdle rate of return. The hurdle rate is the minimum return the wholesale trust must achieve before a performance fee is charged.

A performance fee is only charged (accrued) if the returns of the wholesale trust (before tax, but not including imputation credits) exceed the performance of the relevant specific market index (hurdle rate) set out in the table below.

When we calculate the performance fee, we include a notional management fee which has the effect of increasing the level of return the wholesale trust must achieve before a performance fee is charged.

All performance fees are calculated and accrued daily, and subject to the high-water mark being exceeded, are payable on or after 31 March each year. There is no maximum limit on any performance fee.

The table below also sets out the wholesale trusts where a performance fee may be charged and the criteria that needs to be met for a performance fee to be charged. Further details on which wholesale trust each Portfolio invests in is available in the OMI document.

A performance fee is accrued if the wholesale trust's return exceeds the hurdle rate but is only paid for a performance year if the wholesale trust's unit price exceeds the high-water mark (being the unit price the last time the performance fee was paid or in the case of the first performance fee the unit price on the date that the performance fee came into effect).

Wholesale Trust	What is performance assessed against?	Specific market indices used as performance benchmark (hurdle rate) ⁴	Performance fee amount
Private Absolute Return Trust	New Zealand corporate bonds	S&P/NZX Investment Grade Corporate Bond Total Return Index	10% of the wholesale trust's returns above the hurdle rate.
Private Global Inflation Trust	New Zealand corporate bonds	S&P/NZX Investment Grade Corporate Bond Total Return Index	
Private Global Property Trust	International listed property	FTSE EPRA NAREIT Developed Net Total Return Index Hedged NZD ⁵	
New Zealand Investment Trust 3 ⁶	Bitcoin and United States shares	50% S&P 500 Net Total Return Index 50% S&P CME Bitcoin Futures Daily Roll Index	15% of the wholesale trust's returns above the hurdle rate.
New Zealand Investment Trust 9	New Zealand listed property	S&P/NZX Real Estate Select Index Gross ⁵	
New Zealand Investment Trust 16	New Zealand listed utility shares	S&P/NZX All Utilities Sector Gross	
New Zealand Investment Trust 20	New Zealand listed industrial shares	S&P/NZX All Industrials Sector Gross	
New Zealand Investment Trust 23	International listed utility shares	S&P World Sustainability Enhanced Utilities Net Total Return Index USD ⁵	
New Zealand Investment Trust 24	International listed infrastructure shares	STOXX Global Broad Infrastructure Net Total Return Index USD ⁵	

1. As a percentage of the net asset value of each Portfolio. 2. The estimated annual fund charges include estimated performance fees of 0.02% of the net asset value of each Portfolio. 3. A fee rebate will apply where the total amount you have invested in the Portfolios and other managed funds offered by NZ Funds is \$1 million or more. See page 12 for more information. 4. As the hurdle rate is based on the performance of the relevant wholesale trust, you may pay a performance fee even if the Portfolio's overall performance is below the market index as reported in the Quarterly Fund Updates. 5. Market index used as the performance benchmark effective from 1 August 2024. 6. The Portfolios may commence investing in this wholesale trust from 1 August 2024.

Out-performance of the relevant market index, whether the market index return is positive or negative, will result in a performance fee being accrued even though the unit price may be below the last high-water mark.

If the high-water mark is not exceeded at 31 March, any accrued performance fee is carried forward and will be paid when the high-water mark is exceeded. The high-water mark ensures that any accrued performance fee is not paid to NZ Funds until the unit price is above the last high-water mark.

NZ Funds may change the rate and basis of calculation of a performance fee at any time by giving investors one month's notice. For more information on the performance fee, including an example of how it is calculated, see the OMI document.

Other fund charges

These include estimated third party charges for services provided to the Portfolios and related wholesale trusts that the Portfolios invest in, such as fund administration, custody, audit and legal fees, and the Supervisor's fees.

Where NZ Funds employs third party investment experts, the other fund charges also include the estimated management and performance fees charged by these investment experts.

Fee rebates

A fee rebate will apply where the total amount you have invested in the Portfolios and other managed funds offered by NZ Funds is \$1 million or more. The level of fee rebate you are entitled to will be determined by your total investment.

The fee rebate is calculated daily based on the balance of your investment and paid monthly. The effect of the fee rebate is illustrated in the table on page 11.

In addition, we may at our discretion and from our own funds, pay or rebate some or all fees and expenses and we may, at our discretion, offer an investor or a group of investors a different fee rebate from that set out in this section.

