

# Fund Update

For the quarter ended 31 March 2024

- **Foundation Series Funds**
- **Foundation Series Total World Fund**

This fund update was first made publicly available on: 30 April 2024

## What is the purpose of this update?

This document tells you how the Foundation Series Total World Fund has performed and what fees were charged. The document will help you to compare the fund with other funds. FundRock NZ Limited prepared this update in accordance with the Financial Markets Conduct Act 2013. This information is not audited and may be updated.

## Description of this fund

Objective: To perform broadly in line with the return of its investment benchmark before fees and tax over the long-term. The fund's investment benchmark is the Morningstar Global All Cap Target Market Exposure NR NZD Index.

Strategy: The fund aims for high long-run returns by investing in an Exchange-Traded Fund ('ETF') that invests in shares of the large, mid-sized and small companies listed on international stockmarkets.

|                           |                 |
|---------------------------|-----------------|
| Total value of the fund   | \$NZ 70,278,360 |
| The date the fund started | 7 November 2022 |

## What are the risks of investing?<sup>1</sup>

Risk indicator for the Foundation Series Total World Fund.

The risk indicator is rated from 1 (low) to 7 (high). The rating reflects how much the value of the fund's assets goes up and down. A higher risk generally means higher potential returns over time, but more ups and downs along the way.

To help you clarify your own attitude to risk, you can seek financial advice or work out your risk profile at [www.sorted.org.nz](http://www.sorted.org.nz)

Note that even the lowest category does not mean a risk-free investment, and there are other risks that are not captured by this rating.

This risk indicator is not a guarantee of a fund's future performance. The risk indicator is based on the returns data for 5 years to 31 March 2024. While risk indicators are usually relatively stable, they do shift from time to time. The risk indicator will continue to be updated in future fund updates.

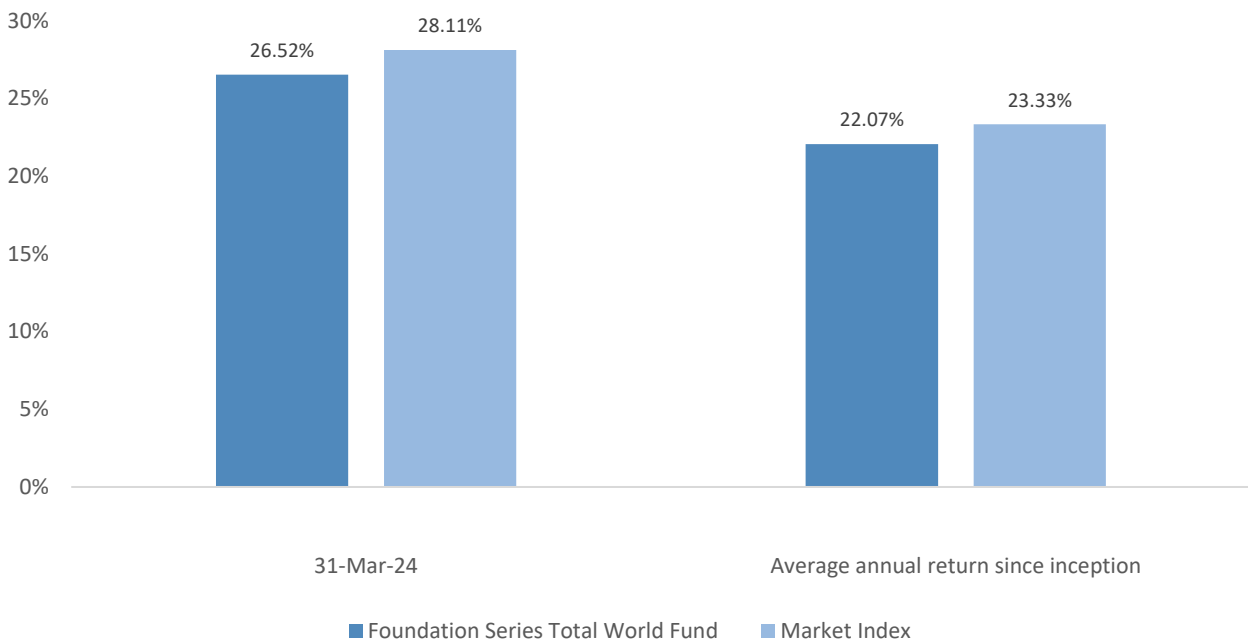

See the product disclosure statement (PDS) for more information about the risks associated with investing in this fund.

### How has the fund performed?

|  | Past year |
|--|-----------|
| Annual return (after deductions for charges and tax)                   | 26.52%    |
| Annual return (after deductions for charges but before tax)            | 28.30%    |
| Market index annual return (reflects no deduction for charges and tax) | 28.11%    |

The market index return is the Morningstar Global All-Cap Target Market Exposure NR NZD. This has been the market index since the inception of the fund. Additional information about the market index is available on the offer register at [www.disclose-register.companiesoffice.govt.nz](http://www.disclose-register.companiesoffice.govt.nz).

Annual Return Graph

This shows the return after fund charges and tax for each year ending 31 March since the fund started. The last bar shows the average annual return since the fund started, up to 31 March 2024.

**Important:** This does not tell you how the fund will perform in the future.

Returns in this update are after tax at the highest prescribed investor rate (PIR) of tax for an individual New Zealand resident. Your tax may be lower.

## What fees are investors charged?

Investors in the Foundation Series Total World Fund are charged fund charges which are:

|   | % of net asset value<br>(including GST) |
|---|---|
| Total fund charges <sup>2</sup>             | 0.07%                                   |
| Which are made up of:                       |   |
| Total manager and administration charges    | 0.07%                                   |
| Including:                                  |   |
| Manager's basic fee (including GST)         | 0.07%                                   |
| Other management and administration charges | 0.00%                                   |

The charges outlined above represent the fees charged within the ETFs (external management fees) and have been estimated based on information in the ETFs' disclosure documents. Note that the fees within the ETFs are not tax deductible.

Investors are charged each time they buy (entry fee) or sell (exit fee) units in the fund. These fees are charged to cover the costs of the underlying brokerage, foreign currency exchange, transaction fees and investment management service fees associated with investing in the underlying investments. Current entry and exit fees are 0.50%.

Investors may also be charged individual action fees for specific actions or decisions (for example, for withdrawing from or switching funds). See the Core Equity Funds PDS on the offer register at [www.disclose-register.companiesoffice.govt.nz](http://www.disclose-register.companiesoffice.govt.nz) for more information about those fees.

### Example of how this applies to an investor

Small differences in fees and charges can have a big impact on your investment over the long term.

Anthony had \$10,000 in the fund at the start of the year and did not make any further contributions. He is charged an entry fee of 0.50%. This brings starting value of his investment to \$9,950. At the end of the year, Anthony received a return after fund charges were deducted of \$2,816 (that is 28.30% of his initial \$10,000). This gives Anthony a total return after tax of \$2,639 for the year.

## Further information

You can also obtain this information, the Core Equity Funds PDS for the Foundation Series Funds, and some additional information from the offer register at [www.disclose-register.companiesoffice.govt.nz](http://www.disclose-register.companiesoffice.govt.nz).

## Notes

- <sup>1</sup> A combination of actual fund returns and market index returns have been used to determine the risk indicator as the fund has not been operating for the required five years. The risk indicator may therefore provide a less reliable indicator of the fund's future volatility. Market index returns have been used until 30 November 2022 and fund returns thereafter.
- <sup>2</sup> As the fund only started accepting contributions on 7 November 2022, historical fee information is not available.
- <sup>3</sup> The top 10 assets add up to more than 100% of NAV as the fund also has liabilities which offsets these assets.