For more information on fees and the fee rebate, see the OMI document.

Individual action fee

NZ Funds does not charge any establishment, contribution, termination, withdrawal, switch or transfer fees.

Financial advice provider fee

With your agreement, your financial advice provider may charge a fee for initial and/or ongoing financial advice and/or service. If charged, this will be deducted from your investment and paid to your financial advice provider.

Where you have selected a financial adviser employed by NZ Funds we may charge a fee for financial advisory services in the same way as set out above.

Onboarding and service payments

NZ Funds may pay an external financial advice provider an onboarding and ongoing service payment in recognition of the effort and costs associated with providing services to you. These payments are made out of the revenue earned by NZ Funds for managing the Portfolios and are not deducted directly from the Portfolios.

Example of how fees apply to an investor

Sarah invests \$10,000 in the New Zealand Infrastructure Portfolio. She is not charged an establishment fee or a contribution fee. This means the starting value of her investment is \$10,000.

She is charged management and administration fees (comprising management fee, estimated service fee and external management fee) which work out to about \$293 (2.93% of \$10,000). These fees might be more or less if her account balance has increased or decreased over the year.

Sarah may also be indirectly charged a performance fee if the related wholesale trusts in which the New Zealand Infrastructure Portfolio is invested earned more than their target.

Estimated total fees for the first year:

Fund charges \$295*.

* Includes an estimated performance fee of \$2.

See the latest Quarterly Fund Update for an example of the actual returns and fees investors were charged over the past year. This example only applies to the New Zealand Infrastructure Portfolio. If you are considering investing in other Portfolios, this example may not be representative of the actual fees you may be charged.

Additional information

Securities lending revenue

The net proceeds from securities lending and other specific revenue generating activities will be shared equally between NZ Funds and the relevant Portfolio.

GST

Fees do not include GST or other similar tax. This means that if any GST, or other similar tax, is payable on any fee, that tax will be an additional cost.

The fees can be changed

Under the terms of the Trust Deed, existing fees may be changed or new fees may be introduced. For more information, see the OMI document.

NZ Funds must publish a Quarterly Fund Update for each Portfolio showing the fees actually charged during the most recent year. Quarterly Fund Updates, including past updates, are available at www.nzfunds.co.nz.

6. What taxes will you pay?

Each Portfolio is a PIE. The amount of tax you pay is based on your PIR. To determine your PIR, go to www.ird.govt.nz/roles/portfolio-investment-entities/using-prescribed-investor-rates. If you are unsure of your PIR, we recommend you seek professional advice or contact Inland Revenue.

It is your responsibility to tell NZ Funds your PIR when you invest or if your PIR changes. If you do not tell NZ Funds, a default rate may be applied.

If the rate applied to your PIE income is lower than your correct PIR you will be required to pay any tax shortfall as part of the income tax year-end process. If the rate applied to your PIE income is higher than your PIR any tax over-withheld will be used to reduce any income tax liability you may have for the tax year and any remaining amount may be refunded to you. For more information on tax see the OMI document.

7. Who is involved?

About NZ Funds

NZ Funds is the manager of the Portfolios. NZ Funds makes decisions about what assets the Portfolios invest in and may appoint external managers. Our contact details are:

Attention: Client Services
New Zealand Funds Management Limited

9. Where you can find more information

More information about the Scheme and the Portfolios, such as financial statements, annual reports, Quarterly Fund Updates, the OMI document, the Trust Deed and the SIPO, is available on the offer register and the scheme register at disclose-register.companiesoffice.govt.nz.

A copy of information on the offer register and the scheme register is available on request from the Registrar of Financial Service Providers.

Quarterly Fund Updates and other information relating to the Portfolios (including the OMI document and the SIPO) are also available on our website.

You may request a copy of this information from NZ Funds free of charge. Our contact details are set out in section 7 of this PDS 'Who is involved?'

10. How to apply

You can invest in the Active Inflation Series Portfolios by completing an application form available at www.nzfunds.co.nz, or by contacting NZ Funds or your financial advice provider.

This page has intentionally been left blank.

NZ Funds' active management approach aims to capture returns in a rising market and mitigate the downside in a falling market, in each case relative to the broader market.

The principal benefit of this approach is that, in our view, investors are more likely to meet their long-term investment objectives.

Some of the features of this offer, including the use of derivatives and leverage, may mean an investment in the Portfolios is not appropriate for you.

We recommend you discuss the features and benefits of this offer with a financial adviser before deciding whether to invest.
